Each Variety Of Slate’s Seeds Grown By a Specialist

The modern seedsman is not a seed-grower, but a man who collects from the garden spots of the world the best seeds obtainable. He must know good seed—must know each variety—where it attains its most perfect types and how to get the seed grown in this ideal section. In this manner, he is able to offer to his customers seeds—each kind grown by a specialist—each kind grown under the most favorable conditions.

From one of the most reliable growers of the North, I secure my snap beans. From an experienced grower in the West, I obtain pumpkin and squash seed. From the seed gardens of the world, I select Slate’s Seeds. Each kind grown where conditions are most favorable to that plant. From men who make a specialty of growing certain kinds of seed—men who are experienced and reliable—I obtain my stocks.

I do not call my seeds Southern grown, Northern, Eastern, or Western grown. The production of Slate’s Seeds has no geographical boundary—the limit is only that imposed by the requirements of each plant.

The house of Slate stands ready to serve you with seeds, each variety of which has been grown in the section best adapted to its growth. That is why “Slate’s Seeds Produce Better Crops.”

Sincerely yours,

President.

The Slate Seed Co.

South Boston, Va.
January 1, 1926.

Here Are Some of Our Customers and What They Say About Slate’s Seeds

This is little Miss Nelson holding a bunch of onions grown from Slate’s seeds. Her mother, Mrs. A. H. Nelson, Nelson, Va., writes: “I want to tell you how very much we like Slate’s Seeds. They are all as represented, or better. We have used them for years.”

We advised Mr. Geo. R. Martin, of Peters Creek, Va., to sow one of our hay and pasture mixtures on some of his land and this is what he has to say about it. “The mixture for pasture you advised me to use on some thin upland has paid me a hundred fold for what money I spent. The hay I grew from it was fine and our demonstration agent said it was the best he had ever seen grown in Virginia.”

This happy scene is due to Slate’s Seeds, because the big Rattlesnake watermelon was grown from them and without the watermelon the three children would not be smiling. They are the children of Mrs. J. E. Davis, of Statesville, N. C., who writes us: “I am highly pleased with your garden and flower seeds.”

Mr. and Mrs. Jake Berger, and baby Berger, are all boosters for Slate’s Seeds. They live at Gretna, Va., and Mr. Berger writes us under date of August 29, 1925: “I have had such wonderful success with all of the seeds I have ordered from you, that I feel that I want to tell you about it and how much your catalog means to us with its charts and planting suggestions. Your information has enabled us to grow successfully many things I had never dared try before. I value your firm and catalog as a personal friend.”

Dear Sirs:—

I live on a public road near some beautiful scenery, and in the summer months many tourists stop at my home for a drink of the clear cold water. I also serve them hot meals. I decided I could make a few dollars and make my home more beautiful at the same time by selling these tourists flowers. So in the early spring of 1925 I ordered $5.00 worth of flower seed and bulbs and after the travelers had eaten, I would always show them my flowers. Almost every one would buy at least one bunch. I sold $17.35 worth of flowers and 75¢ worth of seed. In this way I cleared $13.10. Next year I mean to grow more flowers and try raising some vegetables to sell also.

Yours truly, Mrs. Etta Gwaltney.

Hiddenite, N. C., August 26, 1925.

Can you remember when you did this. Even the calf seems to be enjoying the sport. All three of these belong to one of our good customers, Mrs. J. J. Laugton, of Löweville, Va. She wrote us on August 3, 1925: “I cannot find words to express my sincere appreciation of the hearty co-operation you are giving the public in furnishing good pure farm, garden, and flower seed. We have used your garden seed with the best results obtainable. A special feature of your house is quick service. We always order from your house and recommend Slate’s as the South’s best seed house.”

Reginald Giles and his horse Dan are holding a serious consultation regarding the merits of various brands of seeds and we are inclined to think that Slate’s will be the choice of these two farmers, because Reginald’s mother, Mrs. Leola Giles, of Chatham, Va., ordered some flowers from us and wrote: “I had the most gorgeous beds of Candytuft, Phlox, Stocks, Verbena, Peonies, Pansy, Marigold, Zinnias, Cosmos, Wallflowers, Balsam, and others too numerous to mention—all for $1.00. When I want good seed and bulbs I send to you for them.”
SLATE'S LAWN MIXTURES

Our lawn mixtures are made for a purpose and not for a price. They differ from most mixtures of this kind in two very essential points. First they contain absolutely no filler of any kind. Only clean solid seed are used in them. Second we tell you below just what grasses are used in these mixtures and how much of each. Such mixtures whether used for the small yard, the large lawn, golf course, tennis court, park, cemetery or any other place where an ornamental sod is wanted will give satisfaction if it be possible for good seed to give it. To make a good lawn requires no little labor, but by all means do the work thoroughly. Land half prepared will never pay for the trouble. Break the soil deep and pulverize thoroughly some weeks before seeding time. Harrow constantly until the top soil is powdery fine. Apply ground limestone at the rate of one ton per acre and harrow into the soil. Then use a high grade commercial fertilizer or Bone meal at the rate of one thousand pounds per acre. In sowing the seed divide them into two lots, sow one lengthwise the lawn and then the other half across this. Thus vacant spots are avoided. Sow at the rate of 100 lbs. per acre or 1 lb. to every 225 sq. ft. After seeding rake the soil or cover with a light harrow and then roll. Spring sowings may be made from February until April 15th. Fall from August 1st to October 15th.

2040—SLATE'S PERFECTION MIXTURE.—We offer this to the most exacting trade for the finest of ornamental lawns. In it we have put the most beautiful of the grasses and the best seed obtainable. It contains 75% high grade Blue Grass; 5% Fine Leaved Fescue; 5% Creeping Bent Grass; and 15% clean herds grass. This mixture may be used on any clay or loam soil in either shade or sun and will give a sod of the greatest beauty and still one that will last for years if properly cared for. We honestly believe this to be the finest lawn mixture obtainable regardless of price.

Lb. 60c, 5 lbs. $2.75, 10 lbs. $5.00 postpaid. 100 lbs. $40.00 by express.

2036—SLATE'S SPECIAL SHADE MIXTURE.—This mixture is designed to make a sod under dense shade where other lawn mixtures do not thrive. It is to be remembered, however, that any place that is densely shaded will require especial care in the preparation and more fertilizer and water for the up-keep. This mixture is composed of 5% Creeping Bent grass; 25% Meadow Fescue; 25% Clean Herds grass; 5% White Clover, and 40% Blue Grass.

Lb. 55c, 5 lbs. $2.50, 10 lbs. $4.50 postpaid. 100 lbs. $35.00 by express.

2037—SANDY SOIL MIXTURE.—For the coastal section where lawns are composed of only light sandy soil this is the mixture to use. In preparing the formula we have tried to use those grasses that will make a permanent sod. Composed of 30% Perennial Rye Grass, 20% Carpet Grass, 25% Herds Grass; 25% Bermuda Grass.

Lb. 55c, 5 lbs. $2.50, 10 lbs. $4.50 postpaid. 100 lbs. $32.50 by express.

2039—CEMETERY MIXTURE.—Where constant care is given the cemetery, we advise using our Perfection Mixture and for the sandy soil section our mixture for this kind of soil. But for the average cemetery where the best of care is not given and the grass must often go weeks without cutting and water, we advise this mixture for clay or loam soils. Composed of 50% Blue Grass, 20% Herds Grass, 5% White Clover, and 25% Meadow Fescue.

Lb. 55c, 5 lbs. $2.50, 10 lbs. $4.50 postpaid. 100 lbs. $33.00 by express.

2041—SLATE'S UTILITY MIXTURE.—For the big lawns of the farm, the golf course, tennis courts, parks or other large places where absolute perfection is not essential, we have designed a cheaper mixture than our Perfection. Composed of 30% Blue Grass, 20% Herds Grass, 5% White Clover, 30% Meadow Fescue; 15% Perennial Rye Grass.

Lb. 40c, 5 lbs. $1.75, 10 lbs. $3.00 postpaid. 100 lbs. $25.00 by express.
Asparagus

102—PALMETTO.—Permanent Asparagus beds may be started from seed. A little more time is required but this is amply repaid in the bed after once started. Sow seed in well prepared and very rich bed early in the spring. Rows should be twelve inches apart and plants thinned to two inches apart in the row. Cultivate frequently during the summer and in the fall transplant to the permanent bed. We consider the Palmetto the most desirable sort for the home garden.

Pkt. 5c, oz. 10c, ½ lb. 30c, lb. 75c postpaid.

Bush Beans

Beans should always be planted on medium rich soils only. Very rich land makes a rank growth of vine and but few pods. Plant after danger of frost is past in rows 2 to 2½ feet apart, covering seed two inches deep. Later thin plants to stand four inches apart in the row. Give frequent shallow cultivation but never cultivate while the vines are wet with dew, else rust will appear. The garden bean is one of the most useful of vegetables and is generally seen in every garden. It is a vegetable that occupies the land for but a short time and can be worked with other crops. To have good tender beans all summer, make a planting every three weeks.

1—EARLIEST RED VALENTINE.—A very hardy bean especially desirable for the first planting. The vines grow erect to a medium height and have dark green foliage. Produces in six weeks pods of medium length, fleshy and curving. When used young the pods are very tender. Seed deep red splotted with lighter shades.

Pkt. 10c, ½ lb. 20c, lb. 35c, 5 lbs. $1.25, postpaid. 15 lbs. $3.00, 100 lbs. $17.00, by express.

2—HOPKINS IMPROVED VALENTINE.—A select strain of the old Red Valentine. More uniform and has slightly smaller and darker seed. Both pods and seed resemble those of the Red Valentine. We consider this an improvement.

Pkt. 10c, ½ lb. 20c, lb. 35c, 5 lbs. $1.25, postpaid. 15 lbs. $3.00, 100 lbs. $17.00, by express.

3—BOUNDIFUL.—Vines vigorous and upright with large smooth leaves of a light green. Pods from five to six inches long, very large, and flat. Seed of medium size and solid yellow color. One of the very best of the early beans.

Pkt. 10c, ½ lb. 20c, lb. 35c, 5 lbs. $1.25, postpaid. 15 lbs. $3.00, 100 lbs. $18.00, by express.

4—LONG YELLOW SIX WEEKS.—One of the first beans to come in and a good sort for early use. Foliage light green and upright. Pods long and flat. Will mature in six weeks from planting.

Pkt. 10c, ½ lb. 20c, lb. 35c, 5 lbs. $1.25, postpaid. 15 lbs. $3.00, 100 lbs. $17.00, by express.

5—GIANT STRINGLESS GREENPOD.—An excellent main crop bean with very long slender pods. Vines vigorous and very productive. Pods long, slender, round, and almost straight. Remarkably free from strings. Seed small, long, and of a brownish color. Matures in about seven weeks and makes one of the best beans for canning.

Pkt. 10c, ½ lb. 20c, lb. 35c, 5 lbs. $1.25, postpaid. 15 lbs. $3.00, 100 lbs. $18.00, by express.

6—STRINGLESS GREENPOD.—The most tender and delicious bean ever introduced and no garden is complete without it. The vines make a good growth of dark green foliage and bear a heavy crop of rather large pods of medium length and slightly curved. It produces in about six weeks and may be used for either early or late planting. The pods are noted for their tenderness and freedom from strings and will win favor in the eyes of any housewife. The pods will remain upon the vines and retain their good quality longer than those of any other sort. We recommend that you plant this bean at intervals of 20 days in order that a succession of delicious tender pods may be available for the table during the entire season.

Pkt. 10c, ½ lb. 20c, lb. 35c, 5 lbs. $1.25, postpaid. 15 lbs. $3.00, 100 lbs. $18.00, by express.
8—REFUGEE or 1000 to 1.—One of the best of all canning beans. It is rather late, maturing its pods in about seven weeks, but the pods are very tender and fleshy. Vines vigorous and productive. Pods of medium length, round, very thick and tender. Seed rather long, small, and blotted with black and purple shades.

Pkt. 10c. 1/2 lb. 20c. lb. 35c, 5 lbs. $1.25, postpaid. 15 lbs. $3.00, 100 lbs. $17.00, by express.

9—TENNESSEE GREENPOD.—In Southwest Virginia this bean is known as the Franklin County and is extremely popular both for canning and home use. The vines are rather large and inclined to throw small runners. The foliage is dark green and crumpled. Pods from five to seven inches long, flat, of irregular shape, and rank with the best of snaps. Seed rather large, kidney shape, and of a dull brown color.

Pkt. 10c. 1/2 lb. 20c. lb. 35c, 5 lbs. $1.35, postpaid. 15 lbs. $3.25, 100 lbs. $20.00, by express.

10—SLATE'S BLACK VALENTINE.—This is a standard bean with the market growers and one of the best of its kind owing to its ability to stand shipping. We cannot recommend it very highly for the home garden, however. Seed solid black color, rather small, long, and round. Vines very hardy and withstand cold weather better than any. Pods about five inches long, slightly curved, round, and of good quality when young.

Pkt. 10c. 1/2 lb. 20c. lb. 35c, 5 lbs. $1.25, postpaid. 15 lbs. $3.00, 100 lbs. $17.00, by express.

11—DWARF HORTICULTURAL.—Also known as Boston Market and a most popular sort in some sections. It can be used when young as a snap bean and later makes the best of green shelled beans. Vines vigorous and productive with light green foliage. Pods about five inches long, very thick, and filled with large beans in the later stages of growth. Seeds large, oval, and of a cream color blotched red.

Pkt. 10c. 1/2 lb. 20c. lb. 35c, 5 lbs. $1.35, postpaid. 15 lbs. $3.00, 100 lbs. $18.00, by express.

Yellow Pod or Wax Varieties

15—DAVIS WHITE WAX.—One of the best of the wax beans for the home garden. Its pure white seed and clean yellow pod make it well fitted for the home garden. Vines more prolific than those of most wax beans and of vigorous habit. Pods about five inches long, thick, almost straight, round, and of a clean waxy color. Matures in about seven weeks.

Pkt. 10c. 1/2 lb. 20c. lb. 35c, 5 lbs. $1.35, postpaid. 15 lbs. $3.00, 100 lbs. $19.00, by express.

16—CURRIES RUST PROOF WAX.—One of the best of market varieties and a good one for the home garden. Vines make a healthy growth and yield a big crop of pods which ripen uniformly. The pods are about six inches long, flat, and tender. Seed rather large, flattened, and of a purplish black color.

Pkt. 10c. 1/2 lb. 20c. lb. 35c, 5 lbs. $1.35, postpaid. 15 lbs. $3.00, 100 lbs. $19.00, by express.

17—BRITTLE WAX.—A most desirable wax bean for canning. It matures as early as most wax sorts and will retain its tender qualities much longer than the average. The vines are vigorous and upright, bearing an abundance of long, slightly curved pods. The pods are very tender, stringless, and of a clean yellow color. Seed white with dark markings around the eye. For the home garden, we can highly recommend Brittle Wax.

Pkt. 10c. 1/2 lb. 20c. lb. 35c, 5 lbs. $1.35, postpaid. 15 lbs. $3.00, 100 lbs. $19.00, by express.
Pole or Cornfield Beans

Pole beans are far more productive than the bush sorts and can be grown with just as little trouble. The city gardener need not have poles for them to run on but may plant with corn, sunflowers, or along a fence line. Plant two seed to each stalk and cover about three inches. If planted to themselves, lay off rows three to four feet apart, and hills two feet apart in these rows. Plant six to eight seed in each hill and give support soon after they come above the ground. The pole beans are slightly more susceptible to cold and should not be planted quite so early as the bush.

21.—WHITE CREASEBACK.—A popular old garden favorite that has the advantage of white seed. This makes it possible to use the green snaps as long as needed and then save the dry beans for winter use. Very early with long, round, straight pods which are unusually tender and stringless. Seed small, long, round, and pure white.

Pkt. 10c, ½ lb. 25c, lb. 40c, 5 lbs. $1.50, postpaid.
15 lbs. $4.00, 100 lbs. $18.00, by express.

22.—CORN HILL OR CUT SHORT.—A good variety for either snaps or shell beans. The pods are rather short, fat, slightly curved, and filled with medium size beans of a rounded but irregular shape. Seed blotted with red and lighter shades. Later in maturing than most pole beans and for this reason desirable for planting in corn.

Pkt. 10c, ½ lb. 25c, lb. 40c, 5 lbs. $1.50, postpaid.
15 lbs. $4.00, 100 lbs. $18.00, by express.

25.—WHITE SEEDED KENTUCKY WONDER.—Or Burgers Stringless Greenpod. A most popular bean in the South. The seed are white, which gives it additional value as a dry bean and it has the producing qualities of the Kentucky Wonder. Pods very long, almost entirely stringless, and of a light green color. Seed medium size, rather long, and white.

Pkt. 10c, ½ lb. 25c, lb. 40c, 5 lbs. $1.50, postpaid.
15 lbs. $4.00, 100 lbs. $18.00, by express.

20.—KENTUCKY WONDER.—In this variety we offer not a new sort, but one of the oldest in cultivation. In spite of its age, it is still considered one of the most desirable for the home garden. No other bean can compare with the Kentucky Wonder in yield and quality. The pods are very long, often measuring twelve inches slender, flat and stringless. The seed is small, long, and of a brownish color. It is one of the earliest pole beans in cultivation, but its earliness does not injure its quality in any respect. For a heavy yielding, stringless snap, none of the newer sorts can approach this one.

Pkt. 10c, ½ lb. 25c, lb. 40c, 5 lbs. $1.50, postpaid.
15 lbs. $4.00, 100 lbs. $18.00, by express.

23.—HORTICULTURAL POLE.—Also known as October bean. It is one of the best for shell beans. The pods are short, very thick, and crowded with large, almost round seed. Seed thick, almost round, and blotted with red and lighter shades.

Pkt. 10c, ½ lb. 25c, lb. 40c, 5 lbs. $1.50, postpaid.
15 lbs. $4.00, 100 lbs. $18.00, by express.

24.—NANCY DAVIS.—Or Striped Creaseback. This is one of the best running snaps that we list. Slightly later than Ky. Wonder, but bears excellent stringless snaps that are round and tender.

Pkt. 10c, ½ lb. 25c, lb. 40c, 5 lbs. $1.50, postpaid.
15 lbs. $4.00, 100 lbs. $19.90, by express.

26.—GOLDEN CLUSTER WAX.—For those who like a wax snap nothing better can be had. It is a very large tender snap growing much like the Ky. Wonder. The pods are large, flat and of a clear wax color. One of the most productive of the wax beans.

Pkt. 10c, ½ lb. 25c, lb. 40c, 5 lbs. $1.50, postpaid.
**Lima Beans**

Lima or Butter beans form a most important part of the summer diet. The delicious beans are to be had from June until frost and the dry beans may be stored for winter. Few garden crops last so long as the Lima Bean and for this reason, it is well adapted to the small gardens. All Lima Beans are sensitive to cold and should not be planted until warm weather comes. Plant in rows thirty to thirty-six inches apart covering the seed two inches deep. Thin to fifteen inches apart in the row. Cultivation should be given frequently and thoroughly, because grass and weeds make inferior beans. The running or pole limas may be grown along fence lines or allowed to run on corn, sunflowers, or poles.

39—**BURPEE'S IMPROVED BUSH.**—This is a great improvement over the old Burpee's Bush. It has the same large bean as the old variety but is thicker and more mealy. It is a little earlier, makes better growth of vine, and is more productive. It has taken an important place among the large limas and will be found a decided improvement over most of this class. When green the beans are the largest of any bush variety and have a delightful mealy flavor.

Pkt. 10c, ½ lb. 25c, lb. 40c, 5 lbs. $1.70, postpaid. 15 lbs. $4.25, 100 lbs. $24.00, by express.

32—**WILSON BUSH.**—A new variety of the large type which shows great improvements over anything previously known. The beans are very large and possess that mealy flavor of all big limas. The vines are vigorous and the most productive of any. Pods very large, long, and well filled with the fine beans. It is the best yielding big Lima and the earliest. We believe that our customers will be highly pleased with this introduction.

Pkt. 10c, ½ lb. 25c, lb. 40c, 5 lbs. $1.75, postpaid. 15 lbs. $4.50, 100 lbs. $26.00, by express.

30—**PROLIFIC BUSH.**—One of the best of the small early limas. This and the Sieva Pole are often called butter beans on account of their rich flavor. Vines grow from 12 to 18 inches tall and bear from mid-summer until frost. Pods of medium size, clean, and well filled with small beans. Seed small and pure white.

Pkt. 10c, ½ lb. 25c, lb. 40c, 5 lbs. $1.60, postpaid. 15 lbs. $4.00, 100 lbs. $22.00, by express.

31—**FORDHOOK BUSH.**—This is a large potato lima which has become very popular in the south. It is an excellent sort for either home or market. The pods are rather long and filled with enormous thick mealy beans. It produces well and is in great demand on northern markets.

Pkt. 10c, ½ lb. 25c, lb. 45c, 5 lbs. $2.00, postpaid. 15 lbs. $5.25, 100 lbs. $27.00, by express.

34—**SIEVA or CAROLINA POLE.**—The popular and prolific butterbean in a pole variety. This will yield longer than any lima known to us and one planting will last the entire summer. Beans small and produced in great abundance.

Pkt. 10c, ½ lb. 25c, lb. 40c, 5 lbs. $1.75, postpaid. 15 lbs. $4.00, 100 lbs. $22.00, by express.

35—**EARLY LEVIATHAN POLE.**—The earliest of the large pole limas and one of the most productive. For market or home growers it will be a most profitable sort for the first planting. Seed very large and flat. Vines vigorous and produce for a much longer period than the bush sorts. The pods are unusually long and well filled with the giant beans.

Pkt. 10c, ½ lb. 25c, lb. 40c, 5 lbs. $1.60, postpaid. 15 lbs. $4.25, 100 lbs. $24.00, by express.

36—**CHALLENGER POLE.**—A most desirable bean for either home or market. It is similar to the Fordhook bush and one of the thick potato limas. It is more productive than the Fordhook.

Pkt. 10c, ½ lb. 25c, lb. 40c, 5 lbs. $1.75, postpaid. 15 lbs. $4.40, 100 lbs. $25.00, by express.
Table Beets

The beet is a hardy vegetable and can be planted just as soon as heavy frosts are over. Or the seed may be started in the cold frame about four weeks before the plants are to be set out. Sow in shallow drills two feet apart and cover seed about one inch deep. Later thin plants to four inches apart and give frequent shallow cultivation. For the fall garden sow Extra Early Red Ball, Improved Early Blood Turnip, or Crosby's Egyptian in June. In the South, these roots may be left in the open ground all winter and lifted as needed. In the North, they should have some protection or be stored in a root cellar.

104—EXTRA EARLY EGYPTIAN BLOOD TURNIP.—This variety is especially adapted to forcing or for early garden use. It has a small top, a deep red root, smooth, and grows to a normal size of about three inches in diameter. The roots are slightly flattened on top and bottom and have a deep red flesh with lighter shades.

Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. 80c, postpaid. 10 lbs. $6.00 by express.

111—WANZLEBEN SUGAR.—This is a standard sugar variety and may be grown for its sugar or for stock feeding. The high sugar content makes it excellent feed for stock. Roots of medium size, long, with broad shoulder, tapering to pointed root.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.

103—SLATE’S EXTRA EARLY RED BALL.—In our trials we have found this to be the earliest of all beets, maturing edible roots some two weeks ahead of the Extra Early Egyptian. When young it is of medium size, but if left in the ground will grow until it measures six inches or more in diameter. The roots are smooth, have a deep red skin, is turnip shape, with deep red flesh of excellent quality. Particular gardeners will find their every requirement in this new introduction.

Pkt. 10c, oz. 20c, ¼ lb. 60c, lb. $1.50 postpaid. 10 lbs. $10.00 by express.

107—DETOUR DARK RED.—Many growers use this for a forcing and early garden beet. It is not quite so early as the Extra Early Red Ball, but in all other respects is a good sort. Tops short and erect, being colored with red. Roots of medium size, globe shape, deep red smooth skin, and flesh of bright red and excellent quality.

Pkt. 5c, oz. 10c, ¼ lb. 35c, lb. $1.00, postpaid. 10 lbs. $7.50, by express.

109—CROSBY’S EGYPTIAN.—One of the best main crop beets and is used more than any other sort for fall planting. It matures just a little later than the Extra Early Red Ball, is of turnip shape, with deep red skin, and crisp tender flesh of a deep crimson color. Makes one of the best sorts for storing for winter.

Pkt. 5c, oz. 10c, ¼ lb. 35c, lb. $1.00, postpaid. 10 lbs. $7.50, by express.

110—LONG SMOOTH BLOOD.—For those who prefer a long beet, nothing better can be had. This one is noted for its smooth skin, freedom from side roots, and bright red flesh which is considered by some to be far superior to that of the globe shape varieties. Excellent for pickles.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.
Cauliflower

This vegetable belongs to the cabbage family and may be grown in practically the same manner. It is more sensitive to cold and dry weather, however, and should be set not quite so early in the spring and in a moist cool situation. Tie up heads when they form so that light will be excluded and they will blanch.

150.—**EARLY SNOWBALL.**—One of the earliest and easiest varieties to grow. Can be used for both early and late planting. And will mature solid heads of medium size that blanch easily.

Pkt. 25c, oz. $1.50, ¼ lb. $5.00 postpaid.

Broccoli

120.—**SAINT VALENTINE.**—The Broccoli is a winter cauliflower and when grown in cool weather will make a much better yield than cauliflower. Cultivate like cauliflower and it will make a good yield of small heads suitable for cooking or pickling.

Pkt. 20c, oz. $1.40, ¼ lb. $4.50 postpaid.

Swiss Chard

112.—**LUCULLUS SWISS CHARD.**—This is one of the finest of vegetables. The large ribs are cooked and served like asparagus tips, while the other portions of the leaf makes excellent greens. It will remain in the garden through most of the winter and prove a valuable addition.

Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. 90c postpaid.

Stock Beets

Stock Beets or Mangels should be grown on every farm where cattle are raised. They make the best of feed for cows and yield an enormous tonnage per acre. The soil should be very rich and well prepared. Open shallow rows two to three feet apart and drill the seed. Cover one inch and thin plants to stand eight inches apart. Give frequent cultivations with light harrow. Seed may be put in at any time between March 1 and June 15 at the rate of 5 lbs. per acre.

113.—**MAMMOTH LONG RED.**—A long red variety that grows to enormous size. Will yield a big crop of the best feed.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 55c, 5 lbs. $2.25, postpaid. 10 lbs. $4.00 by express.

114.—**GOLDEN TANKARD.**—Grows to enormous size and makes excellent feed. Roots very large and of golden yellow color. Is of the half long type and does not grow down so far into the ground.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 55c, 5 lbs. $2.25, postpaid. 10 lbs. $4.00 by express.

Dear Sirs:

I have used your seed for a number of years and like them better than any I can get. I bought all of my garden seed from you this year and have had wonderful success. I will continue to use your seed as I think I have found the most reliable house I ever dealt with and so prompt in filling orders.

Respectfully, Mrs. J. W. Inge.
Kenbridge, Va., Aug. 10, 1925.

Columbia Celery

Celery

This vegetable should have a place in every garden, because it uses space only after the early things are harvested and yields its crop at a time of the year when green vegetables are greatly needed. Sow seed during the late spring in a well-prepared bed where they can be watered if necessary. During mid-summer transplant to the field, setting plants in rows three feet apart and six to eight inches apart in the row. Give frequent shallow cultivation and do everything possible to keep them growing. Rapid growth tends to make crisp, tender celery. Work the soil up about the plants but do not allow it to get into the bud. In the late fall, bank with leaves, straw, and soil or store in a root cellar.

152.—**GOLDEN SELF-BLANCHING.**—Perhaps the most popular of all celeriac owing to its earliness and ease of blanching. We handle only American grown seed. The French stock being so doubtful as to germination. Grows to medium size, is very tender, and has a yellow shade, but almost white.

Pkt. 5c, oz. 50c, ¼ lb. $1.50, lb. $5.40 postpaid.

153.—**COLUMBIA.**—This variety is especially adapted to the home garden and for local markets. It grows to medium size but branches and makes a very heavy, solid bunch. Stalks are tender, of fine flavor, and have the yellow shade seen in the self-blanching. Very early.

Pkt. 5c, oz. 50c, ¼ lb. $1.35, lb. $4.75 postpaid.

154.—**IMPROVED WHITE PLUME.**—A fine large variety, maturing a little later than the Self-Blanching, but makes a big yield. Stalks tall, with solid large bunches, good flavor, and remarkably free from tough strings.

Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. $2.25 postpaid.

155.—**GIANT PASCAL.**—This is one of the largest and heaviest of celeriacs.

Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $1.75 postpaid.
**Cabbage**

Sow the seed during the late winter or early spring in well-prepared and fertilized beds. To prepare the field for transplanting, apply a fertilizer containing Nitrogen 4 per cent, Phosphoric Acid 7 per cent, and Potash 9 per cent, at the rate of from one to two thousand pounds per acre. This may be applied either broadcast or in the rows. Prepare rows 2½ to 3 feet apart and set the plants 18 to 24 inches apart in the row. Give frequent shallow cultivation, keeping the soil worked well up around the plants. An application of fertilizer will hasten the growth of the backland plants. For winter cabbage, sow the seed in June or July. For extra early spring use, sow the seed in September or October, and transplant in the early winter.

125—**EARLY JERSEY WAKEFIELD.**—The Jersey Wakefield is one of the earliest cabbages known and is suited to the needs of both the market and the home gardener. Our American grown stock has been used for years by market gardeners, and we do not believe that a better strain of Wakefield can be found.

Pkt. 5c, oz. 35c, ¼ lb. $1.00, lb. $3.50, postpaid. 10 lbs., by express, $30.00.

130—**SLATE’S EARLY DRUMHEAD.**—A large, heavy and productive cabbage. It makes the best yield of any of the early sorts. The heads are large, round, almost flat, and solid. It is not quite so early as the Charlestown Wakefield, but makes a much better yield and is a sure header.

Pkt. 5c, oz. 30c, ¼ lb. $1.00, lb. $3.50, postpaid. 10 lbs., by express, $22.50.

127—**COPENHAGEN MARKET.**—This is a new extra early variety which is fast taking the place of the Jersey Wakefield. It matures uniformly and produces large, round, solid heads. Under tests, we have planted this variety beside the Jersey Wakefield. The following spring we cut three average heads from each variety and weighed them. The Copenhagen Markets average from 1 to 1½ lbs. each heavier than the Jersey Wakefields.

Pkt. 5c, oz. 35c, ¼ lb. $1.00, lb. $3.50, postpaid. 10 lbs., by express, $30.00.

126—**LARGE or CHARLESTON WAKEFIELD.**—This is a larger but a later variety of the Wakefield strain. It produces heads similar in shape to the Jersey Wakefield, but much larger, and it is about ten days later. The leaves are thick, and it will stand more cold weather than any other cabbage.

Pkt. 5c, oz. 35c, ¼ lb. $1.00, lb. $3.50, postpaid. 10 lbs., by express, $30.00.

128—**EARLY SUMMER.**—A second early cabbage that produces just a week or two later than the Early Jersey Wakefield but makes a head that averages about three times as heavy as that of the Early Wakefield. The heads are large, round, and slightly flattened. This makes an ideal second early variety for either home or market grower.

Pkt. 5c, oz. 30c, ¼ lb. 75c, lb. $3.00, postpaid. 10 lbs., by express, $25.00.

129—**ALL SEASON.**—A good variety for early, main crop, or late use. Heads very hard, heavy, and flat.

Pkt. 5c, oz. 30c, ¼ lb. 75c, lb. $2.75, postpaid. 10 lbs., by express, $22.50.

133—**SLATE’S ALL HEAD EARLY.**—A large early cabbage that is a sure header and makes large solid, heavy heads that are flat. A good reliable sort for both home and market growers.

Pkt. 5c, oz. 30c, ¼ lb. 75c, lb. $2.75, postpaid. 10 lbs., by express, $22.50.

131—**EARLY FLAT DUTCH.**—This is one of the most profitable kinds for the market grower. Its good qualities and handsome appearance make it a good seller, while its ability to stand shipping and its enormous yield make it a favorite with the market growers. The heads are large, round, flat, solid and heavy.

Pkt. 5c, oz. 30c, ¼ lb. 75c, lb. $2.75, postpaid. 10 lbs., by express, $22.50.

132—**WISCONSIN ALL SEASON.**—This is a strain of All Season cabbage that has been bred by the Wisconsin Experiment Station to resist the blight or yellows. It is undoubtedly one of the best varieties for soils affected with yellows. Commercial growers will find this one of the safest sorts and home gardeners who have been making failures on account of “yellows” should plant nothing else. It is a large, solid, flat head.

Pkt. 10c, oz. 50c, ¼ lb. $1.75, lb. $4.50, post paid. 10 lbs. $10.00, by express.
139—SHORT STEM DANISH BALL HEAD.—This is the best winter cabbage obtainable. Stems very short; heads medium size, but very hard, heavy, crisp and tender. Best keeper and the most popular for winter. 

Pkt. 5c, oz. 35c, ¼ lb. $1.00, lb. $3.25, postpaid. 10 lbs., by express, $27.50.

140—MAMMOTH RED.—This makes a most desirable variety for pickling, and it is extensively grown for market in some sections. The heads are large, round, solid, and of a deep red color.

Pkt. 5c, oz. 40c, ¼ lb. $1.50, lb. $4.00 postpaid. 10 lbs. by express $30.00.

136—SLATE'S LATE DRUMHEAD.—This is a large heavy, late variety which is very hardy and will withstand the cold and frost of late fall. The heads are large, round, heavy and somewhat flattened on top. It is a good keeper and very desirable in every respect for the late garden.

Pkt. 5c, oz. 30c, ¼ lb. 75c, lb. $2.75, postpaid. 10 lbs., by express, $22.50.

134—BURPEE'S SUREHEAD.—This is an old standby which has been a general favorite for almost half a century. It produces large, round, slightly flattened heads which often weigh from 15 to 20 pounds.

Pkt. 5c, oz. 30c, ¼ lb. 75c, lb. $2.75, postpaid. 10 lbs., by express, $22.50.

137—LATE FLAT DUTCH.—This is an ideal kind for late shipping. The heads are large, round, thick and flat. Its yield is even better than the Early Flat Dutch.

Pkt. 5c, oz. 30c, ¼ lb. 75c, lb. $2.75, postpaid. 10 lbs., by express, $22.50.

138—PERFECTION DRUMHEAD SAVOY.—The vitamin content of this cabbage is greater than that of any other variety and for this reason it is highly desirable. The heads are large, solid, and heavy, made up of thick crumpled leaves. The inner leaves blanch and are very tender. Eat Savoy cabbage for health, because they lead the vegetable list in vitamins.

Pkt. 5c, oz. 35c, ¼ lb. $1.00, lb. $3.00, postpaid.

135—SUCCESSION.—This is one of the best main crop or second early cabbage to be had. It is a large, solid, flat head variety that matures a little later than the Charleston Wakefield but makes an enormous yield. It can be grown in the winter like the Wakefield and its yield makes it an especially good sort for market. It is said to be one of the surest headers and produces better under adverse conditions than any other sort.

Pkt. 5c, oz. 35c, ¼ lb. $1.00, lb. $3.00, postpaid. 10 lbs. $25.00, by express.

141—PETSAL KINSHUI.—This is a most desirable variety of the Chinese Cabbage. Heads very large, compact, and blanch easily. Plant and cultivate like cabbage, but tie up heads to blanch. Can be cooked or eaten green in place of lettuce.

Pkt. 5c, oz. 30c, ¼ lb. 75c, lb. $2.50, postpaid. 10 lbs., by express, $22.50.

Brussels Sprouts

Sow seed during June or July in well-prepared bed and transplant as soon as large enough. Set in rows three feet apart and eighteen inches apart in the row. Cultivate like cabbage and it will give a good crop of delicious sprouts in the fall and winter.

121—DWARF IMPROVED or LONG ISLAND.—This is the surest cropper known and produces a compact mass of tender sprouts of choice quality. These are far better than cabbage.

Pkt. 5c, oz. 30c, ¼ lb. $1.00, lb. $3.00 postpaid.

Celeriac

151—GIANT PRAGUE CELERIA.—The turnip rooted celeriac is quite valuable for cooking and keeps better than others. Sow seed and handle like celery except it is not necessary to bank. Store in root cellar or leave in open and use as needed after roots attain two inches or more in diameter.

Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $1.80 postpaid.
Carrots

Sow in a rich, sandy loam which has been well mured the previous year. The soil should be thoroughly pulverized before seeding, because the seed are very small, and there is danger of covering them too deep. Sow in drills 24 in. apart at the rate of one ounce to every 100 feet of row. After the plants attain some size, thin them to 6 or 8 inches apart and give frequent shallow cultivation. The time for seeding extends from early spring to the middle of the summer.

145—**DANVERS HALF LONG.**—The roots are smooth, 8 to 10 inches long, and of a deep orange color. The flesh is fine grained, sweet and of the very best quality. This is an excellent variety either for the home garden or for the market.

Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. $1.00 postpaid. 10 lbs. by express $8.00.

148—**EARLY SCARLET HORN.**—One of the best carrots for extra early use or for forcing. It is the earliest in cultivation and makes small growth of tops, medium size root which is rather long, and of a reddish yellow color.

Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. $1.00 postpaid. 10 lbs. by express $8.00.

146—**CHANTENAY.**—Suited to either garden or field culture. It makes a good yield and is often used for stock feed. It has a medium sized top, small neck, stump root, and a broad thick shoulder. The roots are of an orange color, and the flesh is of good quality.

Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. $1.00 postpaid. 10 lbs. by express $8.00.

147—**IMPROVED LONG ORANGE.**—This is one of the most popular sorts for table use; therefore it is especially recommended to home gardeners. The roots are long, smooth and tapering. The flesh is very tender and crisp and of a beautiful orange color.

Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. $1.00 postpaid. 10 lbs. by express $8.00.

Cress

159—**FINE CURLED UPLAND.**—A most desirable and easy grown garnish. Leaves nicely curled and cut and have a pleasing pungent taste. Sow in a corner of the garden during the spring or early summer.

Pkt. 5c, oz. 10c, ¼ lb. 30c postpaid.

Collards

Collards may be sowed in the open ground at almost any time of spring or summer. Sow in drills from 12 to 24 inches apart and cover about one inch deep. Later thin plants to six or eight inches apart in the row.

156—**TRUE GEORGIA.**—The old reliable of the collards. It grows very large and produces excellent greens. As the leaves are pulled others take their places.

Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. 75c, postpaid. 10 lbs., by express, $6.00.

157—**NORTH CAROLINA SHORT STEM.**—The stems are very short; the leaves are large and spreading, the plants are very hardy and able to withstand both drought and cold. Often called Cabbage Collard.

Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. 85c, postpaid. 10 lbs. by express, $7.50.

Corn Salad

158—**LARGE ROUND LEAVED.**—A quick growing substitute for lettuce. Seed should be sowed very early in the spring in light, rich soil. Or it may be seeded during the fall and covered with straw or leaves and used during the winter.

Pkt. 5c, oz. 15c, ¼ lb. 45c postpaid.
Garden Corn

Good corn can be grown by anyone who has good rich land, well manured, carefully prepared, and who cultivates his crop frequently. Prepare rows three feet apart and drop two or three kernels every twelve inches. Later thin to two feet apart in the row. Early and late plantings should be thicker than main crop, because at these seasons it is harder to get the seed to germinate properly. For the early plantings, the dent varieties are best, because they will stand more cold, wet weather than the sugar corns. For main crop, however, there is nothing better than sugar corn. To have good tender corn on the table all summer, continue to make small plantings every two weeks from early spring until two months before frost is due in the fall.

DENT VARIETIES

47—BLANDS EXTRA EARLY.—Said by many growers to be the very earliest corn in cultivation. It makes a small stalk and medium size ear but comes in about two weeks ahead of most early corns and proves most welcome for the first and last plantings of the season.

Pkt. 10c, lb. 30c, 5 lbs. $1.15, postpaid. 15 lbs. $1.85, 100 lbs. $12.00, by express.

40—ADAMS EXTRA EARLY.—A popular variety for the early planting that is noted for its hardy nature. It will withstand both cold and wet to a remarkable degree and produce a good crop of medium sized ears. Practically as early as Blands.

Pkt. 10c, lb. 30c, 5 lbs. $1.10, postpaid. 15 lbs. $1.85, 100 lbs. $12.00, by express.

41—ADAMS EARLY.—A very early, but exceptionally large strain of the Adams corn and we believe it to be the best for early plantings. This variety comes just about a week later than the Adams Extra Early, but makes a very large ear. It is a dent variety, but produces a corn of tender, delicious quality. For both market and home growers it is a valuable variety and should be planted liberally for early use. Stalks grow about six to eight feet tall and bear from one to three large ears. Matures in about 65 days.

Pkt. 10c, lb. 30c, 5 lbs. $1.10, postpaid. 15 lbs. $1.85, 100 lbs. $12.00, by express.

42—TRUCKERS FAVORITE.—The most popular of all the dent corns. It makes a good tall stalk with large ear and matures about one week later than the Adams Early. It makes a most desirable field corn for late planting or for market. Its yield is as good as the average field corn and it matures in about eighty days.

Pkt. 10c, lb. 30c, 5 lbs. $1.10, postpaid. 15 lbs. $1.85, 100 lbs. $12.00, by express.

43—SNOWFLAKE.—An early field corn that is much used for gardens. It grows larger than even the Truckers Favorite and makes better ears. About ten days later than Truckers Favorite in maturing.

Pkt. 10c, lb. 30c, 5 lbs. $1.10, postpaid. 15 lbs. $1.60, 100 lbs. $8.00, by express.

SUGAR VARIETIES

49—HOWLING MOB.—This is the earliest of the large sugar corns and deserves its wide popularity. By planting Golden Giant, Howling Mob, Stowells Evergreen and Country Gentleman all at one time a succession of sugar corn can be had over a long period. These mature in the order named and all of them are the finest of table varieties. Howling Mob grows a stalk of medium size but is very prolific. The ears are large and filled with pretty white grains. Market growers will find this a most profitable sort.

Pkt. 10c, lb. 35c, 5 lbs. $1.25, postpaid. 15 lbs. $2.75, 100 lbs. $16.00, by express.

I am pleased to recommend your seed. I have used them for a number of years and the results have always been satisfactory. I have used your farm, garden, flower, and tobacco seed. My lawn, sowed with your seed, is most beautiful. Words cannot express how grateful I am for Slate’s information on garden work and I cannot recommend you too highly for good seed and promptness.

Mrs. J. A. Belcher.
**Good tender sweet corn comes only from your own garden**

**50—DE LUES GOLDEN GIANT.—**This new variety is so far superior to the old Golden Bantam that we have discontinued the old sort. This sort has all of the good points of the Bantam and is much larger and better corn. The stalks are of medium size and very prolific. The ears are much larger but retain the fine flavor of the Golden Bantam and have the same small cob and large golden grains. It is a little earlier than Adams early and the earliest sugar corn we know which makes it valuable to both home and market growers.

Pkt. 10c, lb. 35c, 5 lbs. $1.50, postpaid. 15 lbs. $3.00, 100 lbs. $17.00, by express.

**48—BLACK MEXICAN.—**A second early sort making a good stalk and large ears. When green the corn is not black but of a dark color. This sort has a following and people who use it one year demand it again so we are confident that it has merits worthy of a trial.

Pkt. 10c, lb. 35c, 5 lbs. $1.25, postpaid. 15 lbs. $2.75, 100 lbs. $16.00, by express.

**45—COUNTRY GENTLEMAN.—**One of the most popular main crop sweet corns in cultivation. Stalks grow tall and bear several large ears of from eight to ten inches, which are irregularly crowded with pearly white grains. The grains are very small and long. Cob small. The only objection to it is in the fact that the seed being so narrow and wrinkled makes it hard to germinate as good as other corns. Therefore, when planting it, use more seed.

Pkt. 10c, lb. 35c, 5 lbs. $1.25, postpaid. 15 lbs. $2.75, 100 lbs. $16.00, by express.

**46—STOWELL'S EVERGREEN.—**We have never seen any sweet corn that possessed the robust stalk, large ear, and good quality corn that this one does. It is not early but makes an excellent sort for main crop and late use and is the best of all for canning. It will remain longer in the edible stage than any other. The stalks are as tall and robust as those of field varieties with large leafy fodder and bearing several ears each. The ears are the largest of any of the sweet corns, with long rows of large white kernels set straight upon the cob.

Pkt. 10c, lb. 35c, 5 lbs. $1.25, postpaid. 15 lbs. $2.75, 100 lbs. $15.00, by express.

**POP CORN**

**51—SLATE'S WHITE RICE.—**This is an ideal kind for popping or for growing for poultry feed. It is very prolific, bearing a number of ears to each small stalk. Ears are of medium size and well filled with pearly white grains, which are pointed. An ideal sort for the kids to grow and store for winter.

Pkt. 10c, lb. 25c, 5 lbs. 95c postpaid. 15 lbs. $1.85 by express.

**52—GOLDEN QUEEN.—**Similar in all respects to the above sort except that its grains are of a beautiful golden yellow color. Some prefer the golden color. It is pure white when popped.

Pkt. 10c, lb. 25c, 5 lbs. 95c postpaid. 15 lbs. $1.85 by express.

**Dandelion**

**176—AMERICAN IMPROVED.—**An improved sort that has large thick leaves of the best quality. The dandelion has a peculiar taste that is greatly liked by many people.

Pkt. 5c, oz. 50c, ¼ lb. $1.50 postpaid.
Cucumbers

The soil selected for Cucumbers should be a light sand or sand loam. Barnyard litter makes the best fertilizer. Prepare large hills about six feet apart each way, and plant from eight to ten seed in each hill. After the plants get beyond danger from insects, thin to four plants per hill and give shallow cultivation until the vines begin to run. The time for seeding extends from just after the last frost in spring until August. Cucumbers are very susceptible to insect attacks and should be sprayed as soon as the bugs appear and as often as they are found. See spray section of this book for material and instructions.

166—SLATE'S EARLY FORTUNE.—We consider this the best and most popular market cucumber grown. It is one of the earliest to produce, very productive, and the fruit is far above that of any other variety in both quality and appearance. The vines are hardy and resist disease to a remarkable extent. The fruit is regular in size, matures uniformly, rather long and of a deep green color, which it holds for days after being pulled. In quantity, quality, appearance and market value this cucumber cannot be equaled.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.

167—EARLY CLUSTER.—An early, small and very prolific variety. It is an excellent kind for the home garden. The vines are extremely hardy and produce their fruit in clusters of two or three. The fruit is small and of a much better quality than the larger ones. They make excellent pickles or the tenderest when sliced.

Pkt. 5c, oz. 15c, ¼ lb. 35c, lb. $1.00, postpaid. 10 lbs. $9.00, by express.

168—DAVIS PERFECT.—This cucumber is old and reliable. It seems to hold friends among both the home and market gardeners. It is noted for the perfect fruit it produces. The fruit is long, rather slender, of a beautiful deep green color, and has few seeds.

Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. $1.50, postpaid. 10 lbs. $12.50, by express.

169—KLONDIKE.—This is a popular early variety of the White Spine type, which many growers prefer to any of the other sorts. The vines are hardy and productive. The fruit is about eight inches long, of a dark green color even at the tip; stands shipping almost as well as Early Fortune, and is uniform in size and growth. In all respects it is a good shipping cucumber.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.

170—FORDHOOK FAMOUS.—Where a large smooth cucumber is wanted for home use, nothing better can be found than this sort. It is rather early maturing a little after our White Spine but produces a big crop of large, light green fruit. The fruit is of medium length, large, smooth, dark green at stem shading to almost white tip with crisp, tender flesh. For slicing nothing better can be found and it is also valuable for cutting up for pickles.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.

172—IMPROVED LONG GREEN.—This is an old sort but still the most popular cucumber in cultivation. It makes an ideal sort for cutting up for pickles or for slicing and no other variety offers the big yield of enormous fruit that this does. The fruit is from ten to fifteen inches long, has a deep green color, and crisp tender flesh. It is rather late in maturing but its yield and fine fruit readily offset this disadvantage. Every home gardener should make at least one planting of this grand variety.

Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. $1.50, postpaid. 10 lbs. $12.50 by express.
Egg Plant

Sow the seed in hot bed as soon as warm weather comes, but do not be in too great a hurry. They require warm weather to germinate properly. As soon as large enough transplant to a cold frame or directly to the garden. Rows should be three feet apart and plants should be set from two to three feet apart in the row. Cultivate frequently and work the soil up around the stems. If insects begin to eat them, apply Bug Death.

178—NEW YORK IMPROVED SPINELESS.—Plants of low spreading growth and entirely spineless. Fruit is large, smooth, and of a deep purple color. A good sort for either home or market growers.
Pkt. 10c, oz. 50c, ¼ lb. $1.50, lb. $4.50, postpaid.

179—BLACK BEAUTY.—A popular variety of vigorous growth that holds its fruit well off the ground. Fruit large, smooth, of excellent quality, and a purplish black color.
Pkt. 10c, oz. 50c, ¼ lb. $1.50, lb. $5.00, postpaid.

Kale

A hardy vegetable of very simple culture yet it supplies the table with some of the very best greens and at a time when other things are scarce. Sow in beds or shallow rows eighteen inches apart. Seeding may be done in early spring or fall and the greens will be ready for use in a few weeks.

188—DWARF CURLED SCOTCH or NORFOLK.—A dwarf spreading plant growing about eighteen inches tall with very long spreading leaves. Leaves curled and crimped and have a delicious flavor.
Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. $1.25, postpaid. 10 lbs, $7.50, by express.

189—DWARF CURLED SIBERIAN.—Another dwarf plant of hardy habits. It has long spreading leaves that make the best of tender greens. Will stand more cold weather than any other variety.
Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. $1.25, postpaid. 10 lbs $7.50, by express.

Cucumbers—Cont’d

171—CHICAGO PICKLING.—A standard late variety which combines all the qualities which go to make up an ideal pickling cucumber. The vines are hardy and very productive. The fruit runs from small to medium size, and can often be pickled whole.
Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.

173—JAPANESE CLIMBING.—A most novel and useful variety combined. It makes a strong vigorous vine that climbs readily on trellis or wire. Yields a good crop of very long, smooth fruit which is netted similar to a cantaloupe when ripe. Fruit is of excellent flavor and good for slicing or for cutting for pickles.
Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. $1.45 postpaid.

174—WEST INDIA GHERKIN.—A small fruited prickly variety used for pickling whole. Its fruit is never over two or three inches long and is covered with spines.
Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. $1.45 postpaid.

Kohl Rabi

This makes a most delicious dish for early spring or late fall use. It makes bulbs or roots similar to a turnip but of better flavor. Sow seed in shallow rows and thin to four inches apart in the row. Will mature in about six weeks from planting.

190—EARLY WHITE VIENNA.—Bulbs of medium size with thin green skin. Flesh pure white and very tender.
Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. $2.25, postpaid.

Endive

177—BROAD LEAVED.—The heads are large and the leaves are very broad and thick with white midribs. Excellent for soups, salads, or garnishing.
Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. $1.50 postpaid.
Lettuce

The heading varieties should be started very early in the spring in a hot bed or cold frame. When plants are about three inches high, transplant to well-prepared rows in the garden, setting them ten inches apart in the row. The loose or curled varieties may be seeded in shallow rows or in cold frame and used from there. In order to have crisp, tender lettuce, it is essential that the plant be kept growing as fast as possible. Any check in the growth tends to make it tough.

198—ICEBERG.—This variety makes the largest heads of any and is considered the best general purpose lettuce to be had. It was introduced some years ago and has become so popular that it commands a premium on all markets. For both home and market growers there is nothing better. The heads are very solid and made up of perfectly blanched leaves of the very tenderest quality. It stands both cold and hot weather unusually well, and we highly recommend it for both early and late sowing.

Pkt. 10c, oz. 25c, ¼ lb. 75c, lb. $2.50, postpaid.

199—BIG BOSTON.—One of the earliest and best of head lettuce. The leaves are large and form a compact head which blanches perfectly.

Pkt. 5c, oz. 20c, ¼ lb. 50c, lb. $1.50, postpaid. 10 lbs. $12.50, by express.

197—WAY AHEAD.—A very fine early variety making large heads which are formed by large tender leaves being closely folded together. Blanches to a rich yellowish shade and makes one of the best varieties for forcing.

Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. $1.50, postpaid. 10 lbs. $12.50, by express.

199—NEW YORK IMPROVED or LOS ANGELES.—One of the largest of the heading sorts and much used by market growers. The heads are very large, compact, and formed by large leaves which are frilled about the edges. Blanches easily and makes a good sort for the home garden.

Pkt. 10c, oz. 25c, ¼ lb. 75c, lb. $2.50, postpaid.

Loose or Curled Varieties

201—PRIZE HEAD EARLY.—Leaves are large, crumpled and curled and of a bright green color tinged with red at the edges. It is very early and its unusual colorings makes it a most desirable sort for garnishing.

Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. $1.50, postpaid.

202—EARLY CURLLED SIMPSON.—An early sort making large curled leaves of a beautiful light green color. It is very tender and in all respects a most desirable variety.

Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. $1.50 postpaid.

Gourds

185—NEST EGG.—A small gourd about the size of an egg and make good nest eggs may be used in darning.

Pkt. 5c, oz. 15c, ¼ lb. 45c postpaid.

186—SUGAR TROUGH.—Makes many useful containers or decorations. Shell is very hard but thin and light and can be carved into many shapes.

Pkt. 5c, oz. 15c, ¼ lb. 45c postpaid.

187—DISH CLOTH.—The fibrous interior of this kind makes good sponges or similar material for washing.

Pkt. 5c, oz. 15c, ¼ lb. 45c postpaid.

Leek

191—AMERICAN FLAG.—This is one of the largest and best of the leek family. Tops are beautifully curled. Roots thick, mild and sweet.

Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $2.00, postpaid.

We have bought seed of you for several years and all have given good results. I don’t think I ever saw seed come up better and I can’t possibly say too much for your Extra Early Perfection tomato. In 1923, I planted about 130 hills of them and canned 52 half gallon jars and had all that a family of ten could eat besides. Then we gave some to the neighbors and sold some. And at frost, there was an abundance of green ones which we gathered and put away to ripen. There is no better keeper besides its good table qualities. It is as early as any we ever planted, has the most uniform size of any, and the vines are not subject to disease. And we did not stake them either.

March 20, 1923.

J. H. Holder,
Watermelons

Tom Watson Watermelon

around the hills. One ounce of seed plants about twenty-five hills; three to five pounds per acre. Insects will often destroy a perfect stand of watermelons almost overnight. These bugs attack the plant right at the ground and suck the sap until the plant dies. For some years we have experimented with insecticides and have finally found one that will kill these bugs and save the watermelons. It is a nicotine dust that should be applied late in the evening when the bugs are at work. Use a Fair or other make dust gun so as to throw the dust under the vines and on the bugs. Full details of how to keep the bugs off watermelon vines are given in the spray material section of this book. By all means look it up and have some of this material on hand when the melons are planted.

227—TOM WATSON.—This is the most popular for shipping and is used by many home gardeners. Its enormous size, handsome shape, luscious flavor and ability to stand shipping have made it immensely popular. It is both early and productive. Its rich, luscious flavor makes it an excellent eating melon. The flesh is deep red, crisp and very tender. It is far sweeter than the average shipping melons, and is so generally used that buyers recognize it and are willing to pay more for it than for most other sorts. It grows very large, oblong, and has a dark green color. The seed are dark.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.

234—IRISH GREY.—A new melon that has proved its merits. The Irish Grey combines the large size, productiveness and good shipping qualities of the Tom Watson with the excellent quality flesh and sweetness of the Kleckley Sweets. It is a melon that will appeal alike to home growers and those who grow melons for shipping. The color is a light greenish grey. The flesh is very crisp, free from strings, and surpassingly sweet. If you want something different and better in watermelons try Irish Grey.

Pkt. 5c, oz. 10c, ¼ lb. 35c, lb. $1.00 postpaid. 10 lbs. $7.50 by express.

225—HARRIS EARLIEST.—This is an extra early melon which does not compare with the later sorts in quality, but generally pays a handsome profit on the early market. We consider the quality fair, but its earliness makes it welcome either for home use or on the market. The fruit grows to a medium size, is oval, and striped with dark green and gray. The flesh is of a bright red color with black seed. It is one of the earliest varieties known, and we recommend it for early planting.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.

229.—FLORIDA FAVORITE.—The melons grow from medium size to large, long, and are of a dark green color, which is mottled and striped with lighter shades. The rind is thin but firm. The flesh is of a beautiful scarlet color, solid, tender and very sweet. The seed are white. It is second early, a good producer, and especially desirable for home use.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.
233— GEORGIA RAT-TLESNAKE or GYPSY.
—It belongs to the shipping type, having a rather thick rind, and has no equal for the late market. The melons are large and oblong. The skin is of a dark green color, mottled and striped with lighter shades. It is one of the best keeping melons known, and produces an enormous crop. The seed are white with black eyes. The flesh ranks with Tom Watson in eating qualities. For late melons, you cannot get a better one.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.

235—SWEETHEART.—An old favorite in the home garden and for shipping. The melons are large, oval, flattened at the ends and of a light green color veined with darker shades. Rind medium thin but strong. Flesh bright red, of good quality, and sweet. Seed black.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.

230—JACKSON.—The bright red flesh of this old variety is crisp and sweet, making it an ideal sort for the home garden or for local market. The melons are medium size to large, long, and of a bright green color. The flesh is bright red, firm and sweet ripening close to the rind which is rather thin. This is an old favorite of many particular growers which none of the newer sorts have been able to replace. It is a rather early variety, producing along with Florida Favorites and Kleckleys Sweets and the few seed present in the melons are white.

Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. $1.00, postpaid. 10 lbs. $7.50, by express.

228—KLECKLEY SWEETS.—Also known as Monte Cristo. This, in our opinion, is the very best home garden and local market variety to be had. The melons grow large, oblong, and have a dark green color. The rind is very thin. The flesh is a bright scarlet, crisp, and sweeter than that of any other variety. Contains but few seed and these are white. We highly recommend it to home growers.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.

Georgia Rattlesnake

232—LIGHT ICING.—Also known as Jordan's Gray Monarch. This is a large long melon with a mottled gray skin. It can be used for local market and makes an especially good sort for home use. Flesh bright red color and very sweet.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.

226—EXCELL.—The melons are large, of an oblong shape and have a dark green skin. In general appearance it strongly resembles the Tom Watson but some growers claim that it is both a sweeter and larger melon than the Watson. It has medium thick rind and will stand shipping or can be used for local markets. The flesh is of a beautiful red color, crisp and tender and just as sweet or sweeter than that of the Tom Watson. Its large size, handsome appearance and vigorous habits of growth have already made this one of the most popular varieties. This is a hybrid, however, containing both white and black seed and the type is not very well set as yet. As a rule the melons are all uniform and good but some off types may appear.

Pkt. 5c, oz. 10c, ¼ lb. 35c, lb. $1.00 postpaid. 10 lbs. $7.50 by express.

236—ALABAMA SWEET.—One of the most popular of watermelons in the South. It grows very large. Fruit is long and striped in light and dark green. Flesh sweet and bright red. Seed white. It makes a good market or shipping melon or a fine big melon for the home garden.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.

231—HALBERT HONEY.—In general appearance and quality of meat this is a close second of Kleckleys Sweets. It is very hard to tell the melons apart and about the only difference is found in the seed. Halbert Honey seed have a blackeye or dark eye which is not true of Kleckley Sweets. The melons grow large, are long and have a dark green skin. The meat is a bright red, crisp, and very sweet with white seed that have a dark eye. It ranks as one of the best sorts for home use and local market.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.
THREE WONDERFUL NEW MELONS

237—IMPROVED KLECKLEY SWEET.—This is a very decided improvement over the popular old sort of this name. This melon retains the general shape and color of the old variety, but grows much larger, more uniform in size, has creamy white seed, firmer meat, with stronger rind. We might say that all of the objectionable features in the old Kleckley Sweet have been removed in this improved strain. Those growers who have been using Kleckley Sweets for years, will welcome this better melon and find it to fully meet their demands for a home and local market variety. The larger size attained by this sort is another great feature, because the old strain has for some years produced many medium size melons.

Pkt. 10c, oz. 15c, ¼ lb. 40c, lb. $1.25, postpaid. 10 lbg. $10.00, by express.

238—THURMOND GREY.—This melon has a light greenish grey rind which is very firm and will stand shipping to long distances. The flesh is bright red, very firm, tender, sweet, and ripens close to the rind. The melons are large and long. For a shipping melon there are few equals to this sort and it will find a ready place in many home gardens on account of its excellent quality. We consider Thurmond Grey one of the leading melons to be introduced in the past few years and are sure that it will become very popular. When a large handsome melon of excellent quality is desired, for either home use, local market or shipping, this sort should be given a trial and a trial will convince any grower of its merits.

Pkt. 10c, oz. 15c, ¼ lb. 40c, lb. $1.25, postpaid. 10 lbs. $10.00, by express.

239—SLATE'S BIG BOSTON.—This is a melon of our own origination and we offer it as the leading new melon of the times. For size, appearance, and quality of meat it has no equal in cultivation. The vines are vigorous and produce many melons. The melons are very large, rather long, and thick. The rind is strong enough to make it a good shipping melon but thin enough to fill every requirement for a home melon. The flesh is bright red, crisp as a lettuce leaf, melts in the mouth and as sweet as honey. The outer markings are a dark green skin which is indistinctly striped with a slightly lighter shade, giving the general appearance of a black green melon. Seed stock of this grand melon is very limited at present and we can only offer it in limited quantities, but every grower should secure some of these for trial this year. Every melon grower takes a great deal of pride in producing the largest and finest melons and we believe that this kind will undoubtedly make more big melons than any other, so if you want to grow the largest and best watermelons in your community plant a few of this variety.

Large packet 25c, oz. 50c, ¼ lb. $1.50, postpaid.
Cantaloupes are very tender and should not be planted in the open ground until the weather becomes warm. However, early crops may be produced by starting the seed in flats, window boxes or paper pots and setting out each hill, and plant the seed six to ten in each hill, covering them one inch deep. After the first two or three leaves of the plant have taken on their shape, thin to three plants per hill. Give frequent shallow cultivation until the vines begin to spread over the hill, making further cultivation impossible. See Spray Material section of this book for a good insecticide to kill the bugs that destroy the cantaloupe vines every year. These insects cause great damage and can readily be controlled by dusting.

205—EXTRA EARLY HANOVER.—A popular green fleshed melon for early market or home use. It is among the first to mature and makes fruit of medium to large size, evenly ribbed, and covered with coarse netting. In shape it is round, but slightly flattened at the ends. Flesh of very good quality.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.

207—SLATE’S EARLY NETTED GEM.—This is a melon of the finest Rockyford strain which has been developed to meet our eastern conditions. We believe it to be better adapted to our soils and climate than the true Rockyford. Yet it retains the high flavor and excellent quality of the parent strain. It is an early and prolific sort and will do for either home, local market, or for shipping. The fruit is of medium size, almost round, and thickly netted. The flesh is thick, fine grained, green, and has that delicious spicy flavor.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.

206—EXTRA EARLY HACKENSACK.—This is an extra early variety of the popular Hackensack strain. The vines are vigorous and productive. The melons ripen very early and ahead of most other sorts. The fruit is of medium size, round, flattened at the ends, and covered with coarse netting. The flesh is green, of good quality and sweet. We recommend this for extra early melons.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25, postpaid. 10 lbs. $10.00 by express.

208—EXTRA EARLY JENNY LIND.—Also known as the Nutmeg, deriving its name from its rich flavor. This is one of the earliest melons known and good for either home use or for the early market. The fruit is small, round and slightly flattened at the ends. The flesh is dark green and very sweet.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.

209—EDEN GEM, or NETTED ROCK.—This is one of the finest melons known to me. For a shipping melon it cannot be surpassed, since it combines all of the good qualities which a shipper should have, such as size, shape, netting, freedom from prominent ribs, and firm, sweet flesh. The flesh is thick, firm and sweet, with a small seed cavity. It is noted for its uniformity in both size and ripening habit, and is a heavy yielder.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.

210—CHAMPION MARKET.—This is an ideal melon for the home market. It is rather large for shipping, but commands top market prices on local markets. The flesh is moderately thick, of a beautiful green color and a rich sweet flavor. It ranks among the most productive, and its handsome appearance makes it an easy seller.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid.
Nicotine Dust will keep the cantaloupe vines free from the sucking bugs.

212—HONEY DEW MELON.—This is one of the most delicious of all melons. It is practically new and few people have ever tried it. It is late in maturing and at least ninety days is required for its growth. Plant like cantaloupes and pull when the blossom end begins to get slightly soft. Can be stored and kept for a week or more before eating. The melons are large, rather long, and have a yellowish or creamy white smooth skin. The flesh is thick and has a rich sweet flavor such as you have never tasted in any other melon.

Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. $1.30 postpaid. 10 lbs. by express $10.00.

216—LARGE HACKENSACK.—Also known as Turks Cap. This is the largest of our cantaloupes and in every respect a good melon. Vines grow vigorous and are productive, bearing large, round melons that are slightly flat at the ends and covered with coarse netting. The flesh is thick, highly flavored and sweet. It is most too large for shipping but makes an ideal melon for local market and home use.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.

213—SLATE'S GOLD LINED NETTED ROCK.—The market gardener who wishes to secure the top market prices, and the home gardener who wishes the sweetest, the most solid and the most deliciously flavored melon, cannot do better than to get this one. It is a true Rocky Ford. It is free from deep ribs, has perfect netting and the ideal shape for shipping. It attains a good crating size and has all the requirements for a market melon. The flesh is green, with a thin golden lining next to the seed cavity. The thick, tender flesh is sweet and has a rich, luscious flavor. This melon is uniformly good and not like some varieties—good one season and tasteless the next. Of course, soil and weather conditions affect its quality, just as they do other sorts, but this one comes nearer to being always good than any cantaloupe we have ever seen. Its ripening habits are uniform. Practically every melon is of the same size.

Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. $1.35 postpaid. 10 lbs. $11.00 by express.

217—ACME or BALTIMORE MARKET.—Also known as the Anne Arundel. This is a large green flesh melon of the second early or main crop sort. The melons are rather large, inclined to be long or pointed at the ends, and covered with coarse netting. Flesh of excellent quality, thick and sweet. Vines are very productive and it is known as a sure cropper.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.

211—EXTRA EARLY KNIGHT.—This is an early cantaloupe of the shipping type, but it is generally found in the home garden. The melons are of a medium size, thickly netted and oval shape. The flesh is a rich green, thick and very sweet.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.

214—IDEAL ROCKY FORD.—Many people are such firm believers in the Rocky Ford Cantaloupes that they will have no other sort. For them I offer this, one of the best of its kind. It is a general purpose melon, good for home gardens, home market or for shipping. The flesh is firm, sweet, fine grained and of a beautiful green color. Its flavor is rich and spicy. It produces an enormous crop and in all respects is an excellent melon.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.
220.—FORDHOOK.—The fruit is rather large, round, with flattened ends and covered with coarse netting. The flesh is thick, sweet, of an orange-yellow color, and fine flavor. This melon has won great favor as a home garden variety and for local markets. It is noted for its small seed cavity and firm flesh. The vines are vigorous and productive.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.

219.—EMERALD GEM.—The earliest of all the muskmelons and in many respects a most desirable sort for the main crop. It has vigorous vines which produce a quantity of the melons. The fruit is of medium size, only slightly ribbed, and very thinly netted with an emerald green color which shows a yellow shade after ripening. The flesh is thick, very sweet, and highly flavored. Fruit slightly flattened at the ends and almost round. For early market and home use nothing more desirable can be found.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.

221.—HOODOO.—One of the most desirable of all the salmon flesh melons. It makes a vigorous growth of vine and resists blight to a remarkable degree, thus giving a good crop where many other sorts fail. It is equally well adapted to home and market gardens and makes one of the best shipping melons to be had. The fruit is of medium size, oval, closely covered with fine netting, with a firm thin rind. The flesh is thick, of salmon color, very firm and sweet. Its fine quality and hardy nature should appeal to every grower.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.

218.—MILLER'S CREAM or OSAGE.—A popular old favorite for the home garden and local market. Fruits are large, slightly ribbed, thinly netted, and of oval shape. The rind is thin but firm and of a deep green color. The flesh is thick, sweet, of a rich salmon color, and has the fine flavor of the muskmelon. It ranks as one of the largest of the muskmelons.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid.

222.—BANANA.—This is a long melon of novel appearance and a very good eating melon also. The fruit is very long, often measuring three feet in length, and very smooth yellow skin with practically no ribs. It resembles an enormous banana. The flesh is thin but of very good flavor, but nothing to compare with the other varieties in this respect.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid.

SALMON FLESH VARIETIES

223.—EDWARDS PERFECTO.—A new type of the salmon fleshed Rocky Ford which is destined to find great favor with both market and home growers. The melons are of medium size, heavily netted and have no ribs. The seed cavity is small and triangular. The flesh is very thick, sweet, tender and spicy. The commercial grower will find in this a melon that has uniform size, good quality, handsome appearance and every shipping requisite. The home grower will find it a medium size melon that is uniformly good, very sweet, and far more reliable than many of the larger sorts.

Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $1.75 postpaid. 10 lbs. $15.00 by express.

An abundance of fresh vegetables makes big, strong boys and beautiful little girls, and you can readily see that little Miss Edna Earl Kirby, of Selma, N. C., has not lacked for any of the beauty builders. Her mother, Mrs. P. H. Kirby, writes under date of August 25, 1925: "I ordered two pounds of Steva or Carolina pole butter beans, which cost me sixty cents. It is now August 25th, and I have already sold 15 pecks, at forty cents per peck, and have had all our family wanted to eat. And I expect to sell many more pecks between now and frost. I like Slate's Seeds best because I get more and better seed for the money than elsewhere. I also like your promptness."

Time generally puts friendship, seeds, and everything else to a severe test and it does us good to find one of those veteran gardeners whose experience covers this test of time. Mrs. J. S. Plunkett, of Appomattox, Va., says: "I have been gardening for thirty-eight years and for the past nineteen years I have used your seeds with the best of success."
### Onion Seed

Onions are very heavy feeders and require rich land. Use stable manure liberally and some commercial fertilizer containing a good portion of Potash. Prepare drills thirty inches apart and one inch deep. Sow seed thinly and cover with fine soil. Later thin plants to stand from four to six inches apart in the row. Cultivate frequently. Seed may be started in hot bed or cold frame if desired and seedlings transplanted when large enough to move. When doing this the tips of the foliage should be clipped off. Seeding may be done in the fall or very early in the spring. It is a hardy crop and cold weather will not injure it much.

245—**EXTRA EARLY WHITE PEARL.**—One of the earliest onions in cultivation and makes one of the best large, white, mild onions for spring, but will not keep well. It is the market growers most profitable sort.

Pkt. 10c, oz. 35c, ¼ lb. $1.00, lb. $3.50, postpaid.

246—**WHITE SILVERSIN.**—Makes large white onions of mild flavor and very good keeping qualities and as a main crop variety, we highly recommend it for both home and market growers.

Pkt. 10c, oz. 45c, ¼ lb. $1.60, lb. $6.00, postpaid.

252—**WHITE BERMUDA.**—Makes one of the best spring onions for home use or for market. It is very early and makes large onions of a waxy white color. Flesh very mild and sweet.

Pkt. 10c, oz. 40c, ¼ lb. $1.40, lb. $5.00, postpaid.

247—**YELLOW GLOBE DANVERS.**—A large globe shape onion of real value for storing for winter use. It ranks as one of the best keepers. Bulbs are large, round, yellow skin, with crisp mild flesh.

Pkt. 10c, oz. 45c, ¼ lb. $1.60, lb. $6.00, postpaid.

248—**LARGE RED WETHERSFIELD.**—The bulbs are large, round, thick, and slightly flattened. The flesh is just pungent enough to make it desirable and of a purplish white color. Yields an enormous crop and is a good keeper.

Pkt. 10c, oz. 40c, ¼ lb. $1.25, lb. $4.00, postpaid.

### Mustard

This ranks as a most important garden crop owing to the very short time in which it can be matured. For very early spring and late fall use it makes a most valuable addition to the garden and its greens are as good as turnip or kale. Mustard should be seeded either broadcast or in shallow drills. Sowing may be done at almost any time of the year and it will make greens in from four to six weeks from sowing.

203—**SOUTHERN GIANT CURLED.**—A beautifully curled and crimped variety that grows rapidly and makes an enormous crop of tender leaves. It is the most popular variety in cultivation and its frilled leaves make a most desirable garnish.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c, postpaid.

204—**CHINESE BROAD LEAF.**—A large smooth mustard which is preferred by many gardeners owing to the fact that its smooth leaves do not catch the grit and sand that the curled kinds do. This relieves much of the work of preparing it. It makes a big yield and its greens are as good as those of any variety.

Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. $1.00, postpaid.

### ONION SETS

The best and quickest way to grow onions is from sets. These may be planted in the fall or very early in the spring and will give onions suitable for the table in a short while. Prices on these fluctuate. We give below the ruling price as near as possible and we will supply at these as long as we can. A list giving prices on these sets is enclosed in every one of our catalogs. You may get revised prices at any time by writing for one of these lists or by referring to the one enclosed in this book.

Okra

This is a warm weather crop and should not be seeded until early summer. Sow seed in drills two to three feet apart and one inch deep. Later thin plants to stand eighteen inches apart in the row and cultivate like corn. Okra makes a most valuable vegetable for soups and can be fried. It is easy to grow and a few plants will well repay the trouble.

240—Early Dwarf Green.—A very early variety of dwarf habit but very productive. The pods are long, slender and of a light green color.
Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c, postpaid.

241—White Velvet.—The plants are large and productive, growing to a height of about six feet and bearing an abundance of large, round, smooth pods of a velvety white appearance.
Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c, postpaid.

242—Perkins Mammoth.—The pods are of an intense green color and usually very long and slender. It grows tall and produces an enormous crop.
Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c, postpaid.

243—Improved Long Greenpod.—A most popular variety in the South. The pods are unusually long and slender. They are of a deep green color, tender, and said to remain edible longer than those of other sorts. Grows tall and is one of the most productive of all.
Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c, postpaid.

Parsnip

Parsnips rank among our most important vegetables and being a root crop can be used over a much longer season than many others. In the South or in mild climates the roots may be left in the ground all winter and used as needed. Very cold climates demand that they be stored in basement or root cellar. Sow seed early in the spring in shallow drills two to three feet apart, covering them one-half inch deep. Later thin to three inches apart in the row. Parsnip may be seeded as late as June or July for winter use. All such root crops make their growth during the rainy cool season of late fall and may be sowed after the early vegetables are removed from the ground. Frequent shallow cultivation is desirable.

260—Long Smooth or Hollow Crown.—The roots are long, smooth, and very tender. We consider it the best variety for table use and have found it to be very productive.
Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. 75c, postpaid.

White Velvet Okra

Parsley

These seed are very slow to germinate and should be soaked for a few hours in luke warm water before sowing. Sow in the fall or early spring in light drills or broadcast. A very rich soil is required and it will last longer if sowed in a partially shaded situation. It is a most valuable seasoning for soups and meats and is the best of all garnishes.
A parsley bed requires but little space in the garden and almost no care after it is once started. Prepare a small bed in some corner of the garden and it will yield great returns.

261—Double Moss Curled.—The most beautiful of all parsley. The leaves are beautifully cut and crimped and make most desirable garnishes. It has fine flavor and is equally as good for seasoning.
Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid.

262—Plain.—A smooth leaf variety that can be used for garnishing or for seasoning. Many people prefer the smooth green leaf.
Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c, postpaid.

263—Large Hamburg Turnip Rooted.—The best of all for soups. It makes a medium size root which possesses the fine flavor of the leaf.
Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 60c, postpaid.
**Garden Peas**

Sow very early in the spring in a light warm soil of only medium fertility. Rows should be three feet apart and seed should be drilled thickly, because peas bear better when thick. Cover early plantings one inch deep and late plantings two inches. Inoculating the seed with FarmOgerm will materially improve the yield and the quality of the peas. Give frequent shallow cultivation. The smooth seeded sorts may be planted earlier than the wrinkled kinds, but the wrinkled peas generally make sweeter, and more tender peas. The tall kinds always yield more than the dwarf, but must be supported.

61—NOTT’S EXCELSIOR.—An early dwarf wrinkled pea of superior merits. The vines are rugged and productive. Pods about two and a half inches long, but filled with large tender peas. Grows to a height of about thirteen inches. Especially recommended for home garden.

Pkt. 10c, ½ lb. 20c, lb. 35c, 5 lbs. $1.50 postpaid. 15 lbs. $3.00, 100 lbs. $17.00, by express.

63—McLEAN’S LITTLE GEM.—This pea is slightly higher in growth than the Sutton’s Excelsior but matures its pods about the same time. It is one of the most productive of the dwarf wrinkled sorts and can be grown without support. Vines make vigorous growth and attain a height of about eighteen inches. Pods of medium size, well filled. Seed wrinkled.

Pkt. 10c, ½ lb. 20c, lb. 35c, 5 lbs. $1.50 postpaid. 15 lbs. $3.00, 100 lbs. $17.00, by express.

60—SUTTON’S EXCELSIOR.—This is the best and earliest of the dwarf varieties. Though extremely early, it makes a vigorous growth of vines, which bear an abundance of large well filled pods. The vines are rugged and strong, requiring no support. The pods are about three inches long, broad, straight and filled to the end. Grows to a height of about fifteen inches.

Pkt. 10c, ½ lb. 20c, lb. 35c, 5 lbs. $1.50 postpaid. 15 lbs. $3.00, 100 lbs. $17.00, by express.
69—GRADUS or PROSPERITY.—It is not an extra early sort, but its products are far above those of any other variety. The vines are hardy and grow to a height of about three feet. The pods are very large, straight and slightly rounded at the point, averaging about four inches in length. The seed are large, wrinkled and of a cream color, tinged with green.

Pkt. 10c. ½ lb. 20c. lb. 35c., 5 lbs. $1.00, postpaid. 15 lbs. $3.15, 100 lbs. $17.50, by express.

73—WHITE MARROWFAT.—The largest and most prolific of peas. The vines grow tall and have a dense foliage. The pods are from five to seven inches long and filled with unusually large, round white peas.

Pkt. 10c. ½ lb. 20c. lb. 35c., 5 lbs. $1.40 postpaid. 15 lbs. $2.85, 100 lbs. $13.00, by express.

75—CHAMPION OF ENGLAND.—A popular late wrinkled pea, which is noted for its productivity and large tender peas. The pods are about three inches long, blunt, of a medium dark color, broad and nearly straight. Grows about four feet high.

Pkt. 10c. ½ lb. 20c. lb. 35c., 5 lbs. $1.50 postpaid. 15 lbs. $3.00, bu. $16.00, by express.

74—TELEPHONE.—It is late, but very productive. The pods are of enormous size and well filled with large wrinkled peas of the very best quality. Pods about five inches long. Vines grow to a height of about four feet. Seed are large, green and wrinkled.

Pkt. 10c. ½ lb. 20c. lb. 35c., 5 lbs. $1.75, postpaid. 15 lbs. $3.15, 100 lbs. $17.50, by express.

70—EARLIEST OF ALL or ALASKA.—Vines attain a height of about thirty inches. Pods are about two and a half inches long, straight, round and well-filled. It is uniform in growth and makes the best pea for canning. Seed rather small, round, slightly dented and of a green color.

Pkt. 10c. ½ lb. 20c. lb. 35c., 5 lbs. $1.50 postpaid. 15 lbs. $3.00, 100 lbs. $16.00, by express.

71—AMEER.—An extra early sort which bears pods much larger and longer than those of the Alaska. The pods are often borne along the vines in pairs. It is very productive and the favorite of market gardeners. Pods about three inches long and slightly curved. The seed are of medium size, dented and of a bluish green color. Grows to a height of about thirty inches.

Pkt. 10c. ½ lb. 20c. lb. 35c., 5 lbs. $1.50 postpaid. 15 lbs. $3.00, 100 lbs. $16.00, by express.

72—ALDERMAN.—A fine, vigorous grower of the Telephone strain. Vines grow to about four feet and are very productive. Pods are long and well filled with large peas of the very best quality. Seed wrinkled and of a light green color.

Pkt. 10c. ½ lb. 20c. lb. 35c., 5 lbs. $1.60, postpaid. 15 lbs. $3.15, 100 lbs. $17.50, by express.

69—THOMAS LAXTON.—Like the Gradus, this is an especially good variety for the home garden. In many respects it is better. It is earlier, hardier and more productive, but I do not think its products are of such good quality as those of the Gradus. More reliable than the Gradus. Vines grow to a height of about three feet and bear a heavy crop of large, straight pods about three inches long.

Pkt. 10c. ½ lb. 20c. lb. 35c., 5 lbs. $1.60, postpaid. 15 lbs. $3.15, bu. $17.50, by express.
Peppers

Pepper is a tender plant requiring warm weather and the seed should not be planted until early summer. Sow in a cold frame or hot bed after warm weather comes and transplant as soon as large enough to well prepared rows three feet apart, setting plants eighteen inches apart in the row. Give frequent shallow cultivation.

265—PERFECTION PIMENTO.—This makes a most useful sort for home use. The large peppers can be used green or canned for winter. Fruit large, round, and running to a point at the blossom end. Turns a bright red as it matures.

Pkt. 5c, oz. 35c, ¼ lb. $1.00, lb. $3.00 postpaid.

266—RUBY KING.—This is an early variety and one that is most in favor with both home and market growers. There is more Ruby King pepper used than any other variety. The plants grow large and vigorous and bear a wonderful crop of large, long bulbs. The fruit is of mild flavor, a deep green color, and almost as large as that of the Chinese Giant. Its earliness and excellent quality make it one of the most desirable sweet peppers to be had.

Pkt. 5c, oz. 35c, ¼ lb. $1.00, lb. $3.25, postpaid.

269—LARGE BELL or BULL NOSE.—A very large blunt nose pepper which has been a home garden favorite for years. Its fruit is large, of irregular shape and short. It is rather early and matures its fruit uniformly.

Pkt. 5c, oz. 35c, ¼ lb. $1.00, lb. $3.00 postpaid.

270—NEapolitan.—The earliest of all. It will mature its large, long pods, of mild flavor some two weeks ahead of the Bull Nose. And in point of yield, productiveness, and quality of fruit, is the equal of any.

Pkt. 5c, oz. 35c, ¼ lb. $1.00, lb. $3.00 postpaid.

271—CHINESE GIANT.—This is the largest pepper in cultivation. Its plants grow strong and upright and are literally loaded with the giant peppers. Fruit is about five inches across and about four to five inches long, with thick mild flesh. It is a little later than the others but makes the best yield of any.

Pkt. 10c, oz. 50c, ½ lb. $1.50, lb. $5.00, postpaid.

273—LONG RED CAYENNE.—A fine bushy plant that is covered with small long red pods. It has a most pungent flavor and makes excellent dried peppers for seasoning.

Pkt. 5c, oz. 40c, ¼ lb. $1.25 postpaid.

Dear Sir:—

I wish to tell you of our success with your seed. We bought of you for about five years and had fine success. Then many of our neighbors got to buying of another seedhouse so we bought of them last year and made a complete failure in our tomatoes. So we are coming back to you with a big order this time.

Cleveland, Tenn.

John A. Campbell.
Radish

The radish if properly used can be made into a most important garden crop. Its ease of culture and quick growth makes it possible to have good radishes before anything else comes in the spring and after all vegetables have gone in the fall. It is a vegetable which adapts itself to almost any kind of culture but always repays the man who takes good care of it. It may be forced indoors during the dreary winter and will prove a most acceptable addition to the diet. Or it can be planted in cold frames in the hot summer, or started just as the garden gives out in the fall. The essentials of radish culture are rich light soil, frequent cultivation, and applications of fertilizer to force its growth all possible. A radish that makes quick growth is never tough and hot. It is the ones that linger in the beds and do not grow that turn out such undesirable roots. After the radish gets large enough to work, use fertilizer around it to hasten its growth and insure crisp, mild flesh. Seed may be started at almost any time of the year indoors or outdoors after severe weather is over.

280—SLATE’S RED FORCING.—In this variety, we are offering both home and market growers a most valuable sort. It will mature edible roots in a very short while make a small growth of tops, and small scarlet roots of round shape. The roots are smooth, free from side rootlets, of uniform size, bright scarlet skin with white flesh, and almost globe shape. The flesh is mild and sweet, crisp and tender. Any good radish must be grown rapidly, and if you take this forcing sort and hasten it to maturity, you will have your ideal of what a radish should be.

Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.

French Breakfast Radish

286—FRENCH BREAKFAST.—An extra early olive shape variety which is especially adapted to home use. The roots grow about two inches long and have a beautiful deep scarlet skin which is shaded to a patch of white at the tip. The flesh is crisp and free from pungent flavors.

Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. $1.00 postpaid. 10 lbs. $7.50 by express.

281—SCARLET BUTTON.—This is an extra early round or globe variety having a bright scarlet skin. It forces well and makes a most desirable kind for early market or home use. The roots are of medium size and have solid sweet flesh.

Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. $1.00 postpaid. 10 lbs. $7.50 by express.

282—SCARLET TURNIP.—An excellent forcing variety having a medium size root. The roots are turnip shape, smooth, of a bright scarlet color with a white tip. Recognized as one of the best eating radishes known. The flesh is crisp, tender, mild and has a delicious flavor.

Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. $1.00 postpaid. 10 lbs. $7.50 by express.

285—BRIGHTTEST LONG SCARLET.—We consider this one of the best of the long radishes. It is very early and can be used for forcing or for planting in the open ground. Roots of medium size, long, and of a scarlet color with white tip. Flesh of excellent quality and as free from pungency as any.

Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. 85c, postpaid. 10 lbs. $7.50 by express.

287—CELESTIAL ROSE.—This winter radish makes long roots which are rather larger at the tip than at the top, have smooth light red skin, white flesh, which is tender and usually very mild. It grows much larger than the average radish and often measures six to eight inches in length.

Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. $1.00 postpaid. 10 lbs. $7.50 by express.

284—LONG WHITE ICICLE.—Finest white radish. Matures very early produces long, tapering root. Skin is pure white, smooth. Flesh is always crisp and tender.

Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. $1.00 postpaid. 10 lbs. $7.50 by express.

I have been using your seed for the past eight years and they are the best I have ever used in my thirty years of farming.

Jas. A. Withers, Broadway, N. C.
July 6, 1925
Spinach

This is a crop that should form the basis of every early spring and late fall garden. Its greens are very valuable for certain mineral contents which has been found to be greatly needed in the human system. It is very easy to grow and makes a delicious dish. Sow seed early in the spring or in the fall in light drills about fifteen to twenty inches apart. Cover one-half inch deep and cultivate frequently. It will make greens in a very short while.

291—BLOOMSDALE.—A quick growing savoy leaved sort that is very popular with both home and market growers. It makes large, broad leaves of a deep green color and which are crisp and savoyed. One of the best varieties for growing in cool weather.

Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 50c postpaid. 10 lbs. $4.00 by express.

293—NEW ZEALAND.—A plant whose tender shoots make a most delicious dish of greens and it will stand a great deal of hot weather. Plants grow large and bear numbers of long pointed leaves. It will remain edible throughout practically the whole summer, while other sorts would be ruined by the hot weather. Seed slow to germinate and should be soaked before planting. Thin plants to stand eighteen inches apart in twenty-four inch rows.

Pkt. 5c, oz. 15c, ¼ lb. 35c, lb. $1.00, postpaid. 10 lbs. $9.00, by express.

Herbs

Those wasted corners and out-of-the-way spots in the garden and yard can be turned into useful places by seeding some of these herbs. The perennials may be sowed during the early spring and will be of permanent value. The annuals must be seeded each year. Dig the soil and pulverize thoroughly. Apply manure liberally and cover the seed only one-half inch deep.

Per Pkt. 6 for

350—ANISE, Annual ......................... $ .05 $ .25
351—BALM, Perennial ..................... .05 .25
352—BASIL, Sweet Annual ................ .05 .25
353—BORAG, Annual ...................... .05 .25
354—CARAWAY, Perennial ............... .05 .25
355—CATNIP, Perennial .................. .05 .25
356—CORIANDER, Annual ............... .05 .25
357—DILL, Annual .......................... .05 .25
358—LAVENDER, True, Perennial ....... .10 .50
359—MARJORAM, Sweet, Annual ....... .05 .25
360—SAGE, Broad Leaf, Perennial ...... .10 .50
361—THYME, Perennial .................. .10 .50

Rhubarb

Sow seed very early in the spring in a hotbed and later transplant to a cold frame. In the fall reset to permanent bed which has been dug deep and made very rich with manure. Rows should be five feet apart and plants should stand five feet apart in the row. Keep out weeds and top dress every spring with manure and the bed will last indefinitely.

289—LINNAEUS.—A large growing kind that makes excellent pies and sauce. Both leaves and stalks attain an immense size.

Pkt. 5c, oz. 20c, ¼ lb. 50c, lb. $1.75 postpaid

Salsify

Sow the seed after danger of frost is past in a rich, light soil. Sow in drills thirty inches apart and about one inch deep. After the plants attain some size, thin from four to six inches apart in the row. Cultivate frequently, but never while it is wet with dew.

This crop may be sowed in the summer as late as June or July provided the soil is moist and some covering is put over the row after sowing to help retain the moisture and protect the young seedlings from the hot sun.

290—MAMMOTH SANDWICH ISLAND.—This is the largest growing kind known, but its size in no way injures its quality. The roots grow to almost twice the size of those of any other variety, and will keep throughout the winter in the open ground. The flesh is free from strings, fine grained and has a delicious flavor.

Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $2.25, postpaid.
Squash

A heavy sandy loam made very rich is ideal soil for Squash. This is one of our most important vegetable crops and a small space properly cultivated will give an abundance of excellent food. The summer varieties should be pulled when very young and used or canned at once. The winter sorts should be left to mature and then stored in a cool dry place and used during the winter. Prepare large hills four to five feet apart each way and chop a handful of fertilizer into each. Then plant from five to eight seed one inch deep in each hill. Thin after the leaves form to two plants per hill and cultivate frequently. There are numerous insects that do great damage to squash. The spray material section of this book will tell you about a Nicotine dust to kill the bugs that suck the leaves and the aphids. The sow bugs that lay eggs to breed the worms are hard to kill with any spray but if you will put a few boards near the squash, these bugs will go under them to hide during the day. About the middle of the day or early afternoon, lift the boards and kill the bugs that have gathered under them.

297—COCOZELLE BUSH.—A true bush variety of compact growth. Sets a number of medium sized fruits of from twelve to fourteen inches in length and five to six inches in diameter. Fruit of a dark green color slightly striped with lighter shade. An excellent summer variety for the home garden.

Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. $1.50 postpaid.

Early Summer Crookneck Squash

300—THE DELICIOUS.—A most desirable winter variety for either home or market. It is recognized wherever quality is demanded. The fruit is of medium size, large at stem and tapering to blossom end. Generally of a dark green color, but lighter shades may appear. Flesh thick, fine grained, sweet, and of a golden yellow color. A good keeper.

Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. $1.50, postpaid.

301—SELECT HUBBARD.—A standard winter squash which has been upon the market for years. Our select strain insures a good crop of desirable squash. The fruit is large, slightly warty, and has a dark green color. The flesh is orange color, thick, dry and richly flavored. This squash can be kept through the entire winter.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25, postpaid. 10 lbs. $10.00 by express.

299—EARLY PROLIFIC MARROW.—These squash when fried make a most delicious dish. Fruit of medium size, long, and green in color.

Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. $1.50, postpaid.

Slate’s Early White Bush Squash

295—SLATE’S EARLY WHITE BUSH.—This is the earliest squash in cultivation and one of the best for home or market. The vines are vigorous and productive and will bear for most of the summer. The fruit is of medium size, slightly scalloped, creamy white, meaty, and free from strings. It is a ready seller on all markets and its good qualities command a place in every home garden.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.

296—EARLY SUMMER CROOKNECK.—An extra early crookneck variety which is extensively grown by market gardeners. The fruit is from ten to fifteen inches long, of a golden yellow color, and is densely warty. It is very prolific and of unusually good quality.

Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. $1.25 postpaid. 10 lbs. $10.00 by express.

The above is a picture of Mr. and Mrs. W. D. Chittum, of Natural Bridge, Va., and their garden. Mr. Chittum has been trucking for the past twenty-five years and knows good seed when he gets them. He says that Slate’s seeds have given him better results than any he has ever planted in his long experience.
**Tomatoes**

This is the most popular vegetable that grows and may be used in such a variety of ways that a continual supply should be made certain. The early kinds are always desirable because they come in at a time when they are most needed, but the main crop sorts give much larger and more meaty fruits for canning. Sow the early kinds very early in the spring in a hot bed or window box. When plants are about three inches high transplant to cold frame or larger box. This develops root growth and makes a stock plant. After danger of frost is past, transplant to the garden in rows four feet apart and hills three feet apart. The soil should be light and rich. As the vines grow some support should be given them to hold the fruit off the ground. For main crop sow about two or three weeks after the first sowing and for late use, sow in May or June.

Wilt is one of the tomatoes worst enemies and this can be checked to a great extent by spraying every two weeks with Cupodust as described in the spray material section of this book. The most convenient form to use is dry which can be applied with a dust gun with very little trouble. If tomato worms get troublesome add a little Arsenate of Lead to the dust and this will kill them.

317—**RED ROCK**.—This is a good canning or main crop tomato that is noted for the heavy crop it yields. Where space is limited in the home gardens or for the canner who wishes to turn out the best yield, this will make an excellent main crop sort. The fruit is large, round, solid, and of a beautiful red color. Very smooth and free from cracks.

Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. $2.25 postpaid. 10 lbs. $20.00 by express.

318—**PONDEROSA**.—For the person who desires a large, meaty tomato there are few varieties that will meet this need. This we consider the best of the large tomatoes since it is not so inclined to grow tough and woody around the stem as the Brimmer. The fruit is very large, meaty, and contains but few seeds. The color is a bright purple red. The vines are stout and productive but should always be supported, because the large tomatoes are inclined to break the vines.

Pkt. 10c, oz. 60c, ¼ lb. $1.75, lb. $5.50 postpaid.

---

**Slate's Extra Early Perfection**

307—**SLATE'S EXTRA EARLY PERFECTION**.—We offer this to our trade as being an extra early sort maturing along with Sparks Earliana but is larger, more uniform in shape, and of better quality than Earliana. It is so early that it has been used successfully in the far South for shipping to Northern markets and does well for this purpose. This means that it must be very early, of smooth handsome appearance, with solid meaty flesh. The color is a purplish pink. This tomato is especially recommended for home and local market where its size and beauty are fully appreciated and its vigorous growth of vine and heavy yield will be welcomed. It stands the adverse conditions of early planting well and if properly cared for will bear well into the summer. We do not think that a better extra early tomato can be found.

Pkt. 10c, oz. 50c, ¼ lb. $1.50, lb. $5.00 postpaid.

305—**SPARKS EARLIANA**.—For years this has been a favorite with both home and market growers. It is one of the earliest tomatoes in cultivation and has many good points to deserve its wide use. The vines are hardy and productive and if kept free from disease and staked will produce throughout the season. The fruit is of medium size, very smooth, meaty, and of a rich scarlet color. It is thoroughly reliable for either home or local market.

Pkt. 5c, oz. 35c, ¼ lb. $1.00, lb. $3.00 postpaid.

309—**JUNE PINK**.—The fruit is of medium size, handsome shape, and a bright pink color. It is slightly later than Earliana but earlier than most of the second early type. Makes a good yield of excellent tomatoes in time for early market or home use. It is one of the old varieties that has won a following that no new sort can take.

Pkt. 10c, oz. 40c, ¼ lb. $1.25, lb. $4.00, postpaid.
SLATE'S MATCHLESS TOMATO.—This tomato was introduced twenty-five years or more ago. The Matchless was indeed well named. It has held its own against all of the new introductions, because it was impossible to produce anything better. It is not one of the small, extra early varieties, but a medium early, vigorous growing and highly productive kind. If properly cared for it will produce throughout the entire season, and the fruit is good for table use or for canning. The fruit is large, smooth, always of uniform size, cardinal red color, contains very few seed, and has a thick, meaty flesh which has a mild luscious flavor. For home use it cannot be equalled, and canners will find it a profitable variety to grow. We exploit it because it is good—not because it is new and brings us an enormous profit.

Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. $2.50 postpaid. 10 lbs. $20.00 by express.

NORTON.—A comparatively new variety distributed by the Department of Agriculture some years ago as being one of the best of the Wilt Resistant type. It comes as a most valuable addition to the tomato list since so many gardeners and commercial growers both are having trouble with wilt or blight. Some soils have almost been abandoned because of this disease. This variety withstands the attacks of disease and produces a good crop of big smooth tomatoes. Its fruit is almost exactly like the Stone, being free from cracks, solid, meaty, and of a bright scarlet color. It produces in midseason and makes an excellent canning variety. We would suggest to persons having trouble with wilt that they use this variety and dust with copodust as mentioned in the spray material section of this book.

Pkt. 10c, oz. 50c, ¼ lb. $1.75, lb. $6.00 postpaid.

CHALK'S EARLY JEWEL.—One of the most popular early tomatoes grown. It is a day or two later than the Earliana, but it is larger and more productive. Market gardeners will find this to fill their needs in every respect. The fruit is large, round, smooth, solid and of scarlet red color.

Pkt. 5c, oz. 35c, ¼ lb. 90c, lb. $3.00, postpaid. 10 lb. $25.00, by express.

LIVINGSTON GLOBE.—A market gardener's variety that has ideal features for the home garden. It is early and produces the most perfectly formed fruit of any sort known. The tomatoes are of medium size, smooth, globe shape, and have few seed.

Pkt. 5c, oz. 35c, ¼ lb. 1.00, lb. $3.75, postpaid. 10 lbs. $32.50 by express.

BRIMMER.—This is said to be the largest of all tomatoes and produces an enormous yield. The fruit is unusually large, flat, curving and of a bright red color. It is too large for anything but home use and we do not consider its quality so good as some of the smaller kinds. Its size however has made it rather popular and many gardeners call for it every year but we recommend it for size only.

Pkt. 10c, oz. 65c, ¼ lb. $2.00, lb. $7.50, postpaid.

DWARF STONE.—Where it is not desired to stake tomatoes this makes an excellent sort since the vines are of dwarf bushy growth holding the fruit up off the ground. It is also a good sort for small gardens since it can be planted closer together than the larger kinds. The fruit is of true Stone appearance and quality and a beautiful red color.

Pkt. 5c, oz. 40c, ¼ lb. $1.10, lb. $3.50 postpaid.
311—Slate’s New Stone.—The old Stone tomato was very popular with both home gardeners and commercial growers and many years ago we decided to devote special attention to this variety. In 1913 we offered our new strain of the Stone tomato for the first time. It was an immediate success and has retained its popularity so well that we still feature it. We do not call this a new tomato. It is a very old variety which has been constantly improved by breeding and selection. Canners everywhere have found it to be the best variety they can get. They can use a larger percentage of the fruit than that of any other canning tomato. Thus New Stone is a profit maker for the canner, because when he buys a bushel of these he cans the maximum from it and does not have the terrific loss from cracked and imperfect fruit that comes from some varieties. This strain of Stone is noted for its medium size, solid fruit which is free from cracks and other imperfections, very meaty, and of delicious flavor. The tomatoes are almost round, slightly flattened, and of a bright scarlet color. The home or commercial canner should pay especial attention to this tomato and growers for the late market will find it the best sort, since its color and appearance command top prices. And likewise, the home gardener needs all of these good characteristics in his tomatoes, though he may not can or sell them but he appreciates quality.

Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. $2.50, postpaid. 10 lbs. $20.00 by express.

308—Early Detroit.—This variety is not very well known, but it is greatly liked by those who have tried it. We consider it the most beautiful and in all respects one of the best tomatoes we have ever grown. The fruit is large, exceptionally smooth, of a handsome shape, round, and of a purplish pink color.

Pkt. 5c, oz. 40c, ¼ lb. $1.20, lb. $3.75 postpaid.

313—John Baer.—This is an improved strain of the old popular Bonnie Best. It is as early as the Earliana, grows a vigorous vine and is very productive. The fruit is round, almost globe shape, but slightly flattened at the stem. Color a bright scarlet.

Pkt. 5c, oz. 40c, ¼ lb. $1.00, lb. $3.50 postpaid. 10 lbs. $30.00 by express.

319—Beauty.—This is a good general purpose tomato for either main crop or late use. The fruit is large, solid, does not crack easily, and is of a purplish red color. It is a good keeper, very productive, and especially desirable for canning.

Pkt. 5c, oz. 40c, ¼ lb. $1.00, lb. $3.50 postpaid. 10 lbs. $30.00 by express.

322—Golden Queen.—This is by far the best and most productive of yellow tomatoes. The fruit is large, smooth, of a beautiful golden color, and resembles the Beauty in both size and shape. It is hard to find a yellow tomato which will produce a good crop of large fruit, but we think you will find this one entirely satisfactory.

Pkt. 5c, oz. 40c, ¼ lb. $1.00 postpaid.

323—Yellow Pear.—Novelty and good tomato combined. Fruit small, pear shape, rich yellow color, delicious flavor. Excellent for preserves or pickles.

Pkt. 5c, oz. 50c, ¼ lb. $1.25 postpaid.
Turnips

Turnip seed may be sowed in the early spring or fall. The soil should be very rich, well pulverized, and the seed should not be covered more than one-half inch deep. It is better to sow just after a good rain when the soil has sufficient moisture in it to assure germination. Use one ounce of seed to every one hundred square feet or three to five pounds per acre.

332—**EARLY PURPLE TOP MILAN.**—The earliest of turnips and an ideal sort for sowing in either spring or fall. The roots are round, flat, with purple tops. Flesh tender and sweet. It is the best sort for spring sowing.

Pkt. 5c, oz. 15c, ¼ lb. 35c, lb. $1.00 postpaid. 10 lbs. $7.50 by express.

337—**PURPLE TOP STRAP LEAF.**—This is an early turnip, giving a most desirable root of medium size and a good growth of tops for greens. Roots of medium size, flat with purple top and white bottom.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.

338—**EARLY WHITE FLAT DUTCH.**—This is an early strap leaf white turnip that serves a double purpose. The roots are of medium size, flat and pure white. Tops grow large and produce an abundance of salad.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.

330—**MAMMOTH RED TOP GLOBE.**—Makes one of the most desirable general purpose turnips. When harvested young the roots are tender and crisp. If allowed to stay in the ground, they will often weigh ten pounds or more, and make an excellent feed for cattle. Roots globe shape, white at bottom with purple tops.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.

331—**PURPLE TOP WHITE GLOBE.**—Roots are large, purple above the ground and white beneath. Flesh white, fine grained and sweet. A most desirable turnip for table use.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.

333—**LARGE WHITE NORFOLK GLOBE.**—A little later in maturing than the purple top globes, but makes a better sort for winter keeping. Roots large, globe shape, white with small green patch around the tops.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.

334—**POMERANIAN WHITE GLOBE.**—An enormous white turnip growing very much like a rutabaga. Roots are globe shape, very large, skin rather rugged, white with green above the ground. Good for either table or stock feed.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.

335—**WHITE COWHORN.**—Roots long, thick, and have few side rootlets. Makes only a small growth of tops, but an enormous yield of roots.

Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c postpaid. 10 lbs. $6.00 by express.
What I Would Plant

**FOR CUT FLOWERS**
- Alyssum
- Antirrhinum
- Aster
- Calendula
- Callistephus
- Candytuft
- Centaurea
- Chrysanthemum
- Cosmos
- Dahlia
- Delphinium

Slate's Flower Seed

In the following pages we offer what we believe to be the most
select list of flowers obtainable. Many obsolete and undesirable
kinds have been eliminated and novelties and better varieties sub-
stituted. We make trials of our flower seed yearly and are always
experimenting with novelties. Thus we are able to get first hand
information as to the value of varieties offered us.

In listing such a great number of varieties, we have been forced
to condense the information as much as possible. To aid us in this,
we employ the following symbols:

- H—Hardy
- HH—Half Hardy
- T—Tender
- O—Annuals
- X—Biennials
- M—Perennials

Annuals are those flowers that bloom and die the first year and
must be resown the following. Some of the most beautiful and use-
ful of flowers come in this class and they have the advantage of
giving early blooms from seed.

Biennials generally bloom the first year and again the second
but will not last longer than this. Many of these are best treated
as annuals and sowed each year.

Abutilon (T# 40 in.)
1001—Abutilon Mixed.—Also known as Flowering Maple or Bell
Flower. A most desirable flower for window box, pot, or for
use in the garden. Blooms in a short while from seed and
makes fine plants with maple like leaves and bearing bell-
shaped flowers of many colors. Pkt. 15c, 6 pkts. for 75c.

Acroclinium (HO 24 in.)
1002—Acroclinium Mixed.—Also known as the Everlasting. For
dried bouquets nothing is better. Cut when the blooms reach
perfection and hang in a cool shady place with heads down
until dry and they will retain their bright colors almost in-
definitely. Pkt. 10c, 6 for 50c, oz. 40c.

Adlumia (HO 15 ft.)
1003—Adlumia.—Also known as Alleghany Vine. Good climber
for covering trellis, etc. Foliage very finely cut and dec-
orative. Flowers of flesh color. Reseeds itself from year to
year. Pkt. 10c, 6 for 50c.

Perennials are the flowers for permanence. Some of them bloom
the first year. Others do not bloom until the second year but will
continue to come after that without resowing.

Cultural Directions are given on each packet of seed for the
specific flower contained therein. Further, we have a leaflet “How
to Grow Flowers,” giving many valuable hints on the general care
of the flower garden and mentioning the requirements of some of
the most popular flowers. As a general rule for all flowers, the fol-
lowing is good: Sow all Hardy flowers early in the spring, even
before frosts are over. Saw the Half Hardy about the time of the
last frost. And the Tender sorts after frost is over and warm
weather has come. The Half Hardy and Tender plants in northern
latitudes will do better if started indoors in boxes and transplanted.
And in the South the Tender plants should be started thus. A
light rich loam soil is always best for flowers. Manure used lib-
erally is a great help. Cover the seed to three times their greatest
size and use only well pulverized soil for covering. To produce
perfection in blooms, an abundance of water is essential.

All flower seed are quoted Postpaid.

Ageratum (HO 18 in.)
1004—Blue Perfection.—One of the best of bedding annuals.
Makes a compact growth of deep green foliage over which
clusters of bright blue flowers are to be seen throughout the
entire summer. Pkt. 10c. 6 for 50c. oz. $1.00.

Althaea Rosea, see Hollyhocks.

Alyssum (HO 8 in.)
Alyssum is one of the most popular of our old flowers. It is
very easy to grow and blooms in a few weeks from seed started
outdoors. It makes one of the best of dwarf border plants and is
good for cutting. The perennial or yellow kind should be started
in the late spring or summer and transplanted in the fall to its
permanent position. Or if started indoors very early in the
spring, it will bloom the first year.

Antirrhinum (HO 10 to 24 in.)

There are few flowers that cover such a wide range of uses as the Antirrhinum (Snapdragon). They are hardy and bloom readily from seed the first year. In the North, they are best handled as annuals, but in the South, they will live through the winter and come up the second year. For early blooms start seed indoors in March and transplant as soon as frost is over. They begin to bloom in late Spring and last practically all summer. To get the most blooms, pinch the bud of the young plants and allow them to spread and branch. Colors covering some of the most rare and vivid combinations are to be seen.

Pkt. 6 for Oz.

1015—DEFIANCE, Fiery Scarlet.......................... 10 50 50

1019—DELCIATA, 24 in. Rose Pink........................ 10 50 75
1920—TALL MIXED, All Colors............................ 10 50 60

Amaranthus (HO 4 ft.)

Very useful plants for decorating large spaces in the garden or for edging large lawns. Makes a large spreading bush literally loaded with long tassel-like blooms, which take on bright colors as fall approaches. Blooms all summer.

Pkt. 6 for Oz.

1009—CAUDATUS, Love Lies Bleeding.................. $ .05 $ .25 $ .30
1010—TRICOLOR SPLENDENS, Josephs Coat............ 10 50 .60

Aquilegia (H 30 in.)

1021—AQUILEGIA MIXED—The popular old fashioned Columbine. It is a hardy perennial and seed may be started outdoors very early in the spring or sowed in the fall. Mixed colors.

Pkt. 10c, 6 for 50c, oz. 75c.

Asparagus (T #)

1023—PLUNOSUS NANUS—This is the most popular of the asparagus ferns. Grows readily from seed started indoors in the early spring or summer in warm moist box. Foliage very fine and of a deep green color. Grows about eighteen inches tall and puts out many shoots.

Pkt. 10c, 6 for 50c.

1032—SPRENGI—Used for its foliage, but makes small flowers also. Foliage dark green and feathery. Very desirable for hanging baskets or for tall fern pots. Pkt. 10c, 6 for 50c.

Aster, Grego Giant

Aster, Late Branching

Asters (HO 18 to 36 in.)

Practically every flower lover is acquainted with asters. It being one of the most popular both with florists and in the home gardens. In this family of flowers the full value of some of the most rare colors are brought out. In the North seedling may be done outdoors after danger of frost is over, but we advise Southern growers to start the seed early indoors, so as to give the plants the early spring season for growing in the bed. Further, it will be found best in the South to plant asters in a partially shaded position. The Queen of the Market strain is perhaps the most popular owing to the fact that it is one of the first to bloom. The Crego Giants or Ostrich Plume come next in bloom and the Late Branching is the Aster of late summer and fall. The three planted together will give a succession of blooms from July until frost. The Aster likes a light, rich soil and a moderately moist location. Black Flag is a safe insecticide to use for the mites and plant lice. Bug Death will kill the chewing insects. We offer below a selection obtained from one of the best Aster growers we know.

Balsam (HO 18 in.)

A popular flower of easy culture. It is adapted to edging tall beds, bedding, or planting in groups. Balsams like full sunlight and a very rich soil. Start seed and transplant twice before setting them in permanent bed. This makes a better bush and more double flowers.

Balsam Apple (HO 12 ft.)

1191—BALSAM APPLE.—A most useful vine of rapid growth. Used for covering trellis and its fruit is very ornamental, resembling an apple. Pkt. 10, 6 for 50c, oz. 55c.

Balsam Pear (HO 12 ft.)

1192—BALSAM PEAR.—In all respects similar to the Balsam Apple except for its fruit, which is pear shaped. Pkt. 10c, 6 for 50c, oz. 55c.

BELL FLOWER, see Abutilon.

BELLIS (H# 8 in.)

1659—PERENNIS MIXED.—The double English Daisy. This is one of the neatest of flowers for dwarf borders or edges. Fully double flowers are borne on stiff stems of about six inches length. Colors principally white and pink. Blooms in a very short while from seed. Pkt. 10c, 6 for 50c, oz. 75c.

BLACK EYED SUSAN, see Thunbergia.

I could hardly get along without my "Guide to Gardening." I think the planting charts are so helpful. I expect to send another order before long.

A. J. Coleman,
Charlottesville, Va.
Canna (T# 3 to 6 ft.)

Cannas may be grown from seed started very early in the spring in a window box and will bloom the first year. There is always a novelty in growing them from seed, because new varieties may appear in your plantings. Cut notch in seed and soak for twelve hours before planting.

Pkt. 6 for Oz.
1072—DWARF KINDS MIXED ..................................$ .10 $.50 $ .60
1073—TALL KINDS MIXED ...........................................10 $.50 $.60

Canterbury Bells (HX 30 in.)

This is one of the most beautiful and useful of garden plants. In the South it can be treated as a hardy biennial, but in the colder climates it may die out in the winter. Sow the seed very early in the spring indoors and transplant after severe frosts are over. Colors run in white and blue shades principally.

Pkt. 6 for Oz.
1074—SINGLE MIXED ..............................................$.05 $.25 $.30
1075—DOUBLE MIXED ..............................................10 $.50 1.50

(Cardinal Climber (TO 25 ft.)

1076—CARDINAL CLIMBER,—Ipomoea Cardinalis is one of the most popular of all climbers. Its foliage is very fine and fern-like and the vines are covered with cardinal red flowers. It is slow to germinate and the seed should be soaked for some hours before planting. Do not plant outside until the weather has become warm. Pkt. 15c, 6 for 75c, oz. $1.25.

Carnation (HH# 18 in.)

The carnation has become one of the leading flowers of America and the wide range of varieties make them adaptable to many different uses. In the following list, the Marguerite, Border, and Chabaud may be used for bedding. The Chabaud and Picotee make good pot plants. Start seed very early in spring indoors and transplant as soon as severe frosts are over. The soil should be light, well-drained and very rich. Dished to produce bushy plants. Applications of liquid manure will prolong the blooming period.

Pkt. 6 for Oz.
1077—DOUBLE MARGUERITES MIXED ..................................$ .15 $.75
1078—BORDER MIXED (Mostly Doubles) ......................15 $.75
1079—CHABAUD EVERBLOOMING (Hardy) ..................15 $.75
1080—DOUBLE PICOTEE MIXED ..................................25 1.50

Cherianthus (HO 18 in.)

1090—ANNUAL MIXED.—Cherianthus or Wallflower is not used as much as it should be. The blossoms are of a coppery shade and add a touch of distinction to the flower garden. It is very easy to grow and should be included in the garden. A good pot plant also. Pkt. 5c, 6 for 25c, oz. 35c.

CASTOR BEAN, see Ricinus.

Celosia or Coxcomb

Celosia (HHO 12 to 48 in.)

Celosias are very easy to grow and produce some of the finest of garden decorations. The Cockcomb or Cristata sorts are also valuable for drying for winter decorations. Seed may be started outdoors after warm weather comes or indoors earlier. The Chinese Woolflower sorts in white and yellow are novelties of recent introduction and will be most welcome.

COXCOMB or CRISTATA SortS

Pkt. 6 for Oz.
1082—DWARF MIXED, 12 to 15 inches...........................$ .15 $.75 $1.50
1083—TALL MIXED, 36 to 48 inches...............................10 $.50 .75

PLUMOSA SortS

1084—PLUMOSA YELLOW ...........................................10 $.50 .90
1085—PLUMOSA CRIMSON ...........................................10 $.50 .90

CHILDII or CHINESE WOOLFLOWER

1086—CHILDII CRIMSON ..........................................10 $.50 .75
1087—CHILDII PINK ..................................................10 $.50 .75
1088—CHILDII YELLOW .............................................15 .75 .....
1089—CHILDII WHITE ..............................................15 .75 .....

Centauraea (HO 24 in.)

This family of flowers comes as a great boon to people having but little time to devote to their flowers. Centaureas once sowed will bloom for a long time and take care of themselves. They are especially well adapted to sowing around fence corners and other out-of-the-way places. It is one of the popular old fashioned flowers and is good for bedding or for cutting.

Pkt. 6 for Oz.
1086—CYANUS DOUBLE MIXED, Batch'r Buttons$ .05 $.25 $.35
1088—IMPERIALIS MIXED, Royal Sweet Sultan...........10 $.50 .60
1089—GYMNOCARPA, Perennial. Dusty Miller.........$ .05 $.25 .40

CHINA PINKS, see Dianthus.

CHINESE WOOLFLOWER, see Celosia Childsii.

Clarkia (HO 18 in.)

Clarkias are of easy culture and require only moderately rich soil. Seed may be started in the open ground after frosts are over and the plants will bloom in a short while. For a bed or border of bright colors, there are few of the annuals that will do better than these.

1103—DOUBLE MIXED.—A beautiful favorite of the old fashioned garden. It is hardy and easy to grow and will bloom practically all summer. Pkt. 10c, 6 for 50c, oz. 60c.
Chrysanthemum
Maximum King Edw. VII

Cleome (HO 5 ft.)

1107—CLEOME PUNGENS.—Also known as the Spider Plant. A good tall plant of easy cultivation. Can be used to good advantage to hide fences and make background for garden. Blooms from summer until frost. Pkt. 5c, 6 for 25c, oz. 30c.

Chrysanthemum (HO 24 in.)

The plants grow fast and make compact bushes covered with dainty flowers of many forms and colors. It is one of the most useful for bedding and the flowers are good for cutting. If kept cut, they will bloom for months. Seed may be started outdoors early in spring.

Perennial Chrysanthemum (HH# 18 in.)

The Maximum or Shasta Daisy branch of this family makes most desirable additions to the hardy garden. If started early they will all bloom the first year from seed. The Japanese variety belongs to the florist class of chrysanthemum and will add novelty to your list of these flowers.

Pkt. 6 for Oz.

1100—MAXIMUM KING ED’D FII, White Shasta | $0.10 |
1098—DOUBLE JAPANESE HYBRIDS MIXED | $2.00 |

See Shasta Daisy for other varieties.

Cobea Scandens (HHX 25 ft.)

1100—COBEA SCANDENS BLUE.—A rapid growing vine for covering trellis. Flowers bell shape and of a blue color. In the North it is best treated as an annual, but in the South it will come year after year. Pkt. 10c, 6 for 50c, oz. $1.25.

Cockscomb, See Celosia Cristata.

Coleus (T# 30 in.)

1109—COLEUS HYBRIDUS MIXED.—These grow readily from seed, which should be started early indoors. Fine large plants may be obtained from seed and in the fall taken up and potted for house decoration. Many remarkable colors and combinations. Pkts. 20c, 6 for $1.00.

Columbine, see Aquilegia.

Convolvulus, see Morning Glories.

Coreopsis, see Perennial Callepoea.

Cornflower aster, see Stokesia.

Cosmos (HO 4 to 7 ft.)

One of the best of cut flowers for late summer and autumn blooms. Can be used very effectively to hide fences or for background.

DOUBLE COSMOS

Cypress Vine (HHO 15 ft.)

1110—CYPRESS VINE MIXED.—A most highly ornamental climber of easy culture. The foliage is very finely cut and resembles that of an asparagus fern. Flowers in bright colors. Pkts. 10c, 6 for 50c, oz. 60c.

Dahlia (T# 4 ft.)

Dahlias are easy to grow from seed and bloom the first year. The seed should be started indoors in the early spring and set out after warm weather comes. A light and very rich soil is needed. Many novel colors and forms may be obtained in this manner at a very small expense. These plants will make tubers, which should be taken up in the fall and stored during the winter.

Pkt. 6 for Oz.

1123—LARGE DOUBLE MIXED | $0.15 |
1124—SINGLE VARIETIES MIXED | $0.10 |

Datura (TO 30 in.)

1123—DATURA MIXED.—Also known as Angels Trumpet. It makes a most desirable bedding plant in warm climates and is one of our best pot plants. Large trumpet like flowers in bright colors. Pkt. 10c, 6 for 50c.
A cottage surrounded by flowers may well look with scorn upon a mansion on barren ground

Dianthus

Delphinium (H 4 ft.)

1110—Belladonna.—This we consider the finest of the Delphinsium or Perennial Larkspurs. Started indoors early in the spring, it will bloom the first year from seed. Flowers of light blue. Pkt. 20c, 6 for $1.00.

Delphinium (Annual sorts), see Larkspur.

Dianthus (HO 15 in.)

We all know and love the Pinks as these flowers are called. They are among the most useful and desirable of annuals and so very easy to grow. Sow seed outdoors early in spring in good rich soil and you will have a wonderful harvest of the brightest colored flowers.

1127—Single Chinese Mixed

Pkt. 6 for Oz.

1128—Double Chinese Mixed

1129—Single Hedgewig Mixed

1130—Double Hedgewig Mixed

1129—Double Morning Cloak—

Mahogany and white

1130—Double Fireball, deep red

1131—Double Alba, white

Dianthus Barbatus, see Sweet William.

Didiscus Caerulea, see Queen Anne's Lace Flower.

Digitalis (H 4 ft.)

1133—Gloxiniae Flora Mixed.—Commonly known as Foxglove. This is one of the flowers seen in the hardy gardens of our grandparents and is still most popular. Seed should be started early indoors. Plants are rather large and throw up bloom spikes covered with bright flowers, mostly in blue shades. Pkt. 10c, 6 for 50c, oz. 85c.

Dusty Miller, see Centaurea Gymnocarpa.

Eschscholtzia (HO 10 in.)

1131—Large Flowering Hybrids.—One of the daintiest of annuals for bedding or for edging walks. Flowers of good substances are borne in profusion in a short while after sowing. Colors mostly in shades or combinations of yellow. A good flower for scattering in fence corners or on large lawns to brighten them. Sow where plants are to remain. They do not stand handling very well. Pkt. 10c, 6 for 50c, oz. 60c.

Feverfew (HH 18 in.)

1137—Double Feverfew.—Fine bedding plant with double chrysanthemum-like flowers of white. Start seed early in spring indoors and transplant after warm weather comes. Pkt. 10c, 6 for 50c, oz. 75c.

Forget-me-not, see Myosotis.

Four O'Clock

Four O'Clock (HO 24 in.)

1136—Four O'Clock Mixed.—Fine bushy plants of upright and spreading growth, literally covered with white or pink flowers, which open in the evenings. Blooms all summer. Pkt. 5c, 6 for 25c, oz. 25c.

Foxglove, see Digitalis.

Gaillardia (HO 18 in.)

1140—Lorienza Double Mixed.—Popular and well-known flower of easy cultivation. Blooms for a long time and bears bright blossoms in red and yellow shades. Pkt. 10c, 6 for 50c, oz. 60c.

Geranium (T 18 in.)

1142—Zonale Mixed.—The finest of bedding or pot geraniums can easily be grown from seed. Sow indoors early in spring and transplant after warm weather comes. Plants grow rapidly and make large specimens by mid-summer. Colors mostly in reds and pink shades. Pkt. 15c, 6 for 75c.

Gilliflower, see Stocks.

Godetia (HO 15 in.)

1144—Dwarf Mixed.—A most desirable bedding and border plant bearing a profusion of blooms of satiny texture and in many rich colors. This is one of the flowers that do best in a rather poor soil. Pkt. 10c, 6 for 50c, oz. 60c.

Gourds (HO 6 to 12 ft.)

1145—Ornamental Mixed.—A mixture of the most ornamental of the small gourds. These are both useful after dried and decorative while growing on the vine. Pkt. 10c, 6 for 50c, oz. 30c.

Grasses (HO 2 to 6 ft.)

All of the ornamental grasses are easy to grow and do well on almost any soil. For sowing in fence corners, making hedges, or for making small circles on the lawn, nothing is better and many of them are very valuable for drying for winter decorations.

Pkt. 6 for Oz.

1146—Briza Maxima, Quaking grass... .10 .50 .35

1149—Colx Lachryma, Jobs Tears... .05 .25 .10

1146—Ornamental Grasses Mixed... .05 .25 .35

Helichrysum (HO 30 in.)

1153—Helichrysum Mixed.—This is the strawflower so highly prized for dried bouquets. Easy to grow and valuable for winter decorations. Colors principally red, white, blue, and pink. Pkt. 10c, 6 for 50c, oz. 60c.
Heliotrope (T 24 in.)

1154—HELIOTROPE MIXED.—A most desirable pot plant and good for bedding in summer. Requires moist rich soil and should not be put out until warm weather comes. Fragrant flowers in blue and white. Pkt. 15c, 6 for 75c.

Hibiscus (HO 24 in.)

1157—AFRICANUS.—Fine bushy plants with beautiful foliage and covered with very large almost flat blooms. Seed may be sown outdoors early in spring in light rich soil. Pkt. 10c, 6 for 50c, oz. 50c.

Hollyhocks

The annual Hollyhocks are a most valuable hedge or screen for the annual garden and the perennial varieties will grow well in the hardy garden. These are among the popular old garden favorites and will add a blaze of glory to the garden during June and July. Both kinds may be seeded outdoors very early in the spring.

HUMULUS JAPONICA, see Japanese Hop Vine. IBERIS, see Candytuft. IMPATIENS, see Balsam.

Ice Plant (HO 6 in.)

1160—ICE PLANT.—A most novel pot or border plant of easy culture. The foliage is long, triangular, and its green surface seems to be covered with crystals. Pkts. 10c, 6 for 50c.

INDIA PINKS, see Dianthus. INSECT POWDER PLANT, see Pyrethrum. IPOMOEA, see Moonflower, Cypress Vine, Cardinal Climber.

Japanese Hop Vine (HO 20 ft.)

1167—GREEN LEAVED.—The hop vine is both useful and decorative, and is often used for covering trellis or porch. One of the most rapid growing of all vines and is covered with dense foliage. Pkt. 10c, 6 for 50c, oz. 60c.

Jerusalem Cherry (TO 12 in.)

1169—JERUSALEM CHERRY.—One of the best pot plants for house decorations. Grown for its highly ornamental fruit, which is borne in great profusion and is highly colored. Pkt. 10c, 6 for 50c.

Kochia (HO 3 ft.)

1170—CHILDSS.—As an annual hedge or for specimen plants for tubs or to set around the garden or lawn, nothing better can be had. It is very easy to grow and its fine foliage is very ornamental. Grows in symmetrical form like a well trimmed plant and in the late autumn turns red. Pkt. 5c, 6 for 25c, oz. 50c.

Lantana (T 24 in.)

1172—MIXED.—Deep green foliage with bright flowers like those of Verbena. Colors run in white, red and yellow. Good for pots or for bedding in summer. Decorative and fragrant. Pkt. 10c, 6 for 50c, oz. 75c.

Larkspur (HO 1 to 2 ft.)

The upright plants with their bright flowers make a most desirable border for beds of tall flowers or for edging walks. They are very easy to grow and seed may be put outdoors early in the spring.

For Perennial Larkspur see Delphinium.

Lathyrus Latifolius (H HHO 8 ft.)

1291—MIXED.—Also known as Perennial Sweet Peas or Everlasting Peas. Its growth and flowers are very similar to that of the Sweet Pea and once this flower is planted it will continue to bloom practically all summer for years. It is a perennial and very hardy. Flowers principally in white and pink. Pkt. 10c, oz. 60c, 1/2 lb. $1.75.

Lobelia (HHO 8 in.)

1182—CRYSTAL PALACE COMPACTA.—These fine little plants of compact growth with their clean green foliage and bright blue flowers are most desirable for ribbon beds or for pot culture. Also good for edging dwarf beds. Pkt. 15c, 6 for 75c.
Marigold (HO 1 to 4 ft.)

Some of the better sorts of Marigold are among the best of flowers. The Orange Ball varieties being among the most beautiful in cultivation. It is a hardy flower of easy culture and doing well in any light rich soil.

Pkt. 6 for Oz.
1183—TALL DOUBLE ORANGE BALL (African). $ .10 $ .50 $ .75
1184—DWARF DOUBLE GOLDEN BALL (French) .05 .25 .45
1185—DWARF SINGLE MIXED (French) .05 .25 .30

MATRICARIA, see Feverfew.

MARVEL OF PERU, see Four O’Clock.

MATIOLA, see Stocks.

MESEMBRANTHEMUM, see Ice Plant.

MEXICAN FIRE BUSH, see Kochia.

Mignonette (HO 12 in.)

A dainty little flower of surpassing fragrance and greatly prized, both for its bright colors and sweet odor. Blooms in a very short while from seed and will prove highly valuable for cut flowers.

Pkt. 6 for Oz.
1187—GOLIATH, red $ .10 $ .50 $1.00
1188—GOLDEN QUEEN, bright yellow .10 .50 .85
1189—WHITE PEARL, pure white .10 .50 1.25
1190—MIXED .10 .50 .75

MIRABILIS, see Four O’Clock.

MOLE PLANT, see Ricinus.

MOMORDICA, see Balsam Apple and Pear.

Moonflower (TO 20 ft.)

1193—WHITE MOONFLOWER.—A very popular vine for covering porches or trellis. Seed are very hard and should be notched and soaked before planting. In northern latitudes, seed should be started indoors. Large white flowers like those of the Morning Glory cover the vine at night. Pkt. 10c, 6 for 50c.

Morning Glories (HO 1 to 8 ft.)

Morning Glories have their place in the flower garden and are often found most valuable for covering fences, low trellis, or for bedding. They add a vivid color scheme and have the advantage of being the easiest of flowers to grow.

Pkt. 6 for Oz.
1196—FRINGED JAPANESE MIXED .10 .50 .55

MOSS ROSE, see Portulaca.

MOURNING BRIDE, see Scabiosa.

Myosotis (HH# 8 in.)

1199—ALPESTRIS BLUE.—These beautiful little blue flowers, better known as Forget-Me-Not’s are highly prized for dwarf beds and for use in connection with other small flowers. Do best in moist shady locations. Pkt. 10c, 6 for 50c, oz. 95c.

Nigella (HO 18 in.)

1215—MIXED.—This flower thrives in almost any soil and is of easy culture. Flowers principally in blue and white. Blooms practically all summer and then throws seed pods of queer appearance. Pkt. 10c, 6 for 50c, oz. 55c.

Nasturtiums (HO 8 to 72 in.)

Even the amateur gardener can reap loads of blossoms from a bed of nasturtiums. And nothing can rival their bright colors. The nasturtiums delights in a rather dry and poor soil. Too much manure will make a luxuriant growth of vine and few flowers. Plant seed outdoors where they are to remain, after danger of frost is over. Cover one inch deep and thin to stand four to eight inches apart. The dwarf kinds grow about twelve inches high and the tall about four to six feet.

DWARF SORTS

Pkt. Oz. ¼-lb.
1200—DWARF YELLOW, green foliage $ .05 $ .10 $ .30

Nemesia (HHO 12 in.)

1213—LARGE FLOWERING MIXED.—Excellent for pots or for garden culture. They grow readily from seed and are in bloom in a few weeks after sowing. Many bright colors are present. Pkt. 15c, 6 for 75c.
**Pansy**

Pansy (H. # 6 in.)

This flower needs no introduction to the American gardener. Its requirements are a moist, shady position, very rich soil, and watering during the blooming period. Seed started outdoors in February or March in covered beds should produce blooms the same year. Seed sowed in June and kept in covered frames during severe weather will produce winter and early spring flowers.

**Petunia (T. # 10 to 18 in.)**

Petunias make the finest of bedding flowers owing to their long blooming period and the mass of blooms they make. Seed may be started indoors early in the spring or put outside after warm weather comes and they will bloom in a short while and last until frost. Plants may be taken up, cut back, and potted for winter in the fall. For window boxes there is nothing better than Petunias.

Double Poppy

Queen Anne’s Lace Flower (TO 36 in.)

1258—QUEEN ANNE’S LACE FLOWER.—A novelty in flowers that is easy to grow but requires a little care in planting. Sow seed indoors early in the spring and transplant to moist, shady location after warm weather comes. Blooms all summer and bears lace-like lavender flowers on long stems. Pkt. 6 for 75c.

Ricinus (HHO 8 to 12 ft.)

1259—ZANZIBARIENSIS.—This is a most useful and decorative plant. It can be used for shade for flower beds or lawn, and its tropical, luxuriant growth is always to be admired. Plant seed outdoors after warm weather comes and in a very rich soil. Pkt. 5c, oz. 20c.

Salpiglossis (HHO 24 in.)

1260—EMPEROR MIXED.—An unusual flower of simple culture. The flowers are tubular and veined in many rich color combinations. A coppery color seems to run through them all. Seed may be started early indoors or planted outside after warm weather comes. Blooms from mid-summer until autumn. Pkt. 10c, 6 for 50c, oz. $1.50.

Salvia (T 2 to 3 ft.)

The Salvias rank among our most important bedding plants and go remarkably well with many autumn blooming flowers. The foliage is a very deep green, over which the long heads of red and lavender blue flowers come to make a most striking bed. Salvia seed may be started indoors early or outside after warm weather comes.

1261—SPLENDENS, Tall scarlet sage $ .15 $ .75
1262—AMERICA, Semi-dwarf scarlet sage .25 1.35
1263—FARINACEA, Tall lavender blue sage .15 .75

Scabiosa (HO 24 in.)

1264—LARGE FLOWERED DOUBLE MIXED.—Commonly known as Mourning Bride. This is an annual of easy culture and often scattered about the grounds to attract butterflies. Blooms practically all summer. Pkt. 5c, 6 for 25c, oz. 50c.

SCARLET SAGE, see Salvia.

Schizanthus (HO 18 in.)

1265—W’SEETONENIS.—A most useful annual and very easy to grow. Seed may be started indoors early in spring or outdoors after warm weather comes. A good pot plant. Ornamental foliage resembling a fern and flowers in many rich combinations. Pkt. 10c, 6 for 50c.

SENSITIVE PLANT, see Mimosa.

Scabiosa

Scarlet Sage, Salvia

Shasta Daisy (H 18 in.)

1266—KING EDWARD VII.—This is a very early and prolific bloomer and will continue to bloom practically all summer. Seed may be started indoors very early in the spring will produce blooms the first year. Flowers of good size, daisy-like and white. Pkt. 10c, 6 for 50c, oz. 90c.

Stocks (HO 18 in.)

1267—DWARF GERMAN TEN WEEKS MIXED—$ .10 .50 1.00
1268—CUT AND COME AGAIN MIXED, or Beauty of Nice 1.00

SNAPDRAGON, see Antirrhinum.

SOLANUM, see Jerusalem Cherry.

SPIDER PLANT, see Cleome.

STRAWFLOWER, see Helichrysum.

SUMMER CYPRESS, see Kochia.

TITHONIA

THE WONDER FLOWER

1269—SPECTOSA.—Beyond a doubt this plant gives more beautiful cut flowers than any other in cultivation. The plants grow very tall and make immense bushy which are literally covered with bright flowers on long graceful stems. The flowers are single, of a bright orange vermilion color, and resemble African Marigolds in form. They are especially desirable for baskets and vases. The seed should be started out doors after warm weather comes. Any rich soil will grow them. The plant is very easy to grow and begins to bloom in a short while. For a tall background or screen nothing better can be found.

Pkt. 25c, 3 for 50c.
Sunflower, Stella

Thunbergia (HO 4 ft.)
1294—ALATA MIXED.—Better known as Blackeyed Susan and a favorite pot and bedding border. Makes a dense mass of foliage and bears an abundance of blossoms of varied colors, all with black eyes or centers. Pkt. 10c, 6 for 50, oz. $1.00.

Sunflower (HHO 2 to 8 ft.)
We all know these useful flowers. They thrive in almost any soil and are very valuable for garden decoration, cutting, and for screens, or backgrounds.
Pkt. 6 for Oz.

1273—DOUBLE CHRYSANTHEMUM, FLD., 6 ft. Yellow........................................................................ .10 .50 .45

Sweet William (H 18 in.)
Start seed very early in the spring indoors and transplant after severe frosts are over. Or seed may be sowed outdoors very early and given a slight covering of litter. Early sowing is essential if flowers are desired the first year. After the first year a great profusion of blooms are to be had in the bright colors. We consider this one of the best of hardy perennials.
Pkt. 6 for Oz.
1292—DOUBLE MIXED ................................................................... $ .10 $. .50 $1.00
1293—SINGLE MIXED .................................................................... .10 .50 1.00
1302—SCARLET BEAUTY ................................................................ .10 .50 1.00
1303—PINK BEAUTY ..................................................................... .10 .50 1.00

Verbena (HH 12 to 15 in.)
A favorite bedding plant which may be perennial in the South, but is best treated as an annual. Blooms in a short while from seed and can be sowed outdoors early in the spring. One of the brightest of flowers and its dwarf growth makes it especially desirable for dwarf beds. Also good for pots or window boxes, blooming all summer.
Pkt. 6 for Oz.
1297—MAMMOTH WHITE ................................................................ $ .10 $. .50 $1.25
1298—MAYFLOWER, bright pink ................................................ .10 .50 1.25

Vinca (T 18 in.)
The Viola or Periwinkle is a most desirable bedding plant owing to its resistance to dry weather and hot sun. It is a perennial, but blooms readily from seed the first year. Start early indoors or after the weather gets warm outdoors. Blossoms of pink and white.
Pkt. 6 for
1304—MIXED, white and pink .................................................................. 1.5 .75

Gold Medal Zinnias
1321—GOLD MEDAL MIXTURE.—This mixture of Zinnias was grown by the same man and from the same strain that carried away the Royal Horticultural Society gold medal in 1924. We consider it the last word in Zinnias. These plants, if properly cared for, will produce mammoth blooms, rivalling the dahlia in its perfection. The plants are robust and will grow under almost any conditions like the ordinary Zinnia, but they like moist rich loam soil. The flowers are of immense size, perfect form, and embrace the richest of colors. We have secured this mixture at extra expense with the understanding that it will contain a full range of colors.
Pkt. 25c, 3 for 50c; oz. $1.00.
Slate’s Sweet Peas

The Sweet Pea is the most popular of all annual flowers, and it is of such easy culture that even the inexperienced may expect wonderful results from them. In the South, early planting of Sweet Peas is necessary in order to get perfect blooms and in any climate early planting is advisable, because it prolongs the blooming season. The time for sowing is as early in the spring as the soil can be worked. Dig the deep and clop it into good working condition. Lay off rows 30 inches apart and eight inches deep. Cover the bottom of the trench with three inches of fine manure, on top of this two inches of soil, sow the seed in a thick drill, and cover with light soil, enough to fill the trench. A covering of boards, straw, or manure should then be given as protection. Sweet Peas should always be planted thick and not thinned. If the vines are thick and foliage dense the flowers will be much better. When spring opens remove the covering and give the young plants frequent cultivation. A support of twine, wire, or brush should be supplied.

1230—INSPIRATION.—This new sweet pea was offered to our trade for the first time in 1925. We have found it to be an introduction of great merit. The blossoms are large and borne on sprays of four, each being of perfect form and having the true Spencer wave. The color is a pure white, but the edge of each flower is tinted in the softest imaginable shade of rose-pink. Everything about this flower suggests grace, beauty, and refinement and it has the delightful fragrance of orange blossoms.

Pkt. 10c, oz. 30c, ½ lb. $1.75, lb. $6.00, postpaid.

1231—IMAGINATION.—All gardeners who love rich bold colors will glory in this magnificent new sweet pea. It is a robust growing Spencer with long stems and glossy bright foliage. The flowers are very large and of a beautiful shade of crimson which deepens at the throat. We consider that in this new sweet pea we have the finest self-colored crimson in the world today. It will live with the gardeners who appreciate the best in sweet peas, because real beauty, and worth, cannot be depreciated by age.

Pkt. 10c, oz. 30c, ½ lb. $1.75, lb. $6.00, postpaid.

1230—IMPROVED KING WHITE.—This variety is entirely free from any color and we consider it the finest white. It is strong, free flowering and of exquisite form and texture.

Pkt. 10c, oz. 35c, ½ lb. $1.00, lb. $3.50, postpaid.

1231—DAINTY.—The flowers are large, well frilled, and have a beautiful pink edge on white ground. As its name implies, it is one of the most dainty of sweet peas.

Pkt. 10c, oz. 30c, ½ lb. 90c, lb. $3.00, postpaid.

1232—DAISY BUD.—This is an extra large and beautiful waved flower borne on good stems. The color is a combination of apple blossom tints with a suffusion of cream pink.

Pkt. 10c, oz. 30c; ½ lb. 90c, lb. $3.00, postpaid.

1233—BARBARA.—This is the finest salmon colored sweet pea. The vines are vigorous and give a profusion of the richest colored blossoms.

Pkt. 10c, oz. 30c, ½ lb. 90c, lb. $3.00, postpaid.

1234—CARESS.—The immense well formed flowers are beautifully frilled and borne on strong vines. The color is a soft rich salmon color deeply toned down with salmon. The blooms are very large and waved. We consider this one of the finest of the pinks.

Pkt. 10c, oz. 35c, ½ lb. $1.00, lb. $3.50, postpaid.

1277—HAZELMARK PINK.—The color is a beautiful shade of rich rose pink, shaded with salmon. The wings are bright rose pink. The standards are somewhat lighter in color and slightly toned down with salmon. The blooms are very large and waved. We consider this one of the finest of the pinks.

Pkt. 10c, oz. 35c, ½ lb. $1.00, lb. $3.50, postpaid.

1296—ROSLIND.—The large petals are charmingly waved and fringed and carry a bright vivid color. In every respect this is a most attractive flower.

Pkt. 10c, oz. 30c, ½ lb. 90c, lb. $3.00, postpaid.

1297—BRILLIANT.—This is a brilliant cherry-rose with large flowers borne in fours on long stems. Its bright colors combined with free blooming habit makes this a most desirable sort.

Pkt. 10c, oz. 30c, ½ lb. 90c, lb. $3.00, postpaid.

1289—MRS. C. P. TOMLIN.—This brilliant scarlet sweet pea is the most showy to be found and will add a flame of color to any garden. The flowers are of great substance and do not fade in bright sunlight. It is a vigorous grower, prolific bloomer, and its vivid color always brings forth admiration.

Pkt. 10c, oz. 45c, ½ lb. $1.35, lb. $4.50, postpaid.

1290—SELECT ECKFORDS MIXED.—The Eckfords are a popular strain of the large flowering sweet pea and this mixture is composed of the finest named varieties mixed to give a full range of colors.

Pkt. 5c, oz. 15c, ½ lb. 45c, lb. $1.25, postpaid.
The Lady of Hyco

Our Ten Best Dahlias

Each year we conduct extensive trials of dahlias from all over the country. Every variety that appears worthy is given a trial in our gardens. It is from these trials that we have picked the ten varieties listed here and we are confident that their large size, perfect blossoms, long stems and other good qualities, will convince you that we have picked a winning team. In selecting these varieties we have picked them for size of blossoms, length of stems, beauty in form of blossoms, color, and general good habits of the plants.

5553—THE LADY OF HYCO.—We are naturally proud of this, the first dahlia we have ever named and because it was our first we have tried to secure a flower that would win a reputation for itself. The Lady of Hyco is a decorative flower which is the most useful and beautiful of all the dahlia family. The blossoms are perfectly formed out of long curved petals which twist into exquisite forms. The color is a delicate lavender pink which is certain to captivate the hearts of all dahlia lovers. The plants are robust and profuse bloomers. The blossoms are very large and solid, retaining their beauty for a long time whether cut or on the bush. The stems are very long, making it one of the best cutflower varieties, and its perfect blossom of such rare coloring is certain to make it one of the most popular of all dahlias.

Price, $1.00 each, postpaid.

5540—COUNTESS OF LONSDALE.—This variety offers some variation from the usual colors as well as a flower of great beauty. It is a cactus dahlia, bearing large flowers of good form, and its color is a most attractive heliotrope. There are few sorts as good as this one that can be had at such a reasonable price.

Price, 30c each, 3 for 75c; doz. $2.25, postpaid.

5554—PATRICK O'MARA.—The first time we saw this new variety, we realized that it was a fit subject for our hall of fame. It is a flower that is never to be forgotten when you have once seen it. The stalks are very stout and rather tall, with good foliage. The flowers are of unusual size, perhaps the largest of any we list, and belong to the Decorative type, but differ somewhat in form from The Lady of Hyco. The color is old gold and each petal has a bright sheen as though dusted with gold. Long stems make it a good cutflower variety and we offer it with the assurance that it is well worth the price.

Price, $1.00 each, postpaid.

5541—KALIF.—This is a most remarkable dahlia and one whose bright coloring will stand out above all others. It is a large flowered hybrid-cactus, whose blossoms are solid, perfectly formed, and have a vivid turkey red color. The unusual beauty of this flower will attract all dahlia lovers and its bright color never fails to command attention.

Price, 50c each, 3 for $1.00; $3.00 doz., postpaid.

5547—DUTCHESS OF BRUNSWICK.—We have been growing this dahlia for some years and have previously pronounced it to be the finest Peony dahlia in our collection. The outer petals are wide and spreading while the center ones are more cupped to make a perfectly double flower. Its color is a rich apricot at the tips of the petals, shaded to a bronze. This bronze becomes more intense towards the center of the flower.

Price, 40c each, 3 for $1.50; doz. $2.50, postpaid.

5556—DEE LIGHTED.—This is the dahlia which is credited with a smile. It was named after the famous smile of our Teddy Roosevelt. It is an immense flower of pure white with long stems. We have never seen a finer white dahlia. It belongs to the Decorative type, and often produces blossoms six to eight inches in diameter.

Price, 50c each, 3 for $1.00; $3.00 doz., postpaid.

5533—MRS. ROOSEVELT.—For the lover of the softer shades, it is hard to find a more pleasing dahlia than this. It is a decorative with large flowers, long stem, and the color is a bright silver pink. It carries that delicate tone of refinement which is so often lacking in the more vivid colors.

Price, 50c each, 3 for $1.00; $3.00 doz., postpaid.

5549—PRINCE OF YELLOW'S.—This is a beautiful cactus dahlia, having a pure yellow color which is not deep enough to call it golden, yet too deep to call it lemon. It is a soft tint that blends well with other colors and makes this sort invaluable for the dahlia bed. It is a good robust grower and carries a flower of great substance that does not fade easily.

Price, 40c each, 3 for $1.50; $2.50 doz., postpaid.

5543—ELECTRA.—The largest dahlia blossoms we have ever seen were grown from this variety. It is a poony flowered sort and with ordinary care will produce enormous flowers of perfect form and a deep lavender color. It has good stem length and is in all respects a grand dahlia.

Price, 50c each, 3 for $1.00; $3.00 doz., postpaid.

5534—QUEEN OF HEARTS.—This variety, with careful handling, will produce large flowers, but the average is a medium size. Its greatest attraction is the novel form of the flower and its exquisite coloring. The blossom is a true cactus type, beautifully curled. The color is a pure white at the tips and shaded to a deep lemon at the bud. The blending of these gives a shading of double effect and which sets off the dainty shape of the blossom to perfection.

Price, 40c each, 3 for $1.50; $2.50 doz., postpaid.

5527—SPECIALTY COLLECTION.—One each of our ten best dahlias, each bulb labeled, a total value of $5.50, will be sent postpaid for $4.50.
Camel Flora Dahlia

Slate’s Dahlias

The Most Gorgeous of Flowers

There is no flower that gives more blossoms from a single plant than a well grown dahlia and the flowers rank among the most desirable of all, both as a cut-flower and as garden decoration. The roots may appear high when the price each is considered, especially the better kinds, but when you consider the number of large beautiful flowers that will come from one root, you pay less per flower for dahlias than most any other. Then dahlias are very easy flowers to grow and almost anyone may succeed with them. But they like attention and always pay handomely for it. Plant the roots as early as possible after warm weather comes. The ground should be dug deep and thoroughly pulverized. If fertilizer is used, let it be a good grade of commercial goods and not stable manure. Manure may be used before planting or it may be scattered over the hills after planting is finished. Lay the bulbs down flat, never stand on end. Cover them from four to six inches deep and drive a stout stake within a few inches of the bulb when planted. As soon as the young plants appear above ground, commence cultivating and keep it up until late in the summer. When the plants have made two sets of branches the tops may be pinched out and then these branches will develop, causing the plant to make a more spreading growth instead of running up so high. When the buds appear a dusting of Arsenate of Lead may be found necessary as bugs sometimes eat the buds.

A Dozen Beauties

In this list we offer the best of the standard dahlias. It is the next best thing to our ten best. These are all excellent sorts, picked for real merit. In this list we found sorts just as beautiful as some of the newer and higher priced kinds. We are now growing our own dahlia roots and have an opportunity to get first hand information as to the merits of each kind.

Price of the following list of select named kinds is 25c each; $2.00 dozen, postpaid. One each of the twelve properly labeled will be supplied for $2.25.

5514—CAMELLIA FLORA, Show, Pure White.
5519—COUNTRY GIRL, Cactus, Golden Yellow.
5543—TACKAL, Peony, Large Scarlet and Gold.
5546—FEEDBARG, Peony, Large White Flaked Crimson.
5532—KRIEMHILDE, Cactus, Delicate Pink.
5537—MADAME VAN DEN DAELE, Decorative, Silver-Pink.
5545—PERLE DE GYON, Decorative, Pure White.
5539—PRINCESS LOUISE VICTORIA, Decorative, Deep Pink.
5555—SOUVENIR DE GUSTAV DOZON, Decorative, Scarlet Red.
5559—STRAFFEN KNÖB, Cactus, Rich Cardinal Red.
5559—WILLIAM AGNEW, Decorative, Bright Red.
5544—W. W. RAWSON, Show, Delicate Lavender.

Eight Cheap Dahlias

For the person who wishes an abundance of flowers at a remarkably low price, we offer these varieties. They are all prolific bloomers and contain many sorts which were famous in days gone by. We have a surplus of these so offer them at reduced prices.

Price of the following list of named kinds is 15c each, $1.20 dozen, postpaid. One each of the eight kinds, properly labeled, will be sent for $1.00.

5555—CRIMSON BEAUTY, Show, Rich Crimson.
5559—CRIMSON CENTURY, Single Bright Red.
5553—JACK ROSE, Decorative, American Beauty Red.
5556—MIXA BURGLE, Decorative, Deep Scarlet.
5551—TWENTIETH CENTURY, Single. White and Red.
5552—YELLOW DUKE, Decorative. Primrose Yellow.
5551—HARZER KIND, Cactus. Bright Pink and White.

5550—MIXED DAHLIA ROOTS.—This is a mixture made up of all varieties that we list, including some of the highest priced kinds. We try to keep this mixture well balanced and make it representative of our stock, consequently it is a good purchase for anyone who wishes a variety of flowers and cares nothing for the names.

Price—$1.50 doz., 25 for $2.75, postpaid. $8.00 per 100, by express.

5529—MIXED SEEDLING DAHLIA.—Seedling dahlias always produce many novelties. The flowers are always in many different forms and it is hard to find any two sorts alike. This mixture will appeal to lovers of unusual dahlias and it contains many flowers of great merit.

Price, 25c each, $2.00 dozen, postpaid. $15.00 per 100, by express.
Caladiums

Caladiums are a garden necessity, because they fill a place no other plant can take. For garden decoration they supply a wealth of tropical foliage which is very ornamental. Then they may be planted in tubs for porch decoration and give a wonderful effect in this manner. They are commonly known as "Elephant Ears" because their large leaves have the shape of an elephant's ear. The foliage is usually green, of bright appearance and remarkably clean at all times. The bulbs should be planted after warm weather comes and set several inches down in the soil. They require a very rich soil and stable manure makes an ideal fertilizer for them. If kept in partial shade they will do better, but may be grown in the full sunlight if desired. Give plenty of water at all times. These bulbs are shipped along with the remainder of the order unless specially requested that we hold them.

5501—CALADIUM ESCULENTUM.—Commonly this variety is called Elephant Ear because the large leaves bear a very striking resemblance to the ears of an elephant. These bulbs are offered in two sizes. This is the smaller of the two, which measures 7 to 9 inches in circumference. A good size for pots.
Price, 15c each, $1.50 doz., postpaid. $1.20 doz., by express.

5502—CALADIUM ESCULENTUM.—The same as above except the bulbs are the large size, measuring 9 to 11 inches in circumference. An ideal size for outdoor planting or putting in large tubs.
Price, 25c each, $2.50 doz., postpaid; $2.00 per doz., by express.

Zepheranthes

These flowers belong to the Amaryllis family, but are hardy south of Virginia. From Virginia north, they should be taken up each fall and stored in a basement. As a border plant or for small beds they are excellent. The foliage is ornamental and they make good pot plants. If desired, the bulbs may be lifted in the fall and potted for indoor decoration through the winter. The soil should be a light loam.

5706—ALBA.—This variety gives a pure white flower of dainty appearance. The foliage is of a deep green color, round, and luxuriant. It is desirable both as a border plant in the garden or for pot culture.
Price, 3 for 10c, 25c doz., $1.50 per 100, postpaid.

Tuberose

One of the most fragrant flowers that can be grown. Make excellent pot plants or can be bedded in the garden and will add a great deal to any flower plantings. Set bulbs after warm weather comes in a deep rich soil that has a liberal quantity of manure in it. Cover three inches deep and set bulbs four to six inches apart. Keep moist but not wet. They will stand the fall and may be grown in partial shade.

5503—DOUBLE DWARF PEARS.—The most popular tuberose in cultivation. Throws flower spikes three feet high and fully covered with double fragrant blossoms. This is the standard commercial size bulbs, being four to five inches.
5c each, 45c doz., $3.00 per 100, postpaid.

5504—DOUBLE DWARF PEARS.—The same variety as above, but mammoth bulbs. These are especially desirable for pot culture. 10c each, 90c doz., $5.00 per 100, postpaid.

5505—VARIEGATED.—A single variety having foliage edged with white. Makes one of the best varieties for edging walks or beds. Flowers very fragrant and four feet high.
5c each, 45c doz., $5.00 per 100, postpaid.

5506—ALBINO.—A tall early variety producing very fragrant single flowers.
5c each, 45c doz., $5.00 per 100, postpaid.

Amaryllis

We consider this the most showy flower to be had. Its blossoms are very large, erect, and carry such bold colors that it never fails to attract attention. It is a rather tender plant and should never be exposed to very cold weather. It may be started in pots in the house at any time, but outdoor plantings should never be made until hot weather comes. Any light soil will grow them.

5708—HIPPEASTRUM EQUESTRE.—Large bright red flowers are borne on stiff erect stems over flat, light green foliage. It is a most desirable pot plant or if planted in clusters will make a riot of color in the garden.
Price, 25c each, 3 for 50c, 75c doz., postpaid.

Madeira Vine

A favorite old vine for covering porches, trellis, etc. It grows from a bulb, hence is more certain than those growing from seed. Plant as soon as danger of frost is over in a light rich soil and it will make rapid growth.

5705—MADEIRA VINE.—Select roots that will make strong plants in a short while.
Price, 10c each, 3 for 25c, 60c doz., postpaid.

Oxalis

The summerflowering oxalis have such a wide range of use, are so inexpensive, and require so little attention that every flower lover should grow them. They may be planted in beds in the garden or used for borders. They are a great favorite. Any soil will grow them. Partial shade is preferred, but they will do well in the full sunlight. As a pot subject or for hanging baskets nothing is better. A dozen bulbs in a seven- or eight-inch pot will produce a mass of blossoms all summer. They commence flowering within a few weeks after planting and last until frost.

5703—LASANDRIA.—A novel pink sort, throwing up tall flower stems above odd leaves. The foliage is cut and bears red markings.
3 for 10c, 12 for 25c, $1.50 per 100.

5701—DEPPEL.—This is a most dainty little flower. The blossoms are small and pure white. The foliage is like that of a young clover plant of a clear green color. The small bulbs will make a mass of foliage and a wealth of blossoms in a short while.
3 for 10c, 12 for 25c, $1.50 per 100.

5702—SHAMROCK.—This variety has flowers of the same size as the Deppel and foliage alike but the blossoms are of a bright cerise pink. This sort and the Deppel when planted together are most desirable for pot, window box, or bed.
3 for 10c, 12 for 25c, $1.50 per 100.

5704—MIXED.—Pink and white.
3 for 10c, 12 for 25c, $1.50 per 100, 500 for $5.00, postpaid.
Slate’s Superb Gladioli

MAKE THE GARDEN RICH WITH COLOR

Nothing can rival the gladiolus for a gorgeous range and combination of colors as a good-keeping cutflower. It is very hardy and the easiest of all flowers to grow. They thrive in almost all soils but a rich loam grows them nearer perfection than any other. In order to get the real value out of Gladioli they should be planted in clumps, masses, or large beds. A straggling flower here and there never gives one the full beauty of the flowers. In the latitude of Virginia, April 1st is the time to begin planting. Set the bulbs six inches apart each way and cover them four inches deep. Give frequent shallow cultivation. For a succession, plantings should be made four weeks apart until July 1st. We are now offering our trade Gladioli bulbs grown upon our Hyco farms. We offer here only select large bulbs, but should anyone wish No. 2 or 3 bulbs we will be glad to name special prices. Our list is made up after a very careful study of the numerous kinds now to be had and we believe that we are offering the best varieties regardless of price.

5601—AMERICA.—This old but still very popular variety produces large strong flowers on a tall spike. The blossoms are a delicate lavender pink.
6e each, 45c doz., $2.50 per 100, postpaid.

5602—SCHWAEN.—The spikes are of medium length, but perfectly filled with large blossoms of light yellow with a dark blotch in the throat.
6e each, 60c doz., $3.50 per 100, postpaid.

5603—MRS. F. PENDLETON.—This is one of the most beautiful of Gladioli. The blossoms are of a beautiful shape and compactly placed on a strong spike. The color is a soft rose-pink with a blood-red blotch in the throat.
6e each, 60c doz., $3.50 per 100, postpaid.

5604—NIAGARA.—This beautiful flower is made up of yellow shades into which is cast a slight pink flush which melts into a red throat. It is a grand variety that should be in every garden.
6e each, 60c doz., $4.00 per 100, postpaid.

5605—WAR.—Undoubtedly the finest red Gladioli in cultivation. The flower spikes are medium tall and well filled with large blood-red blossoms which are slightly darker at the throat. It is a most attractive color and a fine flower combined.
6e each, 60c doz., $3.50 per 100, postpaid.

5614—LE MARECHAL FOUCH.—One of the earliest varieties and a leading sort with florists. The spikes are tall and filled with delicate pink blossoms of unusually large size.
6e each, 60c doz., $3.50 per 100, postpaid.

5617—MRS. FRANCIS KING.—The bright flame red blossoms of this sort attract attention at all times. It is one of the most gorgeous flowers, a robust grower, and in every respect a most desirable sort.
6e each, 60c doz., $3.50 per 100, postpaid.

5606—BARON JOS. HULTO.—No variety carries the blue effect any better than this. It is a strong grower with large flowers of rich deep indigo which gets lighter in the throat.
10c each, 1.00 doz., $7.00 per 100, postpaid.

5607—CRIMSON GLOW.—A new variety that is said to be the finest crimson yet offered. The tall spikes carry a mass of brilliant crimson flowers which run into a darker shade at the throat. The blossoms are large, beautifully formed and of a texture that sets off the vivid color.
10c each, 1.00 doz., $7.00 per 100, postpaid.

5608—EFELYN KIRLAND.—From a delicate silver pink throat the blossom shades into rosy pink petals with darker edges, while the lower petals are blottedch with scarlet.
7c each, 70c doz., $4.00 per 100, postpaid.

5609—FLORA.—A beautiful canary yellow that is almost free from other markings. A flower of wonderful beauty.
7c each, 70c doz., $5.00 per 100, postpaid.

5610—GRETCHEN ZANG.—This is one of the finest of rich deep pink flowers which flares into scarlet on the lower petals. A most popular and desirable sort.
8c each, 80c doz., $5.00 per 100, postpaid.

5612—HALLEY.—The earliest Gladioli known and a superb flower in addition. The spikes are tall and strong and filled with large blossoms of rich salmon pink with a touch of crimson penciled on the lower petals.
5c each, 50c doz., $3.00 per 100, postpaid.

5613—GLORY OF KENNEMERLAND.—A gorgeous combination of crimson, yellow, and a rich pink. The throat is made up of a crimson blotch on yellow ground and this fades into a rich rose pink petal.
6c each, 60c doz., $4.00 per 100, postpaid.

5615—LILY WHITE.—A pure white flower combined with tall spike, robust growth, and beautifully formed petals.
6c each, 60c doz., $4.00 per 100, postpaid.

5616—MRS. DR. NORTON.—This new sort is creating a sensation among Gladioli growers, and carrying away honors at the shows. The flowers are large and of beautiful form. The throat is a primrose shading to a delicate cream pink with a yellow blotch on lower petal.
8c each, 80c doz., $5.00 per 100, postpaid.

5619—XORA.—A dainty light violet blue of pleasing appearance. A distinct color and a large flower.
6c each, 60c doz., $4.00 per 100, postpaid.

5620—PRINCE OF WALES.—Beautiful salmon pink with a few tints of orange to make the effect of that of a most gorgeous nature.
8c each, 80c doz., $5.00 per 100, postpaid.

5600—SLATE’S SELECT MIXTURE.—This is composed of countless varieties and never fails to give a wonderful range of color.
5c each, 45c doz., $2.50 per 100, postpaid.
Slate’s Canna Roots

ELEVEN CHOICE VARIETIES

The canna is one of the most useful of flowers and one that lends itself well to any surroundings. It will be found in the stately grounds of the mansion or around the border of the lowly cottage. There is a place around every home that needs canna and no other flower will fill this place so well as the canna. It is a flower that can be neglected for weeks without showing the neglect, or it can be given the best of attention and will repay you in its beauty. The canna’s needs are simple. Give them a light soil into which a large quantity of manure has been dug. Beyond this it only requires sunlight and water. The dormant roots can be put out as soon as heavy frosts are over in the spring and should be started as early as possible. Plant them three to four inches deep. Unless advised to the contrary, we send canna roots out with seeds and other portion of the order.

PRICE—All varieties on this page: 15¢ each, $1.25 doz., postpaid; $1.50 per 100, by express; or one root of each variety, labeled, for $1.35.

5560—KING HUMBERT.—This enormous orchid flowering canna is of a bright orange scarlet shading to darker edges. It grows from four to five feet tall, and has very large leaves which are of a deep red or bronze. It is a robust grower succeeding almost anywhere and a diseased plant is seldom found. This is the most popular of all bronze leaf canna.

5582—WINTERZ’S COLOSSAL.—This orchid flowering canna produces the largest blossoms of any variety yet introduced. The enormous drooping petals carry a flame scarlet color of wonderful substance. The foliage is a bright green. Height about five feet. It is a vigorous growing plant that will always be admired.

5565—EUREKA.—We consider this by far the best white canna yet introduced. The plants are especially vigorous and produce very large flowers in abundance throughout the season. The blossoms open with a slight cream tint but gradually become whiter. Grows about four feet tall and has bright green foliage.

5594—YELLOW KING HUMBERT.—Also known as Queen Helen. In our estimation this is one of the most beautiful canna in cultivation. It is a very robust grower producing plants about five feet tall with healthy green foliage. The flower heads are very large and bear enormous orchid flowered blossoms of yellow which are dotted with orange scarlet. This variety will often produce sprouts. Sometimes the flowers will be partly red and partly as above. Then again the foliage may be bronze on one leaf and green on others. These variations, however, only serve to make the variety more attractive.

5577—WYOMING.—An orchid flowering canna producing enormous blossoms of deep orange. The flowers are borne well above the foliage on strong stems. The plants grow from six to seven feet tall and have luxuriant foliage of a deep bronze. Wherever a tall bronze leaf canna is desired this sort is sure to prove highly satisfactory.

5572—MRS. ALFRED F. CONRAD.—It is even hard to imagine a more gorgeous salmon-pink canna than this variety or we might say pink because the salmon is almost unnoticeable. It is the most robust of pink cannas and has the largest flowers. The blossoms are of a rich pink color and retain their beauty after days of exposure to hot sun. The foliage is green. Height four feet.

5569—CITY OF PORTLAND.—This popular variety is already well known to most growers and has been found a most valuable sort. The flowers are very large and of a beautiful shade of bright pink. Grows about three and one half feet tall and has green foliage.

5570—HUNGARIA.—A dwarf canna with green foliage. It bears a profusion of bright rose-pink flowers of good substance. This is one of the most beautiful shades of pink to be found in any canna and one that will please the most exacting. It grows three to three and one half feet tall and has green foliage.

5561—THE PRESIDENT.—The flowers are of enormous size and a rich scarlet color which will stand the hottest sun. This is an early sort, growing about four feet tall with a strong stalk that holds its flowers erect. The foliage is a deep green and is practically free from disease. This grand variety is fast becoming the most popular of red cannas.

5534—DR. E. ACKERMANN.—Blossoms of a bright cerise pink are borne over light bronze foliage. It grows only three to three and one half feet tall and will make a desirable border. One great trait is its robust habit of growth which is a thing not always found in pink cannas.

5585—MORNING GLOW.—The foliage is a deep green over which is light bronze, veined and ribbed in bronze. Grows only about three feet tall. The blossoms are of good size and a most pleasing shade of shell pink which shades to a red center. In both foliage and flower we have a remarkable color contrast which makes this a wonderful canna.
American Beauty Canna

Nine New Cannas

Our on our Hyco farm we have acres and acres of canna growing. It is a sight well worth miles of travel to see and they are in bloom from early summer until frost. We grow canna roots by the hundreds of thousands every year and ship them all over America. Having this volume of business makes us keep our stock well supplied with modern varieties. From our list we have picked these nine newest of the canna. Any person desiring the newest and best canna cannot do better than to select from this list. All canna roots will be mailed as soon as the order is received unless otherwise stated on the order. When received, store in dry earth in a cool basement where they will not freeze. A very warm or dry atmosphere is sure to damage them.

5567—AMERICAN BEAUTY.—This recent introduction brings us a new shade of red and a most gorgeous flower. The blossoms are very large and of a clear, velvety shade of deep cerise. The foliage is a pure deep green of pleasing appearance and the flowers come in succession on good stems from four to five feet tall. One must see this magnificent canna to appreciate it.

Price, 30c each, $2.50 doz., postpaid; $12.00 per 100, by express.

5569—STATUE OF LIBERTY.—This belongs to the giants among canna and no one can help but admire its robust habits. The flowers are of enormous size and uniformly colored a brilliant red which shows a trace of dull orange. It has the drooping petals of the orchid flowering canna and these have a most pleasing satiny texture. The foliage is large, slightly rounded, of a rich bronze color. Six to seven feet tall.

Price, 25c each, $2.00 doz., postpaid; $10.00 per 100, by express.

5585—SUSQUEHANNA.—No better variety for a border can be found than this dwarf, bronze, foliage, pink. When used on the outer edge of a circle or as a border for taller growing kinds it has three distinct features: Namely, it grows only about three feet tall, has beautiful light bronze foliage, and flowers of a clear old rose pink. It is destined to become one of the leading pinks.

Price, 25c each, $2.00 doz., postpaid; $10.00 per 100, by express.

5571—APRICOT.—We consider this a canna of unusual merit and especially valuable, because it adds a new color to the list. Apricot is a very healthy, bright green foliage growing about four feet tall. The flowers are of large size and a most pleasing mixture of buff and salmon which gives the apricot shade from which it takes its name.

Price, 25c each, $2.00 doz., postpaid; $10.00 per 100, by express.

5590—CANDELABRA.—A vivid orange scarlet variety that is noted for its branching habit and the fact that it carries more flowers at a time than any other sort. The flower heads are very large and the blossoms are of a rich texture that sets the color off to a good advantage. Foliage green.

Price, 30c each, $2.50 doz., postpaid; $12.00 per 100, by express.

5593—MRS. WOODROW WILSON.—A new dwarf variety that carries the true watermelon pink. The plants grow about three feet tall with medium size green foliage. The flower heads are very large and of a bright pink color. For a border plant this sort has few equals.

Price, 40c each, $3.00 doz., postpaid; $15.00 per 100, by express.

5598—DISTINCTION.—We consider this one of the most valuable of the new canna. It is a robust grower and has a most remarkable coloring. The plants grow about five feet tall and bear very large flower heads. The blossoms are a deep buff or chrome color with but a faint tint of red to enrich it. This is splotted and bordered with golden yellow and the complete effect is a gorgeous color. The foliage is a clear healthy green.

Price, 30c each, $2.50 doz., postpaid; $12.00 per 100, by express.

5592—M. M. WALLACE.—It is hard to tell whether this is a light red or a deep pink but it is a most pleasing shade and a flower of real value. The plants are dwarf attaining a height of about three feet with green foliage. The flower heads are large with soft velvety petals in the solid bright color.

Price, 30c each, $2.50 doz., postpaid; $12.00 per 100, by express.

5590—FLAG OF TRUCE.—This is a new white variety that is commanding attention. It grows about four feet tall with green foliage. The flower heads are large and open with a slight tint of light yellow which gradually fades out into a pure white.

Price, 25c each, $2.00 doz., postpaid; $10.00 per 100, by express.

SPECIAL OFFER

One each of our nine best canna, each root labeled, for $2.00, postpaid.
Standard Cannas

OLD BUT GOOD VARIETIES

All of the cannae in this list have been on the market for some time. This makes them cheaper but does not keep them from being good varieties. In fact, such sorts as Louisiana, Allemamia, Gladioflora, and Venus are among the most beautiful cannae to be found, with large flowers and good foliage. But they have been in cultivation a long time and stock is plentiful, hence they do not command the fancy prices of newer and scarcer varieties. We recommend this list to those who wish cannae of merit at a small cost.

PRICE.—All varieties on this page, 10c each, 60c dozen, postpaid. $3.00 per 100 by express. Or one root of each variety, labeled, for 85c.

5573.—MONT BLANC.—The blossoms are practically the same as those of Eureka, but the plant is more dwarf. Mont Blanc grows about three feet tall and has light green foliage. For a low white for border or edges this will make an ideal sort.

5569.—METEOR.—This dwarf red is noted for its bright flowers. It grows about three feet tall and has large green foliage. The flowers are large and of a pure crimson color. There are few dwarf cannae that produce such a wealth of both foliage and flowers as this one.

5579.—FIRE BIRD.—This is a comparatively new canna of great merit. The blossoms are very large with glossy petals of fiery red. The stems are strong and hold the flowers well above the foliage. Grows about three and one-half feet tall and has bright green foliage.

5563.—LOUISIANA.—This is one of the old varieties that defies any new sort to take its place. It is an orchid flowering orange-scarlet growing six to seven feet tall and pure green foliage. The flowers are of enormous size and are held several feet above the foliage by strong stems. It makes an ideal sort for centers or tall backgrounds.

5596.—VENUS.—In this variety we have a most dainty combination of rose-pink petals with a narrow border of cream yellow. It is a vigorous pink growing from three to four feet tall with bright green foliage. This is something different and yet highly desirable.

Venus Canna

5567.—GLADIOfLORA.—There are few varieties of flowers offering the rich colors of this variety. The blossoms are of large size, and have a crimson center which changes to a bright rose pink petal around which is a border of gold. It is a dwarf sort growing three feet tall and making a most desirable low bed or border. Green foliage.

5564.—ALLEMANIA.—This is another of those enormous orchid flowering cannae. The blossoms are very large and of a bright orange-scarlet with a wide border of golden yellow. The center of the blossoms are flecked and spotted yellow also. It is a robust grower with large green foliage, attaining a height of about six feet.

5575.—SOUV. DE ANTOINE CROZY.—This is a brilliantly colored dwarf which will prove most useful. The flowers are of flaming red with a narrow but well defined border of rich yellow. Grows only three feet high and has green foliage. It is an old sort but highly desirable.

5566.—RICHARD WALLACE.—The large flowers, constant blooming habits, and dainty shade of canary yellow have made this variety famous among cannae. It is a vigorous grower, free from disease, about four feet tall, and having bright green foliage. In a light yellow, we could not ask for anything better.

5562.—SHENOANDOH.—This is a dwarf bronze foliage pink of merit. The blossoms open a light carmine pink and later develop a light salmon tint which is spread evenly over the whole flower. It grows from three to four feet tall and has deep green foliage overcast with light bronze. The green often shows through the bronze and the ribs are of deeper bronze.

5591.—FLORENCE VAUGHAN.—This grand old variety is still one of the most popular. It is a vigorous grower with green foliage. Height about five feet. The flowers are golden yellow dotted with bright red which makes up a most pleasing combination.

5576.—NOKOMIS.—A pure crimson flower of great substance is borne over bronze foliage. It grows about four feet tall and has foliage of a light bronze color. The flowers are borne on stout stems and come in succession from early summer until frost. This is one of the newer reds and is a valuable addition to any list.

5578.—FIERY CROSS.—This is a close second for the President, having luxuriant green foliage of deep green over which very large flowers of vivid scarlet are borne in an almost endless succession. This sort is comparatively new but is fast becoming one of our best sellers.
Slate’s Hardy Plants

The Flowers Grandmother Loved to Grow

These perennial plants set out now will flower next spring and continue for years to come. They supply the most beautiful of all flowers and relieve you of the necessity for planting seed each year. Perennials require but little care after they are once established, and every person having a few feet of land can afford to grow them. The plants quoted are strongfieldgrown stock. They have all flowered once and will give quick results. The soil in which you set them should be dug deep and made rich with pulverized sheep manure. These plants can be set out at any time as soon as the soil can be worked. The following list covers the most popular flowers, but if you wish items not listed, write us for prices.

PLANT SHIPMENTS.—The prices quoted are all delivered with the exception of the price per 100. For bulk orders of this kind express is the proper manner of shipping and the purchaser pays the charges. Our customers will please remember that plants cannot be taken up and kept in stock like seeds, and there is necessarily more time required to fill these orders. We shall do our best to render you quick service, but remember that Nature has placed certain limitations upon us. On all plant orders amounting to less than $1.00 we are forced to make a charge of 15c to cover packing cost. Orders for $1.00 or over, packing is free.

PRICE—All items, except where otherwise noted, 20c each, $1.50 per doz., postpaid. $12.00 per 100, by express.

ARMERIA, Maritana (Thrift).—A dwarf tufted plant growing about six inches tall and bearing bright rosy pink flowers. Good cutflower and edge for walks or for rock garden.
25c each, $2.00 doz., $15.00 per 100.

ANNUISMA, Italia (Dropmore).—A beautiful border plant, producing gentian blue flowers in June, 4-5 ft.

AGUILLIEA, Columbine. —Long-spurred hybrids of all colors. Fine for borders or rock garden or cut-flowers. 3 feet high. Blooms May and June.

ARTEMISIA, Pedemontana. —A fine border plant having silvery foliage of great value. May be used against shrubs or in masses for landscape work. Makes an excellent border for canna beds or background for low flowers.
30c each, $2.50 doz.

40c each, $3.50 doz.

ASTERS (Michaelmas Daisy).—A perfectly hardy plant 5 feet high, blooming September and October, in white, blue and pink.
25c each, $2.50 doz., $18.00 per 100.

Canterbury Bells

BOCCONIA, Cordata (Plume Poppy).—Plants grow 6 to 8 ft. tall and bear creamy white flowers. An excellent screen or background or for planting against shrubbery.
25c each, $2.00 doz., $15.00 per 100.

BOLTONIA (False Starwort).—Tall growing plants with flowers like a hardy aster. Constant bloomers and good cutflowers. 5-6 ft. White and pink.

BUDDLEIA (Butterfly Bush or Summer Lilac).—One of the most admired shrubs. Lovely light purple flowers radiating a delightful perfume of spring lilac. Ideal for cut-flowers and other floral arrangements. 5 feet high.
50c each, $4.50 doz., $30.00 per 100.

CAMPANULA (Canterbury Bell).—Largest and most beautiful family of border-plants. Very free flowering and easy growing. 2 feet high. Blooms in June.
25c each, $2.50 doz., $15.00 per 100.

CHRYSANTHEMUM (Hardy October Rose).—The development of the Hardy Chrysanthemum has made it possible to have color, life and beauty in the garden when the other hardy plants have passed. Fine for cut flowers.

Large-Flowering Varieties.—Separate colors, red, pink, white, yellow and scarlet bronze.
25c each, $2.50 doz., $18.00 per 100.

CONVALLARIA MAJALIS (Lily of the Valley).—35c each, $3.00 doz., $18.00 per 100.

COREOPSIS (Tickseed).—The flowers are a golden rich yellow of slender graceful form, making them an excellent cut-flower. 2 feet high. Blooms all summer.

CARNATION (Grenardin Hardy).—In red, white, pink. One of the best of the hardy flowers and a constant bloomer.
25c each, $2.00 doz., $15.00 per 100.

DELPHINIUM (Larkspur).—It is almost impossible to convey anything like an adequate description of the improved Delphiniums. Their greatest charm lies in the wonderful stateliness of growth, and their rich colors and tints of their striking flowers. Nothing in blue can compare with Delphiniums, and for their value in hardy borders they are unsurpassed.

Light Blue (Bellaclenna).—25c each, $2.50 doz., $18.00 per 100.

Gold Medal Hybrids.—25c each, $2.50 doz., $15.00 per 100.

DIANTHUS BARBATUS (Sweet William).—Certainly one of the most popular old-fashioned garden plants. Their freedom of blooming, striking colors and pleasing fragrance made them the favorite of all lovers of hardy flowers. Fine for cutting.

DIANTHUS PLUMARIUS (Hardy Pink).—Dainty fringed flowers of mixed colors.

DICENTRA, Spectabilis (Bleeding Heart).—An old-fashion favorite. Its graceful pink flowers are most attractive. Strong clumps.
75c each.

FUNKIA, Undulata Medio Variegata (Plantain Lily).—Variegated foliage and blue flowers.
30c each, $2.50 doz.

GALLARDIA.—The most glorious of our true "old-fashioned flowers." Flowering constantly from June till October, in many rich and brilliant colors of orange, crimson and red. Unexcelled as a cut-flower.
Delphinium

GRASSES.—Very ornamental plants. Hardy and easy to grow. Plume Grass, Violet tinged leaves with graceful flower spikes, 5–6 ft. Tallia Japonica Variegata, white, green and yellow striped leaves, 4–5 ft. Fountain Grass, 4–5 ft., bright green foliage with bronze purple flower heads. Variegated Ribbon Grass, 18 inches, variegated foliage. All grasses 25c each, $2.00 doz., $15.00 per 100.

GEUM.—Beautiful dwarf plants of compact growth that flower over a long period. The variety we offer is Mrs. Bradshaw, a double scarlet, 2 ft., May-Sept. Excellent cut-flower. 30c each, $2.50 doz.

HELIANTHUS (Perennial Sunflower).—Their rich golden color and full-formed growth make them wonderfully effective in the hardy border. 6 feet high. Blooms August and September. 25c each, $2.50 doz., $18.00 per 100.

HELIOPSIS (Orange Sunflower).—In general it is like the Helianthus, of dwarf habit, but also very valuable for cutting. 3 ft. high.

HENOCHIALIS (Day Lily).—Lily-like flowers with very ornamental foliage; color pure yellow. 2 feet high. Blooms June and July.

HELENINUM (Sneezeweed).—Blooms all summer and is good cut-flower or border plant. We offer the Riverton Gem, which is old gold changing to wallflower red. 30 each, $2.50 doz.

HARDY DAISY (Pyrethrum Hybridum).—The most brilliantly colored flowers of all the daisy family, ranging from pure white to brilliant scarlet. Blooms all summer, 2 ft. Mixed colors only. 25c each, $2.00 doz., $15.00 per 100.

HIBISCUS (Mallow).—Very robust growing plant, having large flowers of rich shades of red and pink. Height 6 feet.

HOLLYHOCKS.—The finest strains, double varieties in pink, salmon, yellow and crimson. 25c each, $2.50 doz., $15.00 per 100.

JAPANESE IRIS (Iris Kaempferi).—The Japanese Iris is the most showy and strikingly beautiful of all the large family of Iris. Very few flowers, the orchid not being excepted, surpass this unique flower in size and gorgeousness and variety of color, which ranges from snow-white to the deepest purple, striped and variegated in the greatest profusion of coloring. Mixed, all colors, 30c each, $3.00 doz., $20.00 per 100.

LUPINUS (Lupine).—Long spikes of spatheshaped flowers on long stems. Fine cut-flower, 3 ft. In white, pink, and blue. 30c each, $2.50 doz.

PRICE.—All items, except where otherwise noted, 20c each, $1.50 doz., postpaid. $12.00 per 100, by express.

MYOSOTIS (Forget-Me-Not).—Beautiful small blue flowers. Through planting in a moist shady place the flowering period may be much prolonged.

PLATYCODON (Balloon Flower).—Bell-shaped flowers on graceful slender stems. Desirable for cutting. Two feet high. Blooms June and October.

PHLOX.—Beauty and usefulness bring these hardy border plants among those of greatest importance. For massing they are very effective, and their great varieties of colors add a brilliancy to the landscape. Their flowering season begins in July, and when the past bloom spikes are removed, the blooming period may be prolonged until fall.

M. P. Durkee, tall lavender.
Champs Elysee, fine dark purple.
Europe, large white with red center.
Med. P. Densie, large pale pink.
Mrs. Chas. Dorr, a lavender that is almost blue.
Mrs. Jenkins, the finest pure white.
Rheinlander, a new salmon with immense flowers.
Richard Wallace, pure white maroon center.
Rynstraan, deep pink, large flowers.
Sir E. Landor, bright crimson.
Mixed colors, 15c each, $1.00 doz.
Named sorts, 25c each, $1.50 doz., $12.00 per 100.

PHYSOSTEGIA (False Dragonhead or American Heather).—One of the prettiest hardy perennials, gaining in popularity as it becomes better known. It forms dense bushy, 3 to 4 feet high, bearing freely during the summer months, spikes of delicious pink tubular flowers not unlike a gigantic heather.

PHLOX SUBULATA.—Dwarf trailing plants with moss-like evergreen foliage. Excellent for edging beds or walks and for cemetery use. White and rose pink.

RUDECKIA (Golden Glow).—An old favorite in the “old-fashioned garden;” fine for cutting. 5 feet high. Blooms July and September.

SHASTA DAISY.—A much improved hardy daisy, bearing a great profusion of large white flowers from early summer until late in the fall. Fine for cut-flowers. 2 to 2½ feet high.

TRITOMA (Red Hot Poker).—A beautiful late-flowering plant, having handsome red-like foliage. Flowers are of a rich orange-scarlet color. 3 ft. high. Blooms September and November.

VALERIANA (Garden Heliotrope).—Novel light green foliage over which is produced showy heads of bright flowers from pink to scarlet. 3 to 4 ft. June-Oct. 25c each, $2.00 doz., $15.00 per 100.

VIOLET.—Governor Herrick, one of the most fragrant of the deep purple violets. A robust grower with good long stems and large fragrant flowers. Clumps put outdoors in the spring may be lifted in the fall and potted or put in a cold frame for winter blooming.

VERONICA (Speedwell).—One of the finest autumn blue flowers. Handsome heads of rich violet blue. 2 feet high. Blooms July and August.

PRICE.—All items, except where otherwise noted, 20c each, $1.50 doz., postpaid. $12.00 per 100, by express.
Flower Plants

For the Garden, Pots, or Window Box

ABOUT PLANT SHIPMENTS.—If your plant order amounts to $1.00 the prices quoted are postpaid with no charge for packing. On orders for less than $1.00 worth of plants we are forced to charge extra for post-age and packing. And to simplify matters we make a standard charge of 15c to cover packing and postage on any order of less than $1.00.

We do not ship any plants out until April 1st and some of the more tender kinds are not ready then. We will make shipment as soon as the plants are ready or reserve your order for later shipment if you wish. Most of the soil is removed from the roots and damp moss substituted. We ask our customers who wish these plants to make their reservations as early as possible in order that we may make preparations for taking care of their needs.

OTHER FERNS AND PLANTS may be had from us. Space does not permit us to put our complete list in here. If you do not see what you want, write us.
German Iris

Spanish Iris
READY AUGUST TO NOVEMBER

For years this family of Iris has been almost unobtainable, due to an embargo on them, but we have secured under special permit a start in them and have increased our planting stock until we can now offer them for sale. It is a flower different from any other Iris, easy to grow, an excellent cut-flower and one that will prove very popular with gardeners once they try them. They grow from bulbs and bloom very early in the spring. Plant the bulbs three inches deep and two inches apart in light rich loam. Give a mulch of litter for winter protection.

PRICE of all varieties of Spanish Iris listed below, 10c each, 75c doz., $5.00 per 100, postpaid.

5751—CAIANUS, Tall Yellow, very fine.
5752—KING OF THE BLUE, A rich deep blue.
5753—LOUISE, Tall light lavender.
5754—RECONNAISSANCE, Bronze.
5755—FILIAFOLIA IMPERATOR, Large deep blue.
5756—FLORA, Bg lavender.
5757—FORMOSA, Dark blue.
5758—KING OF THE YELLOWS, Golden yellow.
5759—MIXED, above sorts.

PEONIES

The best time to plant Peonies is in September or October, but they may be set during January or February. A medium heavy loam grows them best. Set the roots four feet apart and cover only about two inches deep. Have the eyes up. If planted in the early fall a mulch of leaves or litter will help them.

PRICE—All colors listed below, 35c each, $3.50 per doz., postpaid.

5155—White
5150—Red
5157—Pink
5159—Yellow
5160—Mixed

NARCISSUS

5105—PAPERWHITE GRANDIFLORA.—This is the popular indoor narcissus that grows readily in rocks and water and adds a wealth of blooms to the house during the dreary winter months. We offer American grown bulbs, since no imported stock is to be had this year. 10c each, $1.00 doz., $7.50 per 100, postpaid.

German Iris
READY JUNE TO DECEMBER

These are among the most useful and hardy of all flowers and deserve wide cultivation. They will stand in almost any kind of soil and through all kinds of weather and never fail to announce the coming of summer with their fragrant blossoms in rich colors. Then the foliage may be used as a hedge plant after the blooming period is past. It is a most useful flower for edging the yard or walks and drives since it remains ornamental the whole summer. The plants seem to thrive on all kinds of soil. Set them very shallow and never pull soil up around them. They like very rich soil with moderate moisture. We give good strong divisions, grown upon our own farms. In the descriptions below F. refers to the falls or drooping petals, while S. refers to the upright petals or standards.

PRICE—Of all varieties of German Iris is 15c each, $1.00 per doz., postpaid; or, $5.00 per 100, by express.

5711—CHELLES.—An especially striking flower with S. pure white and F. purple. Medium tall strong grower.
5712—BELLE HORTENSE.—The entire blossom is veined in white and rich purple which gives a strong contrast and makes the flower very showy. Medium tall.
5713—AGNES SOREL.—A very tall plant with light lavender flowers. Falls slightly deeper shade than standards. This variety is very fragrant and has a delicate coloring that is sure to please.
5714—W-ALAHALLA.—Large flowers of deep rich purple are borne on dwarf plants. For a border plant this is especially desirable.
5715—LADY JANE.—These flowers are a beautiful combination of reddish purple and white so blended as to make a most attractive pink shade. It is a vigorous grower and one of the best pink Iris.
5716—BRONZE BEAUTY.—Yellow, purple, and pink combine to give this sort a rich bronze effect. It is a dwarf sort, good for edging small yards or walks and a flower that will stand out among Iris everywhere.
5717—SNOWDRIFT.—A pure white of unusual merit. It is one of the most popular of colors in Iris and this flower is sure to please.
5718—BLUE BOY.—A strong growing deep blue that is good anywhere.
5719—MIXED GERMAN IRIS.—A good mixture for general purpose plantings. Many beautiful and novel kinds are to be had. 10c each, 85c doz., postpaid; or $4.00 per 100 by express.
5725—SIBERIAN IRIS.—This is a family of fibrous rooted Iris and should be in every garden. They are of dwarf growth but very hardy. Color a deep blue. Price 15c each, $1.00 doz.
Exhibition Hyacinths

This is an extra select grade of large bulbs picked from the finest produced in Holland. These large bulbs will give a large spike filled with large bells. For forcing indoors, this makes the most desirable grade of bulbs because they give more perfect flowers. And where absolute perfection is desired in the outdoor bed, this grade of bulbs should be used.

5001—L’INNOCENCE, Pure White, best forcing.
5002—MADAME VAN DER HOOP, Blush White.
5003—MORENO, Rose Pink, fine spike.
5004—LADY DERBY, Bright Pink, forcing.
5005—ROI DES BELGES, Early Deep Red.
5006—CARIBALDI, Brilliant Red.
5007—KING OF THE BLUES, Dark Blue.
5008—GRAND MAITRE, Deep Lavender Blue.
5009—QUEEN OF THE BLUES, Light Blue.
5100—CITY OF HAARLEM, Yellow.
5101—YELLOW HAMMER, Yellow.
5101 X 11.—Above varieties in mixture.

Price of all of above varieties, 20c each; $2.00 per doz., postpaid, $15.00 per 100, by express.

Bedding Hyacinths

These bulbs run smaller than the Exhibition and are recommended for outdoor planting. However, many florists use this grade for forcing and find it to give good results.

5020—L’INNOCENCE, Pure White, best forcing.
5021—MADAME VAN DER HOOP, Blush White.
5022—MORENO, Rose Pink.
5023—LADY DERBY, Bright Pink.
5024—ROI DES BELGES, Deep Red.
5025—CARIBALDI, Brilliant Red.
5026—KING OF THE BLUES, Dark Blue.
5027—GRAND MAITRE, Deep Lavender Blue.
5028—QUEEN OF THE BLUES, Light Blue.
5029—CITY OF HAARLEM, Yellow.
5030—YELLOW HAMMER, Yellow.
5029 X 20.—Above varieties in mixture.

Price of all of above varieties, 10c each; 75c doz.; $1.00 per 100, postpaid.

Miniature Hyacinths

(Dutch Romans)

These are the smaller of the Hyacinth bulbs and make desirable bulbs for potting and are often used for outdoor bedding. They are much cheaper than the other grades and will give good value for the money invested in them. The spikes are not so well filled with bulbs, but in other respects this grade makes an excellent flower.

5013—White.
5014—Pink.
5015—Red.
5016—Light Blue.
5017—Dark Blue.
5018—Mixed.

Price of all of above colors, 7c each, 70c doz., $5.50 per 100, postpaid.

Crocus

These dainty harbingers of spring have a variety of uses and their culture is so simple that anyone may produce beautiful blossoms. Planted outdoors they are among the first flowers to blossom in the spring, and when placed about in small groups over the lawn they give a variety of color against the green background of grass. For outdoor culture, just dig a small hole and place the bulb two inches below the surface. For pots they are highly desirable.

5008—BARON VON BRUNOW.—Large flower of light purple.
5009—LORD PALMERSTON.—Rich deep purple.
5100—KING OF WHITES.—Pure white.
5101—ALBION.—Beautiful purple flower with white stripe.
5102—MAMMOTH YELLOW.—Large flower of rich golden yellow.

Prices, postpaid: 5c each, 35c doz., $2.00 per 100.
Tulips From Holland
READY OCTOBER 15th, NEXT

The outdoor culture of tulips is simple. They like a rich soil and for early flowers should be given a sunny location if possible. Plant after cool weather comes or at any time before the ground freezes, setting bulbs three inches apart and three inches deep. Give a slight covering of litter in severe climate, but this should be removed in early spring where early flowers are desired. To figure the number of bulbs for a given bed or row, multiply the square feet of bed by 16 or the feet of row by 4.

For pot subjects these early tulips are most desirable, since most of them force well and bloom early. Pot in a light soil or fibre, planting three to four bulbs to a six-inch pot. Keep in the dark until top growth is three inches high and then bring to light. The pot should be kept moist at all times, since drying out will injure the quality of the flower. Tulips require a cooler room than Hyacinths and should never be subjected to a temperature much over 60 degrees and as low as 40 degrees will not hurt them at night. In potting tulips, it is always best to plant just one variety in a pot.

For the guidance of our customers, we have noted the earliest varieties in our list by the symbol (O) and the second early sorts by (—). The numerals following these symbols are the average heights in inches.

Freesia

We all know this as the most fragrant flower in cultivation. They are easy to grow and give a wealth of blooms from a few small bulbs. Pot the bulbs as early as possible in a light rich soil. These may be placed two inches apart. Keep in a sunlight window and growth will soon start. The bulbs are ready about Sept. 1st.

5129—IMPROVED PURITY.—When the blossoms first open they show a trace of yellow and darker markings at the throat, but these gradually fade out until a pure white flower remains, Very fragrant.

Price, 5c each, 45c doz., $3.00 per 100, postpaid.
We offer the following varieties of strawberry plants for shipment either spring or fall season. It is impossible to state shipping date when accepting orders for these plants, because weather conditions will control the work of digging them. All orders will be booked upon receipt and shipped at the very first opportunity thereafter. Every family should have its strawberry bed and a good profit can be made from a patch planted for market.

Price of all sorts listed below 25 for 60c, $1.25 per 100, 250 for $2.50 postpaid. $5.00 per 1000 by express. Special prices quoted on lots of 5,000 and over.

MISSIONARY—This is an extra early sort, good either for the shipper or for home use. It is a fine berry, good bearer, and fruits first of all. Perfect blossoms.

KLONDIKE—This is a second early sort of great merit. It is one of the finest berries of all for market since the fruit is large, well colored, and solid. It ships great distances or will make an excellent sort for local market or home use. Perfect blossoms that pollinize themselves.

LADY THOMPSON.—Perfect blossoms and a great berry for both home and market. It is midseason variety.

Strawberry Plants

SENATOR DUNLOP.—A popular midseason variety for the home garden. The berries are large, brilliantly colored, smooth, with a rich luscious flavor. Perfect blossoms.

AROMA.—A standard late variety that is used very extensively by shippers. Late berries nearly always command as good prices as the early ones and yield better. Perfect blossoms.

GANDY.—This sort makes a good shipper but seems especially well fitted to the home garden and local market. Its berries are very large, firm, highly flavored, and of a beautiful color. It is one of the heaviest yielding kinds and especially recommended for making preserves. Perfect blossoms.

COLLECTION No. 1.—25 of each variety, 150 plants, postpaid for $2.00.

COLLECTION No. 2. 50 of each variety, 300 plants, postpaid for $3.25.

Vegetable Plants and Roots

Asparagus Roots
Two year old roots ready from March 15 to May 1 in varieties suitable for home use. 50c doz., postpaid. $2.50 per 100 by express.

Cabbage Plants
Early and late sorts in our selection. Ready March 15 to May 1. 20c doz., 50c per 100 postpaid, $3.00 per 1000 by express.

Cauliflower
Ready April 1 to May 1. 30c per doz., $1.25 per 100 postpaid.

Celery
Our selection of the best home garden varieties. Ready June 1 to July 15. 30c per doz., $1.00 per 100 postpaid.

Egg Plant
Ready May 1 to June 1. 30c doz., $1.25 per 100 postpaid.

Horse Radish Roots
Ready March 15 to May 1. 75c doz., $2.50 per 100 postpaid.

Lettuce
Heading varieties only. Ready April 1 to May 1. 20c doz., 75c per 100 postpaid.

Pepper
Sweet and Hot varieties of our selection. Ready May 1 to June 1. 30c doz., $1.25 per 100 postpaid.

Rhubarb Roots
Ready March 15 to May 1. 35c each, $2.50 doz. postpaid.

Sweet Potato Plants
Varieties of our selection or ask for list of varieties. Ready May 1 to June 1. 30c doz., $1.00 per 100 postpaid. $4.00 per 1,000 by express.

Tomato Plants
Ready April 15 to May 15 in the following varieties: Earliana, Ponderosa, Slate's New Stone, 30c doz., $1.00 per 100 postpaid.
Sow Only Treated Tobacco Seed

We have discovered a powerful germicide that kills all germs borne by the seed, but its action improves rather than injures the germination of the seed. This treatment kills the "Damping Off" fungi which prove so destructive to young plants in the beds. Thus treated seed give more plants and healthier plants. We offered these treated tobacco seed to our customers last season for the first time and the demand far exceeded our expectations. Thousands of farmers saw the advantage and ordered them. Reports now coming in show that our faith in treated seed was justified. Treated seed have made good and will go in popularity from year to year. In fact, no farmer who has ever used them once will ever use any other seed. They are certainly a great help in producing a uniform stand of strong healthy plants which is the real beginning of a profitable tobacco crop.

EFFECTS OF TREATMENT

Thus from our newly discovered treatment we may expect the following: First, all danger of the seed carrying "Wild Fire", "Angular Spot" or other disease germs is entirely removed. You know that seed so treated are perfectly free from disease germs of all kinds. Second, you get seed that will be free from "Damping Off" which kills millions of tobacco plants in the beds just after they come above ground. Thus you are more sure of a stand of good plants. Third, the germination of the seed is improved. We made actual tests of the germination of some treated seed both just after being treated and several months after treatment. In both cases there was improvement in the germination. This means that our seed that have been grown and handled to make the best tobacco seed obtainable are now made even better. Seed of good germination are treated to make better germination. Seed that normally produced strong healthy plants are now treated to make stronger and better plants. We cannot imagine any other way in which the quality of Slate's Tobacco seed could be improved.

TOBACCO CULTURE

This 32 page book gives authentic information on all branches of tobacco growing. It deals with every topic from the preparation of the seed bed to the final steps in curing. The beginner in tobacco growing cannot afford to do without this book and the experienced man will find in it much helpful information. We cannot make Slate's Tobacco Seed any better so we try to improve results from them by such valuable cultural information. This book is free to those who request it.

WHEN TO USE TREATED SEED

This treatment with its consequent improvement in the quality of the seed comes as a great benefit to both the man with diseased land and the man whose land has not yet become affected. The man who has no disease in his soil, should be willing to spend a good deal of money to prevent its getting in his soil. And the man who already has diseased soil, cannot expect this seed treatment to prevent "Wild Fire" appearing in his crop to some extent. If the germs are in the soil, seed treatment will not prevent the disease but treatment will prevent the disease getting on the young plants and sapping their vitality before they are transplanted. And any strong healthy plant even though put into diseased soil is far better than a diseased plant in such soil. In other words, this treatment keeps the seed from carrying any disease to the man who doesn't have it in his soil and keep the disease from doing its greatest damage even on diseased soil. And to both classes it brings the healthier, stronger plants that are certain to grow into a more profitable tobacco crop.

Slate Seed Company,
South Boston, Va.

Gentlemen:—For the past six years I have used your tobacco seed. In 1920, when the bottom fell out of the tobacco market, I planted your Bonanza, making 4500 lbs. at an average of 30c lb. In 1922, 23, and 24, I pooled in the T. G. C. A. These three crops were above the general average, but I do not have exact figures to give you. This year I decided it would be wise to try treated seed so I ordered Slate's Adcock, paying $1.00 per oz. for the treated seed and I have the finest tobacco in this community. It has had only two good rains since it was planted, yet people come from miles around to see my crop. I am sending you a photo of it made August 14th. I shall always use Slate's Treated Seed, even though the price is double what it is, for my crop shows no disease at all and I know your seed are superior to all others.

Respectfully,
Charles Wall.

Randleman, N. C., August 27, 1925.
SLATE'S TOBACCO SEED
PAY BEST

For sixty years tobacco seed have been a constant study on our Hyco farms. Our life work has been breeding and improving tobacco seed. Our soil is ideal for all types, our labor experienced, our knowledge gained from sixty years work. The seed we produce must be better than others.

Our breeding schedule, which we have worked out after half a century of experimenting, gives us the very best parent plants and breeds towards a fixed ideal for each variety. Thus Slate’s tobacco seed are constantly getting better and better.

A strong virile seed produces a strong plant that catches the soil and grows off rapidly. When transplanted it does not linger between life and death, but grows quickly into a well developed plant. Such plants fill out and ripen uniformly and cure into the best grades—those grades that sell for a profitable price. Thus it is that a dollar spent in good seed may add hundreds of dollars to the selling price of the crop.

Why Risk Your Profits

At marketing time every year, many farmers lose hundreds of times the cost of good seed. They buy good seed one year and think they will remain good for years, but the entire nature of a tobacco plant may be changed in one season. Thus it is absolutely necessary that the man who wishes to make a good crop every year should secure good seed for that crop every year. Thousands of the best tobacco growers have realized this truth and are now coming to us for all of their tobacco seed.

The cost of good tobacco seed is an insignificant item in the cost of producing the crop. The best seed cost only from 7 to 15c per acre, while the value runs from several hundred to a thousand dollars per acre. One extra pound of good leaf will more than repay the expense for seed. So the man who does not buy good seed every year is risking his profit to save fifteen cents.

$30.00 PRIZE CONTEST
FOR BURLY GROWERS

Three prizes of $15.00, $10.00, and $5.00 each will be awarded for the best letters telling of experiences with our Burley tobacco seed. These letters may be of any length and sent in at any time prior to September 1, 1925. If possible send a photograph of the field of tobacco, yourself or some other subject along with your letter. We will pay $1.00 each for every photo we can use and return all others.

A GEORGIA GROWER'S EXPERIENCE.

Iahira, Georgia, July 11, 1925.

Dear Sirs:—

I am enclosing you photograph showing tobacco grown from your seed and without your seed. I think this should be a good example for anybody to go by, and I will always use Slate's Seed from now on for all of this tobacco is in the same field and fertilized just alike.

Yours truly,

H. J. Grimsley.
FOR THREE YEARS
GOLD LEAF TOPS THE MARKET
The Slate Seed Company,
South Boston, Virginia.
Dear Sirs:—
In 1922, I purchased an ounce of your Improved Gold Leaf; I had never had any experience in bright tobacco growing; this being my first crop. I planted one and one-half acres and the yield was one thousand pounds per acre and the price was the highest average price paid on the Petersburg bright tobacco market for that year. I averaged 42c lb. In 1923, I sowed the same seed and planted three acres. The yield was the same, but the price that year was much lower, yet I drew the highest average for the season, 25½c. In 1924, I purchased another ounce of seed and planted three acres. The yield was a little heavier and for the third successive year I held the highest average on my market. I have had no disease in any of the crops and have had no trouble in obtaining perfectly successful cures. I always recommend Slate’s Improved Gold Leaf and attribute all of my success to the fact that your seed are the most perfect.

Norman L. Walker,
February 19, 1925. Dinwiddie, Va.

3001—Slate’s Improved Gold Leaf

This variety was originated on our Hyco Farm and has become the most popular flue-cured bright tobacco in the world. For the bright flue-cured belt of Virginia, North and South Carolina, Georgia and Florida nothing better can be found.

The leaf is long and broad and tapers to a sharp tip. These are well spaced upon the stalk to admit sunlight and make it ripen uniformly upon the hill. The plant is upright in growth holding its lower leaves off the ground. The tip leaves which in many tobaccos are almost worthless, fill out well in Improved Gold Leaf and cure into a good bright color. Gold Leaf is easier to cure into a high grade bright tobacco than any other sort. It is less inclined to disease than any other sort and will grow on more different types of soil than most tobaccos.

Since its introduction, we have constantly bred and selected our strain of Improved Gold Leaf making it better and better each year until today it is as near the perfect bright tobacco as will ever be found. We do not grow our seed in any haphazard manner but breed constantly towards a fixed ideal. Every man who grows tobacco should secure seed of this kind every year, because then he is constantly improving his tobacco. We do not try to meet competition on our tobacco seed, because no man can compete with us in quality so we will not compete with them in price.

Price 75c oz., $2.25 ¾ lb., $6.00 lb. postpaid.
Treated Seed—$1.25 oz., $4.00 ¾ lb., $10.00 lb.
The Finest Bright Tobaccos

3002—SLATE’S IMPROVED BIG WARNE.—One of the best bright sorts for Virginia, North Carolina, South Carolina, or Georgia. The leaves are long, medium broad, and well spaced on the stalk. For thin or medium soils, this makes an ideal variety, but on rich land it may grow rather rough. Cures into a bright yellow leaf with good weight and fine texture. Oz. 60c, ¼ lb. $1.75, lb. 50c postpaid.

Treated Seed—oz. $1.00, ¼ lb. $2.75, lb. $7.50.

3003—SLATE’S CONQUEROR.—A very thin bright tobacco adapted to fine curing. It is one of the easiest to cure into a bright lemon yellow and has very fine texture. For very strong lands that do not produce good bright tobacco, this will make a good sort. Where other sorts grow too heavy and coarse, this will make good weight and still be easy to cure. It is also a fine variety for growing extra thin cigarette tobacco. Oz., 50c, ¼ lb. $1.50, lb. $4.00 postpaid.

3035—WARNE.—This is one of the best fine cured tobaccos known to us. It is adapted to a wide range of soils and produces a good crop over the entire bright tobacco belt of Virginia, North Carolina, South Carolina, and Georgia. Leaves are long, medium broad, and taper to a sharp point. It is of fine texture, good curing qualities and a safe variety in every respect. Oz. 60c, ¼ lb. $1.75, lb. $5.00 postpaid.

Treated Seed—oz. $1.00, ¼ lb. $2.75, lb. $7.50.

3016—IMPROVED YELLOW PRYOR.—For thin or medium fertile sandy soils in the eastern bright belt, there are few varieties that will pay better than this one. It is naturally a heavy tobacco, but on sandy soils makes just enough weight to cure good and when grown on such a soil it makes a brighter and makes the very highest class of bright leaf. Leaf is medium long, rather broad, of very fine texture, and good weight. Oz. 50c, ¼ lb. $1.50, lb. $4.00 postpaid.

Treated Seed—Oz. 75c, ¼ lb. $2.25, lb. $6.00.

3008—SLATE’S IMPROVED WHITE STEM ORONOКО.—This is a tobacco adapted to a wide range of uses and almost all kinds of soils. It is used very extensively in the southern part of the eastern part of the bright belt, in the clay soils of the bright belt, and even to the alluvial soils of the dark belt. On medium to thin soils, it will make the highest class of bright leaf and on rich soils it will make a medium bright or mahogany. The leaf is medium long, broad, very fine texture, and easily cured. Oz. 50c, ¼ lb. $1.50, lb. $4.00 postpaid.

Treated Seed—Oz. 75c, ¼ lb. $2.25, lb. $6.00.

3020—JAMAICA WRAPPER.—An excellent bright tobacco for sandy soils that is very popular in certain sections of North Carolina. The leaf is broad, of medium length, and runs to a sharp tip. It makes good weight and is easily cured a bright yellow. Oz. 50c, ¼ lb. $1.50, lb. $4.00, postpaid. Treated Seed, oz. 75c, ¼ lb. $2.25, lb. $6.00.

3017—NANCY’S BEST.—This variety seems to enjoy great popularity around the eastern section of South Carolina, but is not much used elsewhere. For medium strong sandy soils, it will make a product of good weight and easy to cure. The leaf is almost as wide as it is long and tapered. Oz. 50c, ¼ lb. $1.50, lb. $4.00, postpaid.

3034—HICKORY PRYOR.—A bright tobacco noted for its high color and heavy weight. On sandy soils where it is hard to obtain good weight, this makes an ideal sort. Leaf is medium long, broad, and tapering to sharp tip. Fine texture, well spaced on stalk, and easily cured. Oz. 50c, ¼ lb. $1.50, lb. $4.00 postpaid.

Treated Seed—Oz. 75c, ¼ lb. $2.25, lb. $6.00.

3006—SLATE’S IMPROVED LITTLE ORONOКО.—It is very long, narrow, pointed, and grows rather close on the stalk. It is a valuable bright sort, because it can be grown on very strong lands or very thin ones. It does not grow rough and wild on strong soils like some of the bright sorts, yet it will make a good leaf on even the poorest of soils. It is easily cured into a bright red or mahogany, but does not make the highest grade of bright leaf. It is very heavy and is considered a most profitable variety by many growers.

Oz. 50c, ¼ lb. $1.50, lb. $4.00 postpaid.

Treated Seed—Oz. 75c, ¼ lb. $2.25, lb. $6.00.

3007—SLATE’S IMPROVED YELLOW ORONOКО.—This is one of the oldest tobaccos in cultivation and still very popular. It is one of the most reliable brights and can be grown on a wide range of soils, being adapted to almost any place that bright tobaccos will grow. Leaf medium long, rather wide, and tapering to slightly blunt point. Well spaced on stalk and very easy to cure.

Oz. 50c, ¼ lb. $1.50, lb. $4.00 postpaid.

Treated Seed—Oz. 75c, ¼ lb. $2.25, lb. $6.00.

3014—NORTH CAROLINA BRIGHT YELLOW.—An old bright variety of good quality. It is adapted to almost any bright tobacco soil and makes a leaf of good weight and easy curing qualities. Leaf rather long, medium broad, and tapering.

Oz. 50c, ¼ lb. $1.50, lb. $4.00 postpaid.

3009—SLATE’S HYCO.—A thin bright cigarette tobacco used quite extensively in this and foreign countries. The leaf is medium long, very wide, and rounded at both butt and tip. For strong sandy soils, it is an excellent bright sort, but should not be used on thin sandy soils unless a very thin bright leaf is desired.

Oz. 50c, ¼ lb. $1.50, lb. $4.00 postpaid.

3010—SLATE’S IMPROVED LONG LEAF GOOCH.—The leaves of this variety are larger than those of any other, being very long, wide, broad shoulder and center, tapering to sharp tip. It is medium heavy and especially adapted to sandy soils. Cures easily and makes the very best sort of bright tobacco.

Oz. 50c, ¼ lb. $1.50, lb. $4.00 postpaid.

3011—SLATE’S IMPROVED HESTER.—This tobacco has won great favor in certain sections. It is used mostly in the sandy soils of the Carolinas, in Canada, and certain foreign countries. Makes a good bright tobacco for cigars, cigarettes, or pipe smoking. Leaf is rather short, wide, and tapering to a sharp point. A very early maturing sort.

Oz. 50c, ¼ lb. $1.50, lb. $4.00 postpaid.

3012—TILLEY.—Also called Big Tilley. This is a good bright variety for the sandy soils of the eastern Carolinas and Georgia. Leaves large, medium long, very wide, and wide apart on stalk.

Oz. 50c, ¼ lb. $1.50, lb. $4.00 postpaid.

Treated Seed—Oz. 75c, ¼ lb. $2.25, lb. $6.00.

3013—SLATE’S WRAP.—Another popular bright variety for sandy soils. Leaves long, broad, and tapering. Well spaced on stalk, fine texture, and easily cured.

Oz. 50c, ¼ lb. $1.50, lb. $4.00 postpaid.

Treated Seed—Oz. 75c, ¼ lb. $2.25, lb. $6.00.

3015—BONANZA.—This is a popular variety in eastern Carolinas. This is the sandy soils. It is easy to cure and makes a good rich leaf of good weight and bright color. Farmers living in western North Carolina are warned that the variety that they know as Bonanza is White Stem Oronoko and not this sort. We have found this out from our trials.

Oz. 50c, ¼ lb. $1.50, lb. $4.00, postpaid.
Five Best Sorts
FOR THE BURLEY BELT

3052—ROOT-ROT RESISTANT BURLEY.—This is a splendid selection from the Stand-Up strain of burleys and has been bred and selected by the Kentucky Experiment Station to produce resistance to the Black root-rot which is so destructive in many Burley fields. This strain is practically immune to root-rot now and makes a big robust plant where common burleys attain no size at all. For this reason, no better variety of burley can be found for the average grower. We have been growing tobacco seed for the past sixty years and are devoting especial care and attention to this burley and to make our seed stock even more desirable, we are treating these seed to kill the germs of any “Black Fire” or other disease which often takes a terrible toll in burley crops. Thus the burley grower who uses Slate’s Seeds of Root-Rot Resistant burley has as near absolute protection as is possible to obtain for his crop. A highly bred strain of burley which is free root-rot and clean, plump, healthy seed which have been treated to free them from “Black Fire” and “Damping Off.” The stalk is rather tall with broad leaves tapering to a blunt point. The leaves are held up off the ground which gives a much finer product when cured. See photo above for general appearance. We do not know of any burley tobacco that will make more money for the farmers than this.

Price, oz. 75c, ¼ lb. $2.25, lb. $6.00, postpaid.
Treated Seed, oz. $1.25, ¼ lb. $4.00, lb. $10.00.

3051—WHITE TWIST BUD.—This is a good variety of the old strain of burley. The leaf is very long, medium broad and tapered to a sharp tip. As a rule the leaves drop showing the prominent white ribs. For years this was the principal burley used and is still desired by many growers. It is noted for its good weight and bright color.

Price, oz. 60c, ¼ lb. $1.75, lb. $5.00, postpaid.
Treated Seed, oz. $1.00, ¼ lb. $2.75, lb. $7.50.

3052—JUDYS PRIDE.—This variety has won great popularity in certain sections of Kentucky and Tennessee and we think it a good stand-up burley. The leaf is broad, long and tapering with prominent white ribs. The stalk is strong and holds the leaves well up off the ground. It has every characteristic of an excellent burley and should produce a bright leaf of high quality.

Price, oz. 60c, ¼ lb. $1.75, lb. $5.00, postpaid.
Treated Seed, oz. $1.00, ¼ lb. $2.75, lb. $7.50.

3053—RED BURLEY.—This famous old variety has a host of friends throughout the burley belt. It belongs to the stand-up strain which holds the leaves well up off the ground and keeps them free from the dirt and grit that injures the quality of the cured leaf. The leaf is long, broad and tapering to a rather blunt point. It is well spaced on the stalk and said to produce a very heavy grade of burley. Our treated seed should always be used by burley growers. This treatment protects the young plants to a great extent and helps to keep down the “Black Fire”, “Wild Fire” and other diseases.

Price, oz. 60c, ¼ lb. $1.75, lb. $5.00, postpaid.
Treated Seed, oz. $1.00, ¼ lb. $2.75, lb. $7.50.

3018—SLATE’S IMPROVED WHITE BURLEY.—This is our private strain of burley and one of the best of the stand-up type. We have grown this for years and it has been used very extensively throughout the burley belt with excellent results. The stalks are large and strong, holding the leaves up out of the dirt. The leaves are large, broad, long, and tapering, with white midribs, but very fine texture otherwise. It is an easy variety to cure and makes a heavy yield of rich bright leaf. Each year our tobacco seed crops are inspected twice by experts from the office of the State Entomologist to see that they are free from “Wild Fire,” “Black Fire” or “Angular Spot” and in addition we treat our seed by a special process, known only to us. Thus every protection is thrown around the man buying seed from us.

Price, oz. 75c, ¼ lb. $2.25, lb. $6.00, postpaid.
Treated Seed, oz. $1.25, ¼ lb. $4.00, lb. $10.00.

Dear Sirs:—

I am sending by this mail another order for your Improved White Burley tobacco seed. I have used your seed for the past two years and find them to be the best that can be obtained. I ordered seed from you and from another firm and your seed were so much better that I will never use any other but yours.

Yours truly, Arthur Parsley.
January 20, 1925.
Tomkinsville, Ky.
Dear Sirs:—

Two years ago I ordered one ounce of your Improved White Burley seed and got good results. On one acre I raised 2,330 lbs. and on another acre 1,032 lbs. I gave some of the seed to one of my neighbors and also gave lots of plants to other neighbors, and their results were all good. I can recommend your tobacco seed for purity and will highly recommend them to everyone.

Very respectfully,

A. J. Baskette.

March 5, 1925.

Fall Branch, Tenn.

### Dark, Heavy Tobaccos

**FOR THE FIRE-CURED DISTRICT**

3027—**BIG ORONOKO.**—This variety has few equals among black tobaccos. It is one of the most reliable, produces a heavy crop, cures easily, has fine silky texture, and nearly always sells at good prices. Its chief features are its adaptability to almost all kinds of soils and its easy curing qualities. The leaf is very long, broad, tapering, set rather close on stalk, and has small stem and ribs. It will make a good red or black tobacco. Oz. 50c, 1/4 lb. $1.50, lb. $4.00, postpaid.

Treated Seed—Oz. 75c, 1/4 lb. $2.25, lb. $6.00.

3036—**SLATE'S RICH WONDER.**—A variety introduced by us some years ago. It is now noted for being one of the largest and heaviest tobaccos in cultivation. It is not as easy to handle as the Big Oronoko nor so fine in texture, but it will make more pounds per acre than any sort we know of. Leaves of enormous size, very long, broad, and tapering.

Oz. 50c, 1/4 lb. $1.30, lb. $4.00, postpaid.

Treated Seed—Oz. 75c, 1/4 lb. $2.25, lb. $6.00.

3029—**LIZARD TAIL.**—The leaf is not so large but is very long and rather narrow and possesses great weight and body, making it rank well in the class of heavy tobaccos. It is a most reliable sort and easy to cure. Will make a good heavy red or black leaf.

Oz. 50c, 1/4 lb. $1.30, lb. $4.00, postpaid.

Treated Seed—Oz. 75c, 1/4 lb. $2.25, lb. $6.00.

3032—**BLUE PRYOR.**—A variety famous in the black belt of Kentucky. Grows very large broad leaves and makes some of the blackest tobacco possible. Has good weight and makes an enormous yield.

Oz. 50c, 1/4 lb. $1.50, lb. $4.00, postpaid.

Treated Seed—Oz. 75c, 1/4 lb. $2.25, lb. $6.00.

3033—**SLATE'S IMPROVED ONE SUCKER.**—Leaf long, medium broad, fine texture, and very heavy. It is one of the best of dark sorts and is used extensively through Virginia, Kentucky, and Tennessee in the dark belt. It will also make a good mahogany tobacco when flue cured. Can be flue, sun, air, or fire cured. It is also known as Turtle Foot in certain sections.

Oz. 50c, 1/4 lb. $1.50, lb. $4.00, postpaid.

Treated Seed—Oz. 75c, 1/4 lb. $2.25, lb. $6.00.

3035—**SILKY PRYOR.**—A good heavy tobacco of very fine texture. It can be made into a good red or black leaf and can be air or fire cured. Leaf broad, long, and heavy.

Oz. 50c, 1/4 lb. $1.50, lb. $4.00, postpaid.

Treated Seed—Oz. 75c, 1/4 lb. $2.25, lb. $6.00.

3037—**TENNESSEE RED.**—We consider this one of the best of the large leaf black sorts. The leaf is very large, broad, and long. Its texture is good and it makes a very heavy grade of tobacco. Suitable only for air or fire curing.

Oz. 50c, 1/4 lb. $1.50, lb. $4.00, postpaid.

3038—**LACKS.**—A popular black tobacco of the large leaf type. Leaf of enormous size, long, broad, and very heavy. Makes a good black tobacco.

Oz. 50c, 1/4 lb. $1.50, lb. $4.00, postpaid.

Treated Seed—Oz. 75c, 1/4 lb. $2.25, lb. $6.00.

3039—**KENTUCKY YELLOW.**—We consider this one of the best of the dark tobaccos. It possesses good curing qualities, fine texture, and heavy weight. The leaf is long, very broad, and tapering. It is adapted to almost the entire black belt and all air curing districts and will make a product of real value.

Oz. 50c, 1/4 lb. $1.50, lb. $4.00, postpaid.

Treated Seed—Oz. 75c, 1/4 lb. $2.25, lb. $6.00.
The Best Sun-Cured Tobacco

3031—SWEET ORONOKO.—This is one of the oldest tobaccos in cultivation and one having a great range of uses. It is the best sort for sun-curing and about the only kind used in the sun-cured belt. Then it is the best variety to grow for home use or to make “Home Spun” chewing tobacco. It makes an ideal heavy black tobacco when grown on strong land or it can be cured into a rich heavy mahogany when flue cured. The leaf is very long, rather narrow, with prominent ribs. When cured it has great weight and is rich with gum and oil.

Price, oz. 50c, ½ lb. $1.50, lb. $4.00, postpaid.
Treated Seed, oz. 75c, ½ lb. $1.75, lb. $6.00.

3029—FLANAGAN.—The leaf is long, of medium width and rather coarse fibers. It is often used for sun-curing but may also be flue cured into a rich heavy mahogany, which nearly always commands good prices. It is adapted to a wide range of soils and may be cured in almost any manner.

Price, oz. 50c, ½ lb. $1.50, lb. $4.00, postpaid.
Treated Seed, oz. 75c, ½ lb. $1.75, lb. $6.00.

Imported and Cigar Tobaccos

3057—ROUND TIP.—This is a beautiful strain of Sumatra tobacco, which is grown extensively in the shade tobacco area of Florida. For a shade-grown cigar leaf it is hard to find anything better. The leaf is rather broad, short, and pointed, giving it almost a round effect. It stands erect on the stalk. This makes an ideal cigar leaf of fine texture and high aroma.

Price, oz. $1.00, lb. $10.00, postpaid.

3040—VUELTa de ABAJO (First Crop).—Our stock of these seeds is grown from seeds imported direct from the famous Vuelta Valley. The first crop is far better than imported stock, since it has become partly acclimated and is larger. Plants medium size; leaves broad, very silky, exceedingly fine grained, and retains its original aromatic flavor.

Oz. $1.00, lb. $10.00, postpaid.

3041—VUELTa de ABAJO (Second Crop).—This variety is grown from the best First Crop seed. For an extra large Havana cigar leaf, this variety cannot be excelled. Leaf much larger than that of First Crop, but not so silky or highly flavored.

Oz. 60c, lb. $6.00, postpaid.

Gentlemen:

We are so well pleased with Slate’s Seeds and their promptness in filling our orders that I feel it my duty to write you. We commenced with a sample of beet seed and from that small packet made two guano bags full of nice table beets. Then, in 1923, ordered one ounce of tobacco seed and last year we received the highest price for our tobacco that we have ever received and I have been farming for thirty years. So we don’t save any more seed stocks in our tobacco fields.

A well satisfied customer,

March 5, 1925.

J. H. Dennis, Cumberland, Va.

3042—IMPORTED SUMATRA.—Our stock comes direct from the native Sumatra country. We import only seeds that we know to be pure and first class in every respect. The seeds we offer for sale are of the first crop, and tobacco grown from them retains its fine, silky texture and makes the finest wrappers.

Oz. $1.00, lb. $10.00 postpaid.

3043—BRAZILIAN.—This variety was imported by us, but has now become acclimated and is more easily grown than our other imported seed. The leaf has good size, shape and texture, and retains, to a great extent, its native high flavor. Makes a delightful smoke in either pipe or cigar.

Oz. 60c, ¼ lb. $1.75, lb. $6.00 postpaid.

3044—SLATE’S IMPROVED CONNECTICUT SEED LEAF.—The old strain of this tobacco has always stood well with cigar manufacturers, but both manufacturers and growers cannot help but admit that this improved strain is decidedly better. Noted for its handsome leaf, which possesses a choice texture and delightful flavor. Ripens very uniformly and is considered a very desirable cigar variety.

Oz. 60c, ¼ lb. $1.75, lb. $5.00 postpaid.

3046—EVANS or CINNAMON SCENTED.—A variety whose high, aromatic flavor is well known and very popular. For a pipe tobacco this has no equal, and it is extensively grown in Canada for this purpose. The leaf is of good size and shape and excellent quality. If you want a highly flavored tobacco you cannot get a better one than this.

Oz. 60c, ¼ lb. $1.75, lb. $5.00 postpaid.

3050—GENERAL GRANT.—This variety ranks among the first in the manufacture of cigars. In addition to its other good characteristics, it is noted for its extreme earliness. Upon the market it is very well known and popular, its products always being in demand, as the size, shape and texture of its leaf help to make it an ideal cigar tobacco.

Oz. 60c, ¼ lb. $1.75, lb. $5.00 postpaid.

3049—IMPORTED TURKISH.—Originates from the finest of the native strains and possesses good texture and high aroma. Leaves grow rather close on stalk, are small and make a product most valuable for cigarettes.

Oz. $1.00, lb. $10.00 postpaid.

3045—COMSTOCK SPANISH.—This variety may well be called the “Standard” for the cigar leaf type. It is more extensively grown than any other variety of its type, and is considered the very best of cigar tobaccos. It was bred from a native Havana strain, and has been greatly improved in the breeding. The leaf is of good size and is suitable for wrappers or fillers. We consider this variety as good as any that we have ever known, and recommend it with confidence.

Oz. 60c, ¼ lb. $1.75, lb. $5.00 postpaid.

3048—BIG HAVANA.—An Americanized Havana which grows to an unusually large size and matures very early. A heavy cropper, and in the South will make two crops from one planting. Its desirable size, fine texture and delightful flavor have made it a favorite with both planters and manufacturers.

Oz. 60c, ¼ lb. $1.75, lb. $5.00 postpaid.

3047—PENNSYLVANIA SEED LEAF.—Very extensively grown in the Lancaster district of Pennsylvania, which is famous for its fine cigar tobaccos. Its products are of the best and bring good prices. The leaf has a handsome appearance and is of good quality.

Oz. 60c, ¼ lb. $1.75, lb. $5.00 postpaid.
A mixture is much more desirable than any one kind of grass or clover sowed alone. A mixture gives more hay and better hay, and it is much easier to get a stand with mixed grasses and clovers than it is when any one is sowed alone. In making up the mixtures listed below we use only “Perfection” Brand Seeds, the very best that we can secure. Our mixtures are the pride of our Field Seed Department. They have given excellent results for years, and from a business standpoint, if for no other reason, we could not afford to cheapen them by using low-grade seed. In making up the formulae for these we have relied upon our own experience to a great extent, and in addition have consulted some of the largest and most successful farmers in the South. These mixtures are designed to suit your soil, your climate, and your needs. If you want to put some hay money in your pocket next year, sow a “Perfection” Brand Mixture this spring.

### 2060—Mixture No. 1
**Highland Hay**

<table>
<thead>
<tr>
<th>Composed of</th>
</tr>
</thead>
<tbody>
<tr>
<td>Italian Rye Grass</td>
</tr>
<tr>
<td>Red Clover</td>
</tr>
<tr>
<td>Tall Meadow Oat Grass</td>
</tr>
<tr>
<td>Alsike Clover</td>
</tr>
<tr>
<td>Perennial Rye Grass</td>
</tr>
</tbody>
</table>

Alfalfa, Red Top or Herds Grass, Kentucky Blue Grass

All of these mixtures should be seeded between February 1 and April 1, at the rate of 30 to 35 pounds per acre.

### 2062—Mixture No. 3
**Lowland Pasture**

<table>
<thead>
<tr>
<th>Composed of</th>
</tr>
</thead>
<tbody>
<tr>
<td>Timothy</td>
</tr>
<tr>
<td>Red Top or Herds Grass</td>
</tr>
<tr>

Red Clover, Italian Rye Grass, Timothy, Red Top or Herds Grass

### 2064—MIXTURE NO. 5

<table>
<thead>
<tr>
<th>Composed of</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oats</td>
</tr>
<tr>
<td>Rape</td>
</tr>
<tr>
<td>Canada Field Peas</td>
</tr>
</tbody>
</table>

Seed this mixture at the rate of 100 pounds per acre. Seeding should be done during February or March, and it will be ready for grazing the latter part of April or the first of May.

See Field Seed Price List for prices.

### 2063—MIXTURE NO. 6

<table>
<thead>
<tr>
<th>Composed of</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cow Peas</td>
</tr>
<tr>
<td>Soy Beans</td>
</tr>
<tr>
<td>Sorghum</td>
</tr>
</tbody>
</table>

Seed this mixture at the rate of 100 pounds per acre. Sow about corn planting time or the latter part of April to the first of May. Should be ready for grazing by July.

See Field Seed Price List for prices.

### Slate’s Hog Pasture Mixture

Every hog raiser should have a piece of land seeded in both of these mixtures. The number one will come in for early grazing and the number two will follow for the summer grazing. The two will carry your hogs through the summer if you sow sufficient land to care for what hogs you have. One acre of land should carry one hog through the summer. In other words, one acre seeded in Mixture number one and another acre seeded in Mixture number two should take care of two hogs throughout the entire summer. Regardless of whether you raise hogs for market or just for home use you should see that they yield you a profit. And nothing will increase the profits from hogs more than good pastures.
2009—White Dutch Clover

A valuable little clover for sheep and cattle pasture, improving and holding the soil together, and for sowing
on lawns. Makes a low compact growth that covers the
soil. Excellent for putting in pasture mixtures. Sow
5 lbs. per acre.
Lb. 75c postpaid. See Field Seed Price List for
prices on bulk lots.

2008

Bokhara, White Sweet Clover

Those worn out spots on your farm can easily be
brought back into cultivation by sowing in Sweet
Clover. This clover will grow almost anywhere, and it
adds nitrogen to the soil, and its roots go down into
the subsoil and break it up, carrying off water and
adding humus to it. In a few years this clover will
bring these spots back into cultivation and have them
inoculated for alfalfa. Good grazing for cattle and an
excellent thing for bees. Just cut the soil with a disc
harrow, sow 20 lbs. of seed per acre, and cover with
a light harrow.
Lb. 30c postpaid. See Field Seed Price List for
revised prices.

2003—Burr Clover

It is a great soil improver and will stand for years
holding the soil together and building up a store of
Nitrogen in it. The seed offered are Southern types
in the burr, and carry their own inoculation. It is
easier to get a stand with these than with hulled seed.
Soak for several hours in lukewarm water before sowing,
so as to hasten the germination, and sow two
bushels (20 lbs.) per acre.
Lb. 20c postpaid. See Field Seed Price List for
bulk prices.

2006—Red Clover

A standard clover which every farmer knows. It
yields a big crop of hay, good pasturage, and builds
up the soil. For pasturage I think that Alsike will be
better, but for hay this cannot be bettered. It ripens
with Tall Meadow Oat Grass, Orchard Grass, Italian Rye
Grass, and all of the earlier grasses. Should be put in
mixtures with these when sowed for hay. When sowed
for grass use 8 to 10 lbs. of clover per acre. When
sowed alone use 10 to 15 lbs. per acre. Can be seeded
from January 1 to March, or from August to October, and
will succeed on almost any soil that will produce
clover. Gives two cuttings per year in most sections, and
will last for several years.
Lb. 40c postpaid. See Field Seed Price List for
prices in bulk.

2002—Alsike Clover

This clover has a distinct advantage over either the
Red or the Sapling for grazing. It is hardier and will
stand more grazing than either of them. And for sowing
on wet or low lands it is better than either the
Red or Sapling, because it stands the wet soil better.
For hay its yield is not quite so great as the Red or
Sapling, but it makes better quality of hay than either
ter of them. The stalks are not so large, therefore the
hay cures easier and stack eat it better. Alsike Clover
matures about the same time as Sapling, some ten days
or two weeks later than the Red. Sow and handle it
in all respects like Sapling, but it does not require so
many pounds of seeds per acre. Sow at the rate of
7½ lbs. per acre.
Lb. 40c postpaid. See Field Seed Price List for
prices on bulk lots.

2001—Alfalfa

This has long been recognized as the most profitable
hay crop that can be grown. It yields more tons and
better hay than any crop we can sow. Getting it estab-
lished is somewhat difficult, but once it gets a start on
your farm, a small acreage will produce sufficient hay
for all your livestock. And nothing in the world is
better feed than alfalfa hay. It is especially good for
horses, cows, hogs and poultry, and no farm can afford
do without some alfalfa. In order to make a good
crop of alfalfa there are some important facts to ob-
serve. First the soil should be well drained, and it is
better for it to be a stiff soil containing a good pro-
portion of clay. Second, an application of lime should
be made, using from one to two tons per acre, because
alfalfa will not grow on sour land. Third, in selecting
the spot for alfalfa be certain to pick out land that
has a deep soil to admit of the long roots going down.
If the land is underlaid with sandstone or rock it will
not make a successful field. If it be possible, some
smother crop, such as cow peas, soy beans, buckwheat
or any crop that kills grass should precede the alfalfa.
Break deep during the early summer, and harrow every
week or ten days so as to kill all weeds and grass. If
the soil is not very rich apply a good grade of com-
mercial fertilizer running high in Phosphoric Acid,
low in Nitrogen, and with a good part of Potash in it.
Harrow this into the soil with a light harrow just be-
fore seeding. About February 15 or September 1 is
the best time to seed, but it may be done from January
to March or from August 1 to September 15 with fair
chances of success. Sow the seed at the rate of 20 to
30 pounds per acre and cover with a light harrow or
brush. And always inoculate the seed before sowing.
Alfalfa gives from three to five cuttings per year, and
it should always be cut just as the shoots of the sec-
ond crop begin to push up around the roots. By ex-
amining the plants it is easy to tell when cutting should
be done. Never allow the second crop to get high
enough for the mower to cut it when you cut the first
crop. Sow “Perfection” Brand Alfalfa only. Nothing
but the best will do for this crop. The seed represents
an investment which will yield for years.
Lb. 40c. postpaid. See Field Seed Price List for
prices on bulk lots.
2033—Perennial Rye Grass

A fine pasture grass that is especially adapted to lands too wet for Timothy, Orchard Grass, etc. It should be used in pasture mixtures, and for sowing lowland mixtures it should form the basis of the mixture. If clover is desired add 5 lbs. of Alsike Clover with 25 lbs. of Perennial Rye Grass, and you should have an excellent lowland pasture. If seeded alone sow 30 lbs. per acre. Like the Italian Rye Grass, this should be seeded early in the spring or fall. It comes early in the spring, and this grass is perennial and will make a permanent pasture.

Lb. 25c postpaid. See Field Seed Price List for prices on bulk lots.

2034—Meadow Fescue

Also known as Randall Grass, and a most useful grass for either hay or pasture. Its long roots penetrate deep into the soil and make it a good grass for dry weather grazing. It is hardy and will stand the severest weather, and in the South it remains green throughout the winter and will furnish winter pasture. 10 lbs., added to a pasture mixture will prove useful in winter or dry weather. If seeded alone sow 30 lbs. per acre. Seeding should be done from January to March or July to October.

Lb. 30c postpaid. See Field Seed Price List for prices on bulk lots.

2035—Sudan Grass

A new grass that is becoming very popular for a quick growing hay crop. It has been given a rigid test on Hyco, with the following results: It grows on rich land to a height of eight feet, yields as much as four tons of hay per acre, is said to rank next to Alfalfa in food value, and is greatly relished by stock of all kinds. It belong to the Sorghum family, produces its first crop in about six weeks from seeding, and when seasonal can be cut from three to five times per year. It is an annual; therefore, is no trouble to get rid of. Sow like Sorghum or Millet, either broadcast or in drills, at the rate of five pounds per acre in drills, twenty pounds per acre broadcast. Seeding should not be done until all danger of frost is past. The soil should be rich, either clay or loam. The hay should be cut just as soon as the heads are well out and before the seeds form. Some people claim that Sudan Grass is rather hard on land, but our tests have not proved this. While it is a strong and rapid feeder, we do not think that it materially injures the soil upon which it grows.

Lb. 25c, postpaid. See Field Seed Price List for prices on bulk lots.
2027—Herds Grass

(RED TOP)

In certain tobacco growing sections, especially where bright tobacco is grown, this is a most valuable fallow crop. The land is grazed for a year, then turned under, it produces an excellent grade of bright tobacco. Herds Grass is the blue grass of the South. It grows almost anywhere, and will make the best of grazing. It does not improve the soil except to hold it together, and adds humus, but is valuable in this respect. When sowed for hay, it should always have some timothy or clover mixed with it. As a hay it is of good quality, but nothing extra when sowed alone. By seeding Herds Grass and Clover together the soil is held together and improved at the same time. Herds Grass should go into every pasture mixture. Sow from January to April or July to December at the rate of 6 lbs. per acre if seeded alone, or 4 to 5 lbs. with other grasses or clovers.

Lb. 50c, postpaid. See Field Seed Price List for prices on bulk lots.

2028—Timothy

This is the most valuable hay grass grown. It's hay is the most nutritious and stock relish it. Timothy should always be sowed on good land because it is a rather hard feeder and will not make much hay on thin soils. By sowing Sapling Clover or Alsike Clover with the Timothy the soil is kept in good condition and a larger yield of hay is secured. When sowed alone sow 15 lbs. per acre. Seeding may be done from January to March or from July to November.

Lb. 25c postpaid. See Field Seed Price List for prices on bulk lots.

2031—Tall Meadow Oat Grass

A most valuable grass for seeding with Alfalfa and Red Clover. It produces a big crop of early hay or excellent pasturage. In growth it is tall and leafy with slender fine stalks. It never grows wild and rough. It stands adverse conditions much better than most other grasses, and stays green from early spring until frost, producing two crops of hay per season or pasture almost the year around. An ideal pasture mixture is 5 lbs. Alfalfa, 11 lbs. Tall Meadow Oat Grass, 14 lbs. Orchard Grass, and 6 lbs. Herds Grass. Or 8 lbs. Red Clover may be substituted in place of the Alfalfa. This mixture may be sowed and cut for hay for a season or two and then pastured. Tall Meadow Oat Grass may weigh only 11 lbs. per bushel and should be sowed at the rate of two bushels per acre when sowed alone, or one bushel per acre in mixture.

Lb. 30c, postpaid. See Field Seed Price List for prices on bulk lots.

2030—Kentucky Blue Grass

This is by far the best pasture grass that has ever been known, but it is hard to get it started in certain sections. In other sections it is natural and can easily be grown. It should be used in every pasture mixture, especially if the mixture is to be sowed on a stiff soil. Blue Grass is naturally a limestone grass, and if the soil be thoroughly limed and prepared as directed for alfalfa a stand may be obtained by farmers who do not live in the limestone section. Grazing improves it and makes it come thicker, and it will give good pasturage almost the entire year. If sowed alone sow two bushels (28 lbs.) per acre, and it should be sowed in the early spring or fall.

Lb. 50c, postpaid. See Field Seed Price List for prices on bulk lots.

2032—Italian Rye Grass

For quick pasture or hay crop nothing is better than Italian Rye Grass. It is one of the first to come out in the spring, and can be cut for hay during May. A good plan for fall sowing is to seed this grass with Crimson Clover, the red bloom kind. It makes better hay than either rye or oats, and will come in with the clover and help cure the hay. When sowed this way use 15 lbs. Clover and 20 lbs. of Italian Rye Grass per acre. This grass is a valuable addition to any pasture mixture, because it comes early and will admit the stock to the pasture several weeks earlier. Sow from January to March or July to December at the rate of 30 lbs. per acre if sowed alone, or 20 lbs. per acre in mixture. It requires a moist, rich soil.

Lb. 25c postpaid. See Field Seed Price List for prices on bulk lots.
SLATE SEED CORN

HOW TO HANDLE SEED CORN

During the spring, about the time the heaviest shipments of seed corn are going out, the germ of the corn is very active, and if you are not careful in handling it, it will lose its germination before planting time. Upon receipt of a package of seed corn, open it and if possible spread in a cool dry place. If it cannot be spread, just open the package and place in some cool room until you are ready to plant.

2017—WHITE CAP YELLOW DENT.—This is undoubtedly one of the earliest of the yellow corns. It produces in about eighty days and makes a splendid yield. Stalks grow large and rather tall, bearing one to two ears. Ears are large and eight to ten inches long. Grain long, rather narrow, and firmly set into a small white cob. The body of the grain is a pale yellow while the cap is white. For very late planting on either high or low lands nothing better can be had than this and it also makes a good variety for planting for green food, since it matures its crop so early.

See Field Seed List for prices.

2014—EARLY WHITE DENT.—This is an extra early white corn, producing a good crop in about 75 to 80 days. The stalks grow rather large and about eight feet high, bearing one to two good ears that average about seven to eight inches in length. Where a white corn is wanted and early maturity is essential, this variety has given entire satisfaction.

See Field Seed List for prices.

2016—IOWA GOLD MINE.—An early yellow dent corn producing a good crop in ninety days. The stalks are of medium size and height and produce from one to two good ears. Grain long and firmly set into a small red cob. This is a good variety for planting on lowlands.

See Field Seed List for prices.

2018—VIRGINIA WHITE DENT.—This is an old Southern variety of unusually good merits. It has been grown all over the South for years, and a better corn is hard to find. It is a single ear variety, which grows a large, high stalk, bearing its ear about middle way. The ears are long, heavy, hanging down, and have a medium size white cob. The grains are of medium width, deep and firmly set into the cob. Rather early, and on account of its large ears makes a good yield. It is safe and reliable.

See Field Seed List for prices.

2015—IMPROVED GOLDEN DENT.—An early yellow corn that produces mature corn within ninety days after planting. Stalks grow to a medium size and height. The grains are of medium depth, rather wide and of a golden yellow color. This corn is especially recommended for planting on land subject to overflow.

See Field Seed List for Prices.

46—SWEET FODDER CORN.—This is a robust growing sugar corn that makes the best of ensilage and green feed. Its stalk is very tall and bears an abundance of leafy foliage. Several large ears of corn per stalk and its sugar content makes it especially desirable for silage or green feed.

See Field Seed List for Prices.
2020—ENSILAGE.—The best and most popular of ensilage corns. The stalks grow unusually large and make a dense growth of fodder.

See Field Seed List for prices.

2019—BLOUNT'S PROLIFIC.—A heavy yielding white corn that is very popular for growing on rich land. Stalks grow very tall and bear from one to five short, medium-sized ears. Grains are of medium width. It is very firm and a good keeper.

See Field Seed List for prices.

2011—HICKORY KING.—Known to many growers as the poor man's friend, since it is thought that it will produce a better yield on poor land than any other variety. Stalks grow tall and produce from one to two unusually long, slender ears. The grains are very wide and deep, set into a small white cob. One grain will cover the butt of the cob.

See Field Seed List for prices.

43—SNOWFLAKE.—An early white dent variety much used for garden cultivation but makes a good large stalk and large ear. For an early field corn it is much more desirable than many of the yellow varieties and will make just as good yield. Matures in from 80 to 85 days.

See Field Seed List for prices.

2104—HAIRY OR WINTER VETCH

Few of our legume crops have such a wide range of uses or such a great value as vetch. It will grow on almost any kind of soil, is one of the greatest of soil improvers, will reseed itself, and make an enormous yield of the very best quality hay. The improvement to the soil will more than repay any farmer for the cost of seeding it and the hay or grazing comes as a profit. Hairy Vetch is the only one of the winter vetches that is hardy enough to stand the winters of Virginia and North Carolina. Other so-called winter vetches may be all right for the far South, but we cannot use them profitably up here. Hairy Vetch is hardy and will withstand our cold weather. For fall seeding it may be put in from August to October. Spring seeding should be done just as soon as the soil can be worked, not later than March 15. Sow 20 lbs. per acre with one bushel of oats or rye to hold the vines up.

Always inoculate vetches with FARMOGERM; compare it with some uninoculated and see the difference.

Lb. 30c postpaid.

See Field Seed List for bulk lots.

FIELD SEED PRICES

Change often during the season and firm prices cannot be quoted in this catalog. We issue a list of these prices every week during the season. A postal card asking for our new Field Seed Price List will bring you the latest prices on these goods at any time.
WINTER SEED OATS

2070—APPLER.—The best rust-proof winter oat that can be obtained. It is one of the first to mature in the spring, and is ready to cut before the Gray Winter ripens. The growth is large, with bunchy heads which produce an enormous yield of grain. The stalks are large and upright and grow to a height of 5 to 6 feet on good land.

See Field Seed Price List for prices.

2073—FULGHUM.—One of the earliest and hardiest of winter oats. It withstands severe winter weather nearer like the Gray Winter Turf than any of the others and will be ready to cut in plenty of time to follow them with Cow Peas or some such crop. Straw strong and upright.

See Field Seed Price List for prices.

2071—RED RUST PROOF.—A good winter oat that has been found especially valuable for sowing on low or wet lands. It is as near rust proof as any oat can be, and make a big yield. Hardy and stands the winter in fine shape. Not quite so early as the Appler.

See Field Seed Price List for prices.

2072—GRAY WINTER TURF.—This is the most popular winter oat that has ever been grown in the South. Makes excellent winter grazing and a big yield of grain. It is claimed by some farmers that this oat will stand more cold weather than any other. May be sowed with the White Bloom Crimson Clover or with Red Clover, and this gives an excellent hay crop. In growth it is spreading and bunchy with large heavy heads.

See Field Seed Price List for prices.

Dear Sirs:—

I was well pleased with the seed I ordered from you last spring. I raised Halbert Honey and Kleckley Sweets Watermelons that weighed 50 lbs. I will order seed from you next year.

Yours very truly,

J. W. GREEN.

Reidsville, N. C.

SPRING SEED OATS

2074—WHITE SPRING.—This is a standard variety that is very popular for spring sowing. It is not so early as the Burt, but makes a good growth of straw and a good yield of seed.

See Field Seed Price List for prices.

2075—BURT or NINETY DAY.—A very early variety making large bunchy heads and good growth of straw. It is a favorite sort for spring sowing, since it comes in much earlier than most spring oats. It is the best sort to sow with Canada Field Peas. It is adapted to Southern conditions and is one of the surest croppers known to us.

See Field Seed Price List for prices.

SEED BARLEY

Barley can be sowed from January to April and makes one of the best spring pastures and a big yield of grain. Sow from one to two bushels per acre. If sowed early, it can be grazed for some time during the spring and then allowed to head and make a grain crop. The grain makes excellent feed for poultry, horses, or cattle.

2076—BEARDED BARLEY.—One of the heaviest yielding varieties. Makes rank growth of straw, has very long heads, and makes one of the best sorts for threshing.

See Field Seed Price List for prices.

2077—BEARDLESS BARLEY.—This variety is preferred by some growers, because it does not have the beard. It makes a good yield and is safer to feed.

See Field Seed Price List for prices.

Dear Sirs:—

Some time ago I ordered some of your Red Rust Proof Oats and not having enough I had to buy a few on our local market. There was all the difference in the world in them. Yours were clean, heavy, pure seed, while the others were light and chalky.

Sincerely yours,

E. A. JACKSON.

Granville County, N. C.
2103—Teosinte

This is an important feed crop in the South, but will not do much north of Virginia. Teosinte requires a rich, moist soil and a long growing period. It will yield more feed per acre than any other crop and the feed is high in nutriment. On good soils it will grow from seven to ten feet high and can be cut several times per year. After each cutting its stools produces another crop heavier than the preceding. As a green feed it has few equals and when cut and dried it is far above corn fodder. Select a rich, moist spot, plow and prepare as for corn, and seed at the rate of three pounds per acre in drills. It should never be broadcast because the stalks cannot make their best growth unless they have plenty of room. In dropping the seed two or three should be dropped in a hill, hills being three and one-half feet apart. Seeding should not be done until late spring, when all danger of frost is over and the ground has become warm. Cut before the fodder gets tough and coarse and it will make better feed. Frequent shallow cultivation, the same as given corn, will hasten its growth and increase the yield.

Lb. 60c, postpaid. See Field Seed List for bulk lots.

2026—Broom Corn

Good brooms are selling very high and it is an easy matter for any farmer to grow his own. The home made broom is much lighter and will last much longer than the ones we buy. Broom corn will make an enormous crop on any good rich soil and may be planted in drills like Sorghum or Kaffir Corn at the rate of two and one-half pounds per acre. Cultivate like corn. The stalks grow very tall and produce large bushy heads possessing a tough fiber. One pound of seed will produce enough brooms for the average family for a year.

Lb. 25c postpaid. See Field Seed List for bulk lots.

2053—Japanese Buckwheat

Buckwheat is a great soil improver and will produce a good crop on very poor lands. It is especially desirable as a range for bees, makes one of the quickest and best smother crops to kill grass and weeds, and will produce a good crop of grain in about eight weeks from seeding. The grain makes good poultry feed or when ground makes the famous Buckwheat flour. Except when grown for grain it may be seeded at any time between May and August at the rate of one bushel (48 lbs.) per acre. If grain is wanted sow during the late summer, about ten weeks before frost so that the grain will be formed in cool weather. Very rich soils will not make a good crop, therefore select some medium fertile or poor spot.

Lb. 20c postpaid. See Field Seed List for bulk lots.

2025—White Kaffir Corn

Kaffir Corn is extensively grown for forage and is especially desirable for poultry. When grown for forage the plants are cut before the heads mature and it is generally fed green, but may be cured. For poultry the crop is allowed to mature its seed and these seeds are then given to chickens. The seed makes one of the best of poultry feeds and will greatly increase the egg production. Kaffir Corn should be planted on a rich bottom, if possible, in drills three and one-half feet apart and the plants should be thinned to six or eight inches apart. Cultivate like corn. It will grow from eight to twelve feet high and the fodder may be stripped from the stalks and the seed saved for the poultry. Sow after danger of frost is past at the rate of three pounds per acre.

Lb. 20c postpaid. See Field Seed List for bulk lots.
2054—Golden Millet
(Or GERMAN MILLET)

As a quick hay crop millet is most valuable. It matures its crop within about sixty days from seeding, makes a large yield, and if cut at the right stage, the hay is of excellent quality. It is one of the few hay crops that can be seeded after wheat and oats to make a crop that year. Almost any good soil will grow it and very little preparation is needed. A good plan is to sow millet with cow peas. In this manner the yield of hay is increased and the fertility of the soil is kept up. Sow at any time between May and August at the rate of one bushel per acre if seeded alone or three pecks of millet and one bushel of peas per acre. The hay should always be cut before the seed matures or just as the heads are in full bloom. Many farmers make a serious error in sowing millet by not using seed enough. This hay is not good unless it is sowed thick enough to produce fine stalks. When rough and coarse it is of but little value. Millet is one of the few hay crops that can be sowed and made during the late summer and often proves of great value when other hay is scarce.

Lb. 20¢ postpaid. See Field Seed List for bulk lots.

2055—Pearl or Cattail Millet

This variety, which is also known as Pencillaria, is grown principally for green feed. A small piece of land near the horse barn will prove a most profitable investment if planted in Pearl Millet. On very rich soils its growth is tall and luxuriant during the warm summer months. Should be cut just as the heads commence to put out and other crops will follow. It stools each time it is cut and will continue to come until frost. Sow after the ground gets warm in the late spring or early summer at the rate of five pounds per acre. The seed should be drilled in rows three and one-half feet apart and given a light covering. Give frequent shallow cultivation until the plants are several feet high and then there is nothing to do but cut the feed as you need it.

Lb. 35¢ postpaid. See Field Seed List for bulk lots.

FIELD SEED PRICE LIST giving revised prices on all clovers, grasses, etc., are issued every week during the season. Write for a copy at any time.
SOUP BEANS

These beans are generally grown for using dry during the winter months and they will not make a snap on account of their tough fibrous hulls. As a winter bean, however, they are invaluable. Can be planted in missing hills of corn, cotton or tobacco fields and allowed to remain on the vine until all pods are dry. Then the vines may be pulled up, allowed to dry, and the beans either beaten from them or shelled. It is best not to plant these beans until late in the season, because early plantings are almost always attacked by rust and do not yield very much. Plant from June 15 to July 15. If planted alone drop seed every six inches in rows three feet apart and give frequent shallow cultivation. When planted with other crops drop two or three seed to a hill. Medium fertile soils will produce more beans than a very rich soil.

2052—WHITE NAVY.—One of the best known and most popular sorts. The beans are small and pure white. Makes a delicious dish.
Lb. 25c postpaid. See Field Seed List for bulk lots.

2050—WHITE KIDNEY.—A most appetizing bean and a heavy yielder. The seed are pure white and kidney shaped and very large.
Lb. 25c postpaid. See Field Seed List for bulk lots.

2051—RED KIDNEY.—Similar in size and productiveness to the White Kidney. About the only difference is the color of the seed.
Lb. 25c postpaid. See Field Seed List for bulk lots.

EDIBLE COW PEA

These peas are grown in almost every southern garden and the varieties offered below are the finest of the table sorts. Plant after warm weather comes, in light drills two feet apart. No thinning should be necessary but frequent shallow cultivation will materially improve the yield.

2085—LARGE BLACKEYE.—A medium early, heavy producing pea that is good enough for any man's table. The vines make a vigorous growth and produce long, well-filled pods in abundance.
Lb. 25c postpaid. See Field Seed List for bulk lots.

2084—SUGAR CROWDER.—For yield and eating qualities, we do not think that this sort has an equal. The vines grow to medium size and produce an enormous number of pods. These pods are literally crowded with large irregular shaped peas. When cooked the peas are very tender—do not possess a tough skin like some sorts—and have a delightful flavor. One of the earliest peas and also one of the most productive.
Lb. 25c postpaid. See Field Seed List for bulk lots.

2102—Sunflower

A valuable crop for poultry and good for furnishing support for running beans or vines of all kinds. Ornamental and can be used for a high hedge to hide unsightly spots. Will produce an enormous crop of seed and grows on almost any kind of soil. Drop several seed in a hill at the desired distance and cover about one inch deep. For a hedge plant thick, but for seed allow about two feet apart. Sow after danger of frost is past.
Lb. 20c postpaid. See Field Seed List for bulk lots.

GET A NEW PRICE LIST of Field Seeds at any time. We issue these every week during the season and will gladly mail you a copy at any time.

SORGHUM

The sorghums comprise one of our most important forage crops and in addition to the excellent yield of forage, the syrup is of great value. For syrup plant Sugar Drip. It makes a better yield of syrup and gives a clearer color. For forage either Sugar Drip or Early Amber will do. The Sugar Drip contains more sweet sap, therefore runs higher in feed value than the Amber. Sow after danger of frost is past in drills three and one-half feet apart, using from five to eight pounds of seed per acre. Cultivate like corn and cut for forage when the seed are in the green stage. Sorghum makes a good thing to mix with Cow Peas, Soy Beans and Millet when sowing broadcast for hay. It improves the quality of the hay and aids in curing. When sowed in this manner use fifteen pounds of Sorghum with one bushel of the other seed per acre.

2101—SUGAR Drip.—This is undoubtedly the best of the sugar cane that grow from seed. It makes the finest sorghum molasses of any sort and gives a much better yield of syrup. The syrup is also clearer and much easier to cook than that of other kinds. On account of its high sugar content this variety is very valuable for feeding to all kinds of stock. Sugar is fattening consequently this sort makes excellent green feed. When grown for feed it may be seeded with cow peas or put in drills and not thinned.
Lb. 25c postpaid. See Field Seed List for bulk lots.

2100—EARLY AMBER.—The earliest of the sorghums and an enormous producer. On good soils it will grow to a height of ten feet and stool. Can be used for syrup making, but Sugar Drip is better for this purpose. The most desirable variety for forage since it makes a better yield and matures its crop early. Can be sowed broadcast at the rate of one bushel per acre or in a mixture with other seed.
Lb. 20c postpaid. See Field Seed List for bulk lots.
SOY BEANS

The Soy Bean is fast becoming our most important legume and hay crop. Its reliability under all conditions has made it a favorite with farmers in all sections. It will grow on almost any soil and will produce a good crop in seasons too dry or too wet for other legumes. It is more reliable and less trouble to cure than Cow Peas and of better feeding value. It is as good for improving the soil. Soy Beans may be sowed with other forage crops such as Sorghum, Corn, Sudan Grass, Cow Peas, etc. The most popular of these mixtures, however, is one-half bushel of Soy Beans with three pecks of Cow Peas per acre. The beans support the pea vines and help to cure the hay. When planted with corn the beans and corn are generally drilled in alternate rows. With Sorghum and Sudan Grass about fifteen pounds of one of these is mixed with one bushel of Soy Beans per acre. Early sowing of Soy Beans has proved best, but they should not be sowed until warm weather comes. April and May are two of the best months for seeding, although good crops may be made by seeding as late as June. Seeding is generally done broadcast at the rate of one bushel per acre. They may be put in drills, however, two feet apart, using about one-half bushel of seed per acre. When sowed in drills the plan is to give one or two cultivations to kill out the weeds and hasten the growth of the beans. The Soy bean is rather shy on germination and should not be put in the ground too deep. Light soils two to four inches and heavy soils one to two inches deep. Never mix the seed with fertilizer, because the acid of the fertilizer quickly kills the germ of the beans.

2045—MAMMOTH BROWN.—A large seeded variety of especial merit for hay growing. Grown upon the same land with the Mammoth Yellow, the Brown variety produces a much taller vine, smaller stems, more leaf growth which it retains, and fewer beans. It has enough beans to make the hay valuable and the stalk is much better for hay than that of the Yellow.

Lb. 25c postpaid. See Field Seed List for bulk lots.

2049—VIRGINIA.—In the past few years this variety has become very popular for hay making. It is claimed that the Virginia makes a taller and more leafy growth with finer stems and still a good yield of beans. They mature about fifteen days earlier than the Mammoth Yellow so can be grown in the north. Farmers are beginning to appreciate the difference in soy beans and these hay producing varieties will be used more and more each year, because good leafy hay is far better than bare stalks filled with beans.

Lb. 25c postpaid. See Field Seed List for bulk lots.

2044—MAMMOTH YELLOW.—This is the most popular variety now in cultivation and for general forage and soil improvement it cannot be equalled by any other. It grows tall and branching, producing a good leaf growth and an enormous crop of beans. It is not so early, but unless there is some particular need for an early variety, we always advise the Mammoth Yellow.

Lb. 20c postpaid. See Field Seed List for bulk lots.

2048—LAREDOS.—A new variety of the small seeded beans which are becoming so popular. This variety was introduced a few years ago as being perfectly wilt resistant. Seeds are very small. Vines grow tall and make excellent hay. Fruit from ground up maturing about two weeks earlier than the Mammoth Yellow and making one of the best beans for a hay crop. This variety may be sowed at the rate of 10 to 15 lbs. per acre in drills thirty inches apart and the vines will meet in the row and make a heavy yield of fine leafy hay. We consider this sort far superior to the large seeded kinds and a much more certain crop.

Lb. 25c, postpaid. See Field Seed List for bulk lots.

Mr. W. T. Mays, of Roseland, Va., who is seen standing with a bushel of Slate’s Early Adams Early Corn, says: “This garden has been in use 150 years, through five generations in the same family and never have two rows of corn been so productive to my knowledge.”

“For the last eight years I have bought my seed from you and it is with pleasure I take this opportunity to write and tell you how much I appreciate your prompt service and selected, tested seed.” So writes Mr. Jacob Reebals of Nelson, Virginia.

Dear Sirs:

I have been ordering garden and flower seed from you for over five years and I find them just what you say they are. Your garden seeds were first to produce the best vegetables I ever used, and the flowers are just fine. Last spring, I ordered seed from you and also from another firm. I sowed them side by side and I found that Slate’s Seed yield and produce better growth and a more prosperous plant than the others, so I will order seed from you in the future. I feel that I owe you many thanks for your promptness in filling my orders.

Yours truly,

Bennett, N. C., Jan. 27, 1925.
Hettie Brady.
**SLATE’S COTTON SEED**

We try to secure all of our cotton seed in Virginia or the north portion of North Carolina which is free from Boll Weevil. Further, cotton grown in these sections makes the most desirable seed for planting in the south, because it makes the crop earlier. Early cotton is now in demand all over the cotton belt, since the Boll Weevil does his greatest damage to the late plants. Thus our Northern grown seed will help you combat the Boll Weevil.

2115—**CLEVELAND BIG BOLL.**—For the southern part of Virginia and all territory south of this state, Cleveland Big Boll is one of the best varieties of cotton. It makes a good stalk growth with light foliage and produces a big crop of bolls. The bolls open fast and leave the lint within easy reach of the pickers. It has a good staple and runs a high percentage of lint. And to these many good features add earliness in maturing with ease of picking. We are confident that taken for years there are few varieties that will pay a greater profit than this and its ease of handling and picking make it an especially desirable sort for the beginner.

For prices see Field Seed List.

2116—**MEXICAN BIG BOLL.**—This is very similar to the Cleveland Big Boll but said by many growers to make a better yield. Matures earlier than Cleveland and has the wide open boll which makes picking an easy matter for inexperienced hands and is in all respects a good sort.

For prices see Field Seed List.

2117—**IMPROVED KING.**—This is claimed to be one of the earliest cottons in cultivation and is recommended for growing in Virginia or for territory south of here if planting is necessarily late. The King is said to have a medium length staple and runs about the same percentage of lint as Cleveland Big Boll. The stalks grow tall and produce a big crop of bolls. It is not quite so easy to pick as the Cleveland but this is a small matter when a crop is at stake. Where an early cotton is necessary, we think this variety will give satisfaction.

For prices see Field Seed List.

**PEANUTS**

Peanuts will improve the soil like cow peas, fatten hogs like corn, and make hay almost as good as alfalfa. They are legumes and store nitrogen in the soil, thus improving it. For hog pasturage they have no equal. An acre in peanuts will fatten your hogs just as well as corn and you do not have to go to the trouble of harvesting them. The vines when cut yield a good crop of hay, that is almost as good as alfalfa hay. Shell the nuts and plant after the ground has become warm in the early summer or late spring. Drop two or three nuts to a hill, having hills ten inches apart. Rows should be three feet apart. Give frequent shallow-cultivation working the soil up around the plants until the nuts begin to form. A light sandy soil produces the best peanuts.

2080—**SPANISH.**—This makes one of the most desirable varieties for hog pasturage. It outyields all others and the hogs will do the harvesting for you. The nuts are small but well filled. When grown for eating, it is a most desirable sort since the kernels possess a better flavor than those of the Virginia. Lb. 20c postpaid. See Field Seed List for bulk lots.

2082—**VALENCIA.**—Is also known as the improved Spanish. It has all of the good qualities of the Spanish and is larger. Is good for either hog pasture or for growing the nuts for market. Makes long pods which often contain from three to five kernels. Has the good flavor of the Spanish and are comparatively easy to harvest. Lb. 25c postpaid. See Field Seed List for bulk lots.

2081—**VIRGINIA.**—This is a bunch variety and therefore can be grown closer together than the other sorts. Nuts grow very large and contain two kernels to the shell. One of the easiest of all to harvest and a desirable variety for any purpose. Lb. 23c postpaid. See Field Seed List for bulk lots.
SEED IRISH POTATOES

The Irish Potato is the backbone of the garden and should be planted liberally. A small space properly cared for can be made to produce enough potatoes to last the family the entire year and save a great part of the grocery bill. The rules for potato culture are simple but must be followed. Plant as early in the spring as possible to avoid having the vines come above ground before the last frost. The soil should be made rich with commercial fertilizer. Do not use stable manure, because it spreads disease. Plant in rows three feet apart dropping cuttings every 8 or 10 inches apart in the row. Cover from four to six inches deep and do not allow the soil to bake over them about time for the sprouts to push out. Give frequent shallow cultivation and never allow the weeds and grass to take them. Cultivate until the blooms appear and then stop. After the vines get some size, begin spraying with our Potato Dust Mixture, which contains Copper Sulphate, to combat blight and poison to kill the bugs. Use this every two weeks and the vines will remain green and healthy until late summer and give a much better crop of well matured potatoes. Prices on potatoes cannot be quoted in this book, but are given on the Field Seed Price List.

2090—IRISH COBBLER.—We consider this the best general purpose potato in cultivation. It is adapted to almost all sections and gives a good yield under any normal conditions. It is a large, pure white potato with a smooth skin and few eyes. It keeps almost as well as the Green Mountain and much better than others.

2091—EARLY ROSE.—Another good general purpose sort. It is about the same size as the Cobbler, a little more flat in shape, has a pinkish-white meat and clean appearance. Matures in the class with the Cobbler.

2092—RED BLISS.—Also known as the Bliss Triumph. This is one of the earliest varieties in cultivation and for this reason has a place in the home garden and is most profitable for market. Potatoes medium size, rounded, shallow eyes, pink skin, and white meat. It will often mature its potatoes before making its blooms.

2093—GREEN MOUNTAIN.—One of the best Irish potatoes for winter use. It is late in maturing but keeps much better than the average and makes larger, smoother, cleaner potatoes. Every gardener should grow some of these for his winter supply.

2042—100-Day Velvet Beans

The Velvet Bean is an excellent soil improver as well as one of the heaviest producing pasture crops. It can also be grown for hay when sowed with Corn, Sorghum, Soy Beans or some support crop. It makes a rank growth of vines and when allowed to mature produces an abundance of pods. As a soil improver the Velvet Bean is far ahead of the Cow Pea or Soy Bean, owing to the fact that it makes so much more growth of vine and the nitrogen added to the soil is in proportion to the vine growth. As a pasturage crop it has few equals. The general plan when planting for pasturage is to plant with Corn or Sorghum, dropping the beans along in the rows with them. The vines run up on the Corn or Sorghum stalks and in the fall the cattle or hogs may be turned in and will keep fat. One-half bushel of Velvet Beans with one gallon of corn or five pounds of Sorghum seed will plant an acre. When sowed broadcast for hay, the beans should have some support crop. For this ten pounds of Sorghum and one-half bushel of Velvet Beans or one-half bushel of Velvet Beans and three pecks of Soy Beans per acre. Do not attempt to plant Velvet Beans until about May or after the ground has become warm. This 100-Day or Early Speckled variety is the earliest one known and much to be preferred to the later kinds.

Lb. 20c postpaid. See Field Seed List for bulk lots.

Benefits of FARMOGERM are two-fold. First, it increases the inoculated crop; secondly, FARMOGERM improves the soil for future crops.
The Cow Pea Is the Farmer's Fertilizer Factory

COW PEAS

Every farmer cannot but realize the value of the Cow Pea as a soil improver and as a hay crop. We do not know of a more extensively grown legume than the old Cow Pea, and we believe that the farmers are making no mistake by sowing them. As a soil improver, we think it invaluable, and as a hay crop almost as good. There are endless ways and combinations in which peas may be sowed to advantage. Peas make better hay when sowed with some other crop than they do alone. Such a crop as Millet, Sorghum, Kafr Corn, etc., are a great help in curing the pea hay. We have noted many of our agricultural writers and other such men are advising the farmers that fertilizer, or rather nitrogen, when used under peas, is thrown away. Our experiments have led us to believe that nowhere is a little nitrogen more beneficial than under a crop of peas. Any large quantity might be wasted, but a little helps to give the vines a start. Fertilize with a little ammonia or nitrogen when growing the crop for hay, and acid phosphate for seed.

2088—BLACK.—An early maturing variety that produces the most luxuriant growth of foliage of any. On good land this pea will grow very tall and then commence to run. It makes a splendid variety for sowing with some other crop. Very prolific and the best of all for hay.

Write for prices.

2086—MIXED CLAY.—This is not a new variety, but merely a market name for the Clays when they become mixed. For general purposes this kind is as good as the straight variety.

Write for prices.

2087—WHIPPOORWILL.—A standard variety, well known to the farmer. The seeds are of medium size and speckled. The vines are upright, and for this reason are easier to cut and cure than any other variety. Early and in all respects a good variety.

Write for prices.

2089—MIXED COW PEAS AND SOY BEANS.—We can supply Cow Peas and Soy Beans mixed in the proportions that they should be sowed. We use only our best grade of seeds in making this mixture.

Write for prices.

2085—Canada Field Peas

Once a farmer tries this forage crop he will become wedded to it. It has some very decided advantages over most of the other forage crops and deserves every farmer's careful consideration. It can be sowed at a time when there is no other farm work to do. It will produce just as large or a larger yield than cow peas and improve the soil just as much. The hay comes in during the early summer before any other hay is harvested and at a time when hay is needed the most. Further, the hay is high in feed value and greatly relished by stock. Prepare the land just as early as possible. Then during February or March or even up to the first of April if necessary, seed in Canada Field Peas and Applier Oats. One bushel of each per acre. This pea also makes an excellent early pasture for either hogs, cattle or horses. Here is an opportunity for turning a dull season on the farm into a most profitable one.

Lb. 20c postpaid. See Field Seed List for bulk lots.

No matter how well your cow peas grow, inoculate them with FARMOGERM and see the difference.
FERTILIZERS

4054—Sheep Manure
This is a natural plant food and soil conditioner. It is dried, sterilized, and all weed seeds are killed. It makes an ideal fertilizers for house plants, flowers, vegetables, fruits, lawns, and trees. It is easier to use than most commercial fertilizers, and owing to the humus contained gives better results. If you want a safe, clean garden fertilizer that will make the plants produce their best, use this. Ten pounds to one hundred square feet of surface should be sufficient. Mix the manure with the soil thoroughly for quick results. Price—2-lb. carton 35c postpaid. Not postpaid, 10 lbs. $3.50, 25 lbs. $1.00, 100 lbs. $3.00, 500 lbs. $15.50, ton $49.25.

4056—3-8-3 Guano
This is a high grade tobacco or vegetable fertilizer, suitable for anything that grows. We especially recommend this for gardens, truck patches, etc. May be had in either 100 or 200 lb. bags. 100 lbs. $2.10, 200 lbs. $3.25, by freight.

4053—Bone Meal
This makes an ideal lawn fertilizer since it becomes available slowly and furnishes plant food for a long time after being applied. Also an excellent thing for all grass and hay crops, as well as grain. Price—$0.60 per 200-lb. sack by freight.

4060—Plantlife
A complete fertilizer designed to keep house and garden plants growing. It is clean, almost odorless, and put up in attractive tin cans. One teaspoonful will fertilize a 5-inch pot. Or mix one teaspoonful with each quart of soil by stirring it into the top of the soil. It is more lasting in its effects and one application should keep the plant growing for a month. Price—30c per can, postpaid.

4053—NITRATE OF SODA.—A quick acting source of nitrogen which causes immediate growth. It is not a complete fertilizer so is recommended only for forcing young plants. A teaspoonful dropped on the soil directly over the roots of the plant will cause it to grow rapidly. Do not allow to touch foliage. Lb. 20c postpaid. Write for prices on bulk lots.

4052—TOP DRESSER.—A quick acting fertilizer for tobacco or any young plants. Causes immediate growth, prevents the plants from becoming tough while young, and is good for any plant that is to be forced. Apply as directed for Nitrate of Soda. 12 lb. bags 90c each. Postage extra.

"From you I receive more seed and better seed for less money. Your five cent packets have as many seed in them as the ten cent packets I have been getting from the stores. I ordered about a dozen different kinds of seed and some onion sets from you this year and everything did just fine." This is what Mrs. R. Lee Gray, of Warren, Va., says and you will see her in the picture which also shows some good corn and beets to bear out her statement.

Conkeys Poultry Feeds
Cheap poultry feeds do not save money. Any poultryman who tries to save a few dollars on his feed bill by using inferior materials is losing many times what he saves.

After many years of trying out those unknown lines, we have decided to list the Conkey Line of feeds. This is after we have thoroughly investigated the line and know that it is the best to be had in this country. Every one of their feeds are made from clean sound materials, no by-products, no musty stock.

A sample of any of these feeds will be cheerfully mailed you to prove what we have said.

4200—Conkeys BUTTERMILK STARTING FEED.—From the time the chicks start to eating until they are five weeks old this should be the basis of all their feed. It is made of oatmeal, wheat middlings, cornmeal, granulated bone, and semi-solid buttermilk. This is the critical stage in the chicks life and this feed is designed to ward off much of the danger of loss. Packaged in 5 lb., 25 lb. and 100 lb. bags. See Field Seed List for prices.

4202—Conkeys CHICK GRAINS.—Composed of hulled oats, cracked wheat and cracked corn. This feed is thoroughly clean and free from the flour of either wheat or corn. It is all feed. Packaged in 100 lb. sacks. See Field Seed List for prices.

4203—Conkeys BUTTERMILK GROWING MASH.—Buttermilk, wheat middlings, wheat bran, corn meal, ground barley, hulled oats, bone, meat scrap, bean meal and oil meal all go into this mash. Start to feeding at eight weeks and it will hasten the young chicks to maturity or market. Packaged in 100 lb. bags. See Field Seed List for prices.

4204—Conkeys GROWING GRAINS.—This is a grain feed for the growing chicks when they are too large for the chick grains. Made of medium cracked corn, wheat, and hulled oats. Packaged in 100 lb. bags. See Field Seed List for prices.

4201—Conkeys BUTTERMILK LAYING MASH.—The analysis of this feed shows 20% protein with only 6% fibre so its quality is assured. It is made of buttermilk, corn meal, ground barley, wheat bran, wheat middlings, oil meal, bone, meat scrap, bean meal, and salt. This feed is designed to keep the flock at the peak of production when eggs are high. Packaged in 100 lb. bags. See Field Seed List for prices.

4206—Conkeys SCRATCH GRAINS.—No screenings or any off quality grains are used in this feed. Get a sample and compare it with other scratch feeds you have been using. Made of wheat, cracked corn, kaffir corn, barley, buckwheat, and sunflower seeds. Packaged in 100 lb. bags. See Field Seed List for prices.

4208—Conkeys PIGEON FEED.—Made of peas, kaffir, wheat, buckwheat, and millet. All grains are sound and plump and any flock should thrive on this high grade feed. Packaged in 100 lb. bags. See Field Seed List for prices.

4205—Meat Scrap.—All chickens need protein, and this meat scrap is the best form of this valuable element. Can be made into a mash or put in hopper as it is and kept before the flock. Price $5.50 per 100 lbs. by freight or express.

4209—Prepared Charcoal.—Nothing is better for keeping the fowls free from bowel trouble. Place in hopper where they can get it at all times. Two sizes, medium and fine. Price—$2.25 per 50-lb. bag by express, or 25¢ per package postpaid.

4207—Crushed Oyster Shell.—Supplies both grit and lime. Comes in two sizes, coarse and fine. Specify size when ordering. Price—10¢ per lb. postpaid, or $1.25 per 100 lbs. by freight or express.
POULTRY SUPPLIES

4250—BROOD COOP.—This coop makes caring for little chicks a pleasure instead of a worry. It gives absolute protection against hawks, rats, vermin, and storms. You can put biddy and her brood in this coop and know that nothing will happen to them. The body of the coop is made of strong galvanized steel. Has a removable bottom, which makes it easy to clean. Price—$2.50 each, by express.

4251—CHICK FEED COOP.—Made of one-half inch mesh, heavy, galvanized wire. Corners made of strong galvanized sheet steel. Six inches high, 18 inches wide, and 24 inches long. It will easily accommodate 45 to 50 chicks at a time. A great saver for both feed and chicks, and will last for years. Price—$1.60 each by express. Can be mailed if postage be sent extra. Weight about 6 lbs.

4252—ROUND CHICK HOPPER.—This is just the thing for feeding a flock of young chicks, and it will soon save its cost in feed. Height 14 in., diameter of hopper 7½ in., diameter of pan 12 inch. Neatly made of galvanized steel with a lid that can be lowered at night to keep out rats and mice. Price $2.00 each, postpaid.

4253—FEEDER AND EXERCISER.—This is a necessity on every poultry farm. Simply fill with grain and hang where the fowls can reach it, and they will feed themselves and get much good exercise at the same time. Hold sixteen quarts. Price—$2.25 each, by express.

4254—TRAP NEST FRONT. A never-fail front with which you can easily construct your own trampnest. It is an essential on every well-conduct ed poultry yard. It gives exact egg records and makes a good place for brooding hens. Price—65c each, postpaid.

4255—GRIT AND SHELL HOPPER.—Made of strong galvanized iron and will last for years. Has three compartments for mash, shell, charcoal, etc. Price—$1.25 each, postpaid.

4256—EGG TESTER.—Fits any 2-burner and enables you to pick out the infertile from the fertile eggs. Testing out bad eggs will help you to hatch more chicks. Price—35c each, postpaid.

4257—MASON JAR FOUNTAIN. These are the best and most inexpensive of fountains and especially valuable for the small chicks. Fit any mason jar in pint, quart, or two-quart size. We do not supply the jar. Price—15c each, 6 for 75c, postpaid.

4258—WALL FOUNTAIN. This is the most sanitary of all drinking fountains. Hangs from the wall where fowls cannot scratch dirt into the water. Has a removable bottom and is easily cleaned. Capacity, one gallon. Price—90c each, postpaid.

4259—HAND SPRAYERS.—Capacity, one quart. The thing for spraying small houses, boxes, or any small amount of spraying. Price—75c each, postpaid.

4260—EGG JAR.—Mason, quart, 50c each, postpaid.

4261—BROODER FOUNTAIN. This is a wall fountain designed to fit into one corner of the brooder. Hangs from a hook and prevents chicks from getting their feet in the water. Capacity, one quart. Price—50c each, postpaid.

4262—FEED HOPPER.—Removable, easy to clean, and strong. Price—50c each, postpaid.
There are few cures of a very sick chicken, but there are many preventatives to keep them well.

4266—FEED BIN. — These Galvanized Iron Containers will save their cost in the feed that the rats destroy. It has a capacity for one hundred pound sack of feed and should last a lifetime. Price—$3.75 each, by express. Shipping weight about 35 lbs.

4267—SANITARY STEEL NESTS. — These are made in three compartments and can be placed on a shelf, rack or against the wall. They are convenient, sanitary, and vermine proof and each nest is large and roomy. Price for each section as shown, $5.25. Shipping weight about 30 lbs.

4262—BABY CHICK FEED HOPPER — Keeps the feed clean and prevents the chicks from wasting it. 8 in. high and 10 in. wide. Can’t clog. This is an ideal feeder for small flocks. Price, $1.50 each, postpaid.

4269—MAMMOTH FEED HOPPER.—For feeding dry mash to large flocks this hopper cannot be beat. It is well made of strong material, has a capacity of 1½ bu. with a lid to close against rats at night. Being round allows the maximum number of birds to get at it. Price, $7.50 each, by express. Shipping weight, 60 pounds.

4270—I M P R O V E D MASH HOPPER. — This hopper is inexpensive and will serve every purpose for the small flock. It is eighteen inches in width and will care for a number of birds. They are great savers of feed. Price, $2.40 each, postpaid.

4271— THERMO FOUNTAIN.—Every good poultryman knows the value of cool water in the summer and warm water in winter for his flock. This fountain is designed to give this without trouble or any great expense. It is easy to handle and keep clean. Capacity, two gallons. Price, $4.00 each, by express. Shipping weight, 27 pounds.

4273—SUNLITE OAT SPROUTER. In the South there is very little need for heat in sprouting oats. Just buy this inexpensive sprouter and place it in front of a window. May be made any size desired by adding extra sections of three trays each. Price, 3 trays, $4.75, complete. Extra 3 tray sections, $1.75 each, by express.

I like all of your seeds, plants, and bulbs. I have been planting Slate’s Seeds for eight years and everything I get from you is fine. Conkey’s White Diarrhea tablets are grand. I used them last year and never had a sick chick.

March 23, 1925.
Roduco, N. C.

Mrs. J. B. Hampton.

FEEDING POULTRY FOR PROFITS

This is a subject of vital interest to every poultryman and should be given careful consideration. No fowl will amount to much unless it is properly fed and to be properly fed it must have a balanced ration that is suited to the needs of the fowl. If you have hens to lay then feed them a good clean laying mash with some grain feed. If you have young stock that you wish to market, feed them growing mash and grains to build body and hasten growth. If you have chicks feed them Conleys Buttermilk Starting Feed to prevent diarrhea and other diseases. The right feed for every need may be found in the Conkey line and if you wish prices on large lots, write us about your needs and we shall be glad to quote you special prices. We are able to take care of the needs of both the large and the small poultryman.
4274—**OAKES HOT WATER INCUBATOR**.—All Oakes Incubators are light and compact and made to occupy a small space. They may be kept on a table in the home. It is made of two metal walls insulated between. The egg tray is made of closely woven hardware cloth and the bottom of the machine is perforated to allow ventilation. To turn the eggs you simply lay the palm of your hand on them and move them back and forth to change their position. The heating unit in this machine is a lamp which heats a tank of water. This makes an ideal heat for hatching. All parts are well made of good material and the regulator is one that has stood the test of time. The Oakes incubators have been used successfully for years. The 60 egg machine cost $13.50, and the 100 egg $18.50. Both f. o. b. factory.

4275—**OAKES ELECTRIC HEN**.—For those who have electric connections, there is not a better incubator than this. It has almost perfect automatic features that control the heat and maintain an even temperature with no watching. It is made on the same plan as the Hot Water Machine except for the heating unit. In five minutes time, this machine can be converted into an ideal hover for the chicks after they hatch. The cover is removable and has side curtains to attach and this makes the electric hover illustrated here and which we sell as a separate unit also. The electric is made for either 32 or 110 volt, alternating or direct current. Be certain to state your voltage, etc., when ordering. 60 egg electric, complete with Hover curtains, legs, etc., $18.00. 100 egg electric, complete as above, $25.00, both f. o. b. factory.

4276—**OAKES ELECTRIC HOVER**.—This is the nearest thing to a hen it is possible to get. It is the easiest brooder to operate you ever saw, because it is controlled by automatic elements. It has no lamps to go out or smoke or to be watched at night. The heat is supplied from an electric light socket and the automatic control maintains an even temperature at all times even when an unexpected cold spell comes during the night. The 18 in. Hover for 50 to 75 chicks is worth $13.50. The 22 inch for 75 to 100 chicks cost $16.50. Both f. o. b. factory.

4277—**OAKES ECONOMY HOVER**.—For an efficient and inexpensive brooder, we have never seen anything to equal this. It is simple in its construction and made of steel throughout and all parts are welded together, making it strong and durable, yet light in weight. It is complete in itself and can be lifted by the two hands without disturbing the lamp. It can be used on any level floor anywhere with perfect safety. It is heated by a lamp that is held securely in a lamp slide that fits into the lamp box. Thus the lamp is on the inside of the brooder but enclosed so no damage can be done. This hover may be had with a wire cage that keeps the chicks from straying off during cold weather and is invaluable as a protection against rats at night. However, if this cage is not desired $3.00 may be deducted from the price of either size hover. The 18 in. hover for 50-75 chicks is $9.50, and the 22 in. hover for 75-100 chicks is $13.00. Both f. o. b. factory.
PROVEN POULTRY REMEDIES

Every remedy we list is fully guaranteed to give satisfactory results or your money will be refunded. Successful poultrymen do not wait until disease has appeared in the flock before having remedies at hand, but keep them on hand at all times. A remedy for all of the more common poultry diseases should be on hand at all times, since it means the saving of many valuable fowls to be able to check diseases before they get a foothold. If at any time you are in need of advice regarding the care and handling of your flock, write us and we will gladly give you the benefit of our experience along these lines.

CONKEY'S LICE POWDER.—An effective means of ridding both old and young birds of body lice.

CONKEY'S POULTRY TONIC.—The manufacturer declares this to be an all medicine tonic, free from red pepper and all filler. Valuable for young chicks during the growing period and for old birds during molting season or to maintain good health in the flock. 4214—Per package........ 30c postpaid 4212—Per package........... 60c postpaid

LIMBERNECK REMEDY.—Helps to save the fowls that suffer from Limberneck or Pto- 

mone poisoning. 4239—Per package ....... 30c postpaid

AVICOL.—A most highly recommended remedy for Diarrhea and other bowel troubles of little chicks. Simple to use. Just add a little to the drinking water. Our guarantee of satisfaction or money back goes with every purchase. 4230—Per package........ 50c postpaid

CONKEY'S NOXICIDE.—This is a dip and disinfectant which will be found indis- 

pensable in the poultry yard and on the farm. For red mites in hen houses, paint the roosts and runs with this liquid full 

strength. For killing lice and disinfecting mix with water as per instructions on can. Every poultryman and farmer should keep a can of this preparation on hand at all times. 4243—One Quart Cans, $1.00 postpaid. 4244—One Gallon Cans, $2.00 by express.

SULPHUR CANDLES.—Exclude 

all birds from the house and stop all cracks possible and then burn these candles to destroy disease 

germs, lice and mites. It is one of the simplest and most efficient disin- 

fectants. The candles offered are of 

4-oz. size. One is large enough for the average box or hovel. For poultry 

houses use about one candle to every two hundred cubic feet of space. 4233—15c each, 2 for 25c, dozen $1.25 postpaid.

SUCCUlENTIA.—This is a concentrated substitute for green feed and saves the labor of sprouting oats. It is cheap and efficient and will keep both old and young birds in good health during the win-

ter months. It is especially valuable for feeding to laying hens during the winter and for feeding the early hatched chicks. Every- 

one knows that green feed is essential to 

chickens and the valuable elements of green feed have been scientifically condensed in these wafers. Just drop the wafers in the drinking water. Fully guaranteed to produce results or your money back.

4245—100 Wafers............. 35c postpaid 4246—250 Wafers............... 1.00 postpaid 4247—500 Wafers............... 1.75 postpaid

DON SUNG.—This is a new discovery for stimulating the egg-laying organs of the hen and making her lay regularly in any season. It does not force or hurt the hen in any way. Rather it serves as a general tonic and improves her condition. It is especially desirable for hens kept on close range during the summer and for all hens during the winter. We fully guarantee this material to our customers and wish them to get satisfactory results or we will refund their money. 4231—Small size.......... 50c postpaid 4232—Large size........... 1.00 postpaid

POULTRY LAXATIVE.—A good purgative is often essential in cases of Diarrhea, Cholera, and Indigestion. 4234—Per package........ 35c postpaid

CHOLERA REMEDY.—Keep a package on hand and put a little in the drinking water once a week. This will act as a preventative and cure any affected birds at the same time. This is a most valuable remedy. 4225—Per package .......... 25c postpaid

SURE HEAD REMEDY.—Each package con- 

tains a powder for giving to the fowl to correct blood impurities and a salve for putting on the sores. 4240—Per package ........ 25c postpaid

LICE LIQUID.—Mix one quart with fifty 

parts of water and you have an effective spray for cleansing the poultry house and killing lice and mites. 4228—Per quart can 75c postpaid

SCALY LEG REMEDY.—Scaly leg is caused by a mite that bur- 

rows into the skin. This remedy is designed to remove the cause and restore the bird's skin to its normal smoothness. 4237—Per pck. ....... 25c postpaid

BOURBON REMEDY.—This is the best general purpose remedy we have ever used. It is valuable for most of the common diseases of poultry and es-

pecially good for little chicks during their first eight weeks. The best way is to use it as a preventative, but it can be relied upon to cure Diarrhea, Cholera, Roup, Canker, Indi-

gestion, etc. It is a combination of certain salts and acids which cleanse the fowl's system, give them appetite and keep them in healthy condition. 4215—Trial size ... .65 postpaid 4216—Half pint .... 1.00 postpaid 4217—Full pint ........ 1.50 postpaid

STANDARD SPRAY PUMP

The Standard is nothing more than a well-made "squirt-gun" pro-

vided with a proper outfit of nozzles. Thus a spray pump of un-

usual simplicity and durability is obtained. Each pump is equipped with three and one-half feet of hose, a strainer, and complete set of nozzles. If desired, a knapsack and potato extension rod for spraying low-growing crops can be obtained.

The Standard will throw four streams that fully cover every 

spraying need. Without a nozzle, it throws a heavy stream for wash-

ing the automobile or putting out fires. A nozzle for spraying white-

wash and other heavy materials is supplied, and one for a medium 

spray and another for very fine spray.

Every Standard is fully guaranteed against defects for five years. It is made of the best brass and has no parts to get out of order. It will spray orchards, vines, truck crops, whitewash, cattle dip, and disinfectants, fight fire, or wash automobiles.

Price List—Postage Extra 4024—Pump, hose, and nozzles as shown above $5.50 4025—Knapsack extra 4.00 4026—Potato Extension Rod, extra 1.50 4024-25-26—The pump complete with knapsack and extension rod as shown below......$10.00

Standard Pump with "Potato" Extension and No. 3 Nozzle Attached to Knapsack.
**Spray Chart**

<table>
<thead>
<tr>
<th>Crop</th>
<th>Treatment Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>ASPARAGUS</strong></td>
<td>For the beetles use Arsenate of Lead either as a dust or liquid spray. If dust apply full strength with a dust gun. If liquid use 2 lb. to 50 gal. water. For rust dust with Copodust or use in solution.</td>
</tr>
<tr>
<td><strong>MELONS</strong></td>
<td>For the Beetles on all kinds of melons use A-1 Nicotine dust with a small quantity of Arsenate of Lead added. This should be applied late in the afternoon with a dust gun. For Blight and Wilt use Copodust.</td>
</tr>
<tr>
<td><strong>BEANS</strong></td>
<td>For Anthracnose dust with Copodust using full strength in a dust gun. For the beetles that eat the young beans, dust with Arsenate of Lead.</td>
</tr>
<tr>
<td><strong>ONIONS</strong></td>
<td>For the Onion Aphis use A-1 Nicotine dust applied with a dust gun in liberal quantities. This dust, when it strikes the body of an Aphis, kills it instantly.</td>
</tr>
<tr>
<td><strong>CABBAGE</strong></td>
<td>For cabbage worms dust with Arsenate of Lead. This does not harm people eating the cabbage, because the leaves head up from the inside. For Aphis use A-1 Nicotine Dust.</td>
</tr>
<tr>
<td><strong>POTATOES</strong></td>
<td>It is best to use our D-18 Potato Dust since this kills both bugs and blight and one dust does the work for both. Arsenate of Lead will kill the bugs and Copodust should be used for the blight.</td>
</tr>
<tr>
<td><strong>CELERY</strong></td>
<td>For blight use Copodust dusting every two weeks after the plants attain some size. Usually three dustings are sufficient.</td>
</tr>
<tr>
<td><strong>SPINACH</strong></td>
<td>Spinach is often attacked by the Aphis or plant lice, but a dusting of A-1 Nicotine Dust will rid the plants of them.</td>
</tr>
<tr>
<td><strong>CUCUMBERS</strong></td>
<td>For the Beetles use A-1 Nicotine Dust, applying it in the late afternoon or early morning when the bugs are at work. For Blight add a little Copodust to the Nicotine dust just before applying.</td>
</tr>
<tr>
<td><strong>SPINACH</strong></td>
<td>For the Beetles and Aphis use a mixture of A-1 Nicotine Dust with a little Arsenate of Lead added. For the large sow bugs, place a board near the vines and the bugs will hide under it in the day. Take up board and kill the bugs.</td>
</tr>
<tr>
<td><strong>GRAPES</strong></td>
<td>For Mildew and Black Rot use Copodust. This may be applied either dry or in liquid form. For Mildew alone Sulfodust is good. For the Leaf Hoppers dust with A-1 Nicotine dust.</td>
</tr>
<tr>
<td><strong>SQUASH</strong></td>
<td>For the Beetles and Aphis use a mixture of A-1 Nicotine Dust with a little Arsenate of Lead added. For the large sow bugs, place a board near the vines and the bugs will hide under it in the day. Take up board and kill the bugs.</td>
</tr>
<tr>
<td><strong>KALE</strong></td>
<td>For the Aphis dust with A-1 Nicotine dust using it full strength always. The dust spreads and rises under the foliage touching the lower leaves better than any liquid spray could do.</td>
</tr>
<tr>
<td><strong>TOMATOES</strong></td>
<td>Blight and Wilt destroy a large part of the tomato crop each year. The vines can be kept green and bearing by dusting every two or three weeks during the season with Copodust. Arsenate of Lead will kill the tomato worms.</td>
</tr>
<tr>
<td><strong>FLOWERS</strong></td>
<td>Nearly every flower plant has some insect or disease to attack it. Of the insects there are generally two classes, the sucking bugs such as Aphis or plant lice and the chewing bugs that eat the foliage. Then there are the soft bodied insects like Mealy bug that is seen on Coleus, Palms, etc., at the joints of the plant. The Nicotine Dust or Thrip Juice as a liquid spray will kill all plant lice and soft bodied sucking insects. Arsenate of Lead or Bug Death will kill the chewing insects. A dust is generally much easier to apply than a liquid spray and it spreads in the foliage of most plants better than liquid. After dusting house plants always give them a bath with hose to clean them up. We are always glad to answer questions and aid you in any manner possible. Call on us.</td>
</tr>
<tr>
<td><strong>TTOBACCO</strong></td>
<td>Use nothing but a good grade of Arsenate of Lead full strength applied at the rate of five pounds per acre on full grown tobacco. Small tobacco can be dusted with three pounds per acre.</td>
</tr>
</tbody>
</table>
SPRAY MATERIAL

**DRY LIME SULPHUR.**—Used to control the San Jose Scale on peach, plum and all stone fruits. It is put up in powdered form and can be readily mixed with water as needed. Saves a large part of the freight in shipping and is otherwise cheaper than the liquid. For the dormant spray against such troubles as San Jose Scale, Oyster Shell Bark Louse, etc., use 15 lbs. of Dry Lime Sulphur to 50 gallons of water. For summer spraying against fungus diseases, such as Apple Scab, etc., on all seed fruits, such as apples, pears, quinces, etc., use from 2 to 3 lbs. of Dry Lime Sulphur to 50 gallons of water in combination with the usual proportion of Dry Powdered Paste arsenate of lead. For the summer spray on all stone fruits, such as peaches, plums, etc., use from 1 to 1 1/2 lbs. to 50 gals. of water in combination with the usual strength of Arsenate of Lead.

4086—1-lb. package $ .45 postpaid
4087—5-lb. package 1.75 postpaid
4088—25-lb. package 4.50 by express
4089—50-lb. package 7.50 by express

4991—FARMERS BUG AND BLIGHT COMBINATION.—This is a collection of insecticides and fungicides that will be needed on every farm and is selected to fill almost every common need. It will save many times its cost. Each collection contains

- 5 lbs. A-1 Nicotine Dust $ 1.50
- 5 lbs. D-18 Potato Dust 1.25
- 2 lbs. Copodust .60
- 5 lbs. All in One Dust 1.50
- 1 Feeny Dust Gun 1.25

This collection $5.50, by express.

**ARSENALE OF LEAD POWDERED.**—The standard poison for tobacco worms, potato bugs, and all chewing insects. It can be used in solution as a wet spray or dry as a dust. As a wet spray one pound will make from 20 to 50 gallons according to the tree or crop sprayed. For use as a powder, do not mix with ashes or any carrier, but apply with a dust gun just as it comes from the can. For tobacco from three to five pounds per acre will be needed according to the size of the plants. For potatoes use from five to seven pounds per acre. Arsenate of Lead is a poison and cannot be sent through the mails.

4000—1-lb. packages .40
4001—4-lb. packages 1.15

Case of 12 four lb. packages for $10.00.

4993—THRIJUICE.—A jelly substance containing Nicotine and Resin soap. We have given this a thorough test and found it to be one of the best sprays for killing green and black lice, and similar soft-bodied insects on flowers, vegetables or any growing plant. A pint can will make from five to ten gallons of spray. Pint cans, 75c, postpaid.

4103—HAMDONDS SLUG SHOT.—A safe insecticide for use on all kinds of vegetables, flowers, and house plants. It is not poisonous and will not injure even the most delicate foliage. Also good for killing lice on poultry. May be applied with a Feeny dust gun or any good duster. Can be sent by mail. 5 lbs. 65c, postage extra.

4997—POWDERED HELLEBORE.—This is a powdered substance made from the roots of Hellebore. It is not poisonous to human beings, but is instant death to insects. It is especially desirable to use on cabbage and other fruits and vegetables when almost ripe. Apply dry just as it comes from the package with a dust gun. It can be sent through the mails. Price—1/2-lb. 50c postpaid.

4990—KEROSENE EMULSION.—Another very effective spray for plant lice, thrips, and similar soft-bodied insects. Quart cans, 75c each postpaid.

4104—TOBACCO EXTRACT.—A 4% nicotine solution used for killing thrips, plant lice and sucking insects. This extract and Fish Oil soap mixed make a most effective spray at a very small cost. One pound of Fish Oil Soap, 1/2 pint of tobacco extract and 10 gallons of water. Price $ 1/2 pint cans, 60c, by express.

---

**Bug Death** will kill every kind of chewing insect, yet is perfectly harmless to human beings and animals of all kinds. It can be used in perfect safety around the house where children are and in the garden or yard where the fowls use. It will not burn even the most tender foliage and is easy to apply. Can be used as a dust or liquid spray, but the easiest manner of applying is in the dust form just as it comes out of the package. Do not mix with lime, ashes or any carriers.

4073—1-lb. cans 25c postpaid

4074—BUG DEATH ALPHA (for Sucking Insects).—This, like Bug Death, is a non-poisonous material which can be safely used on house plants and vegetables. It differs from Bug Death in its use. Bug Death Alpha is made to kill plant lice, aphids and all kinds of sucking bugs. 12 oz. cans 25c each, postpaid.

4095—CUT WORM KILLER.—For use as a poison bait against cut worms and slugs which do so much damage to young plants. It is easy to use. Just drop a very small quantity near each plant. It is prepared so as to attract the worms, and once they get it, you will have no more trouble with them. Price—lb. 35c by express.

4096—FISH OIL SOAP.—This is a contact insecticide for soft-shell or sucking insects. It is not poisonous, and is sure death to plant lice and similar sucking bugs. One pound makes 8 to 10 gallons of spray. To one pound of soap add one-half gallon of hot water. When the soap is thoroughly dissolved add from 7 to 9 gallons of cold water. Fish Oil Soap is much safer to use on tender plants than Kerosene Emulsion, since the kerosene often damages a plant where it is applied too strong. This can be sent through the mails. Price—lb. 35c postpaid.

4102—SULFODUST.—This is a high grade of Sulphur in the best mechanical condition for spreading. It is the remedy for Mildew of roses and other plants. May be used alone or in combination with other materials. Nonpoisonous and malleable.

Price—1 lb. 15c, 5 lbs. and over at 10c lb. postpaid.

4076—A-1 NICOTINE DUST.—This dust contains a high percentage of very active Nicotine Sulphate in combination with lime which increases its effectiveness. Nothing better can be found for sucking bugs, aphids or plant lice, etc. This is the dust for use on melons, cucumbers, squash, etc., and for killing most of the insects that destroy flowers. It is a poison and cannot be mailed.

Price—1 lb. cans 40c, 5 lb. cans $1.50 by express.

4084—D-18 POTATO DUST.—This is made up of 25% Calcium Arsenate to kill all chewing insects with 20% Copper Sulphate to prevent blight and other diseases. This dust is especially valuable for crops liable to damage from chewing insects and blight, since it is a dual purpose spray. It is well to use it for all truck crops requiring a poison for chewing insects. Cannot be mailed.

Price—1 lb. cans 35c, 5 lb. cans $1.25 by express.

4077—COIODUST.—This material is composed of 15% Copper Sulphate and is used for control of blight and other diseases. It may be combined with the Nicotine dust, Arsenate of Lead, Sulfordust or almost any insecticide. Especially valuable for potatoes, tomatoes, melons, cucumbers and all crops subject to blight.

Price—1 lb. 30c, 5 lbs. or more at 25c lb. postpaid.

4078—ALL IN ONE DUST.—This is made especially for the home garden where an insecticide for both chewing and sucking insects is needed. All in One Dust combines both poison and nicotine and if a little Copodust is added just before using, an all purpose insecticide and fungicide is to be had in the same dust.

Price—1 lb. cans 40c, 5 lb. cans $1.50 by express.

Slate's Good Seeds and Prompt Service, South Boston, Virginia
GOOD TOOLS REDUCE LABOR

4001—CYCLONE SEEDER
This is a very light machine of simple construction used for sowing all kinds of seeds — Wheat, Oats, Rye, Barley, Grass, Clover, Vetch, Rape, Beans, Peas, and in fact anything that has to be sowed can be handled in this one machine. The adjustment for the different kinds of seeds is in easy reach, and can be made by anyone in two minutes. I have tried many different makes of seeders, but have never found any that did better work than this. From actual experience in my own fields, I consider this the most economical and practical machine that has ever been placed on the market. Distributes evenly and cannot clog. Price $2.25 each postpaid, or $2.00 by express.

4015—GARDEN TROWEL.—Medium size, stamped from metal. Price—40c each postpaid.

4029—YELLOW JACKET DUST GUN.—One of the most practical models that has yet been invented. It has a large fan, big exhaust pipe, and brush feed which are three valuable features. In addition the gears are enclosed to keep them from being damaged and the entire machine is assembled with small bolts so that it may be taken apart and repaired at home. Made of tin and finished in yellow and black. Price, $1.50 each, by express.

4026—HUSON COTTON AND TOBACCO DUSTER.—This is a well made gun of simple design and will last longer than any two other guns on the market. It is made up from pressed steel which gives the body of the machine almost unlimited life and the gears are all encased in oil which gives them extra life and quiet smooth running. It has a medium size hopper, with good metal agitator to keep the poison worked into the feed pipe. The fan is seven inches in diameter and runs at a high speed with the minimum effort on the part of the operator. Easily adjusted gauge is on the front of the machine. It is light weight, easy to operate, the most compact built, and one of the most substantial machines we have yet seen.
Price, $12.50 each, by express.

4022—HAND PRUNING SHEARS. The blade is made from crucible tool steel and handles drop forged from open hearth steel. Highly polished handle and blade. This tool will do any work that can be accomplished with shears of its kind. Price—$2.75 each, postpaid, $2.50 each by express.

4023—PRUNING SAW.—This type of saw is the most popular because it is light and can be used at any angle with practically no danger of breaking or buckling the saw. It will cut rapidly, making a clean cut with no danger of bruising and scarring the bark. Price—$1.50 each postpaid. $1.25 each by express.

MAGIC WEEDER HOES.—The Magic Line thoroughly covers every need of both the vegetable and flower gardens for hand weeder. These tools are to be had in a variety of sizes and styles, and their price is within the reach of every person cultivating even a few feet of soil. They are made of the very best material and will last indefinitely. The following styles are illustrated in the cut opposite.

4021—TWO HAND PRUNER.—This tool has more desirable features and easier cutting qualities than any I have ever seen. Made of the best quality material and made to do heavy work. Price—$2.25 by express. Weight packed, 5 lbs.

4020 — COMPOUND LEVER TREE PRUNER.—This tool has a compound lever head made for heavy work. It cuts limbs over one inch in diameter. The pole is jointed and may be had in different lengths by taking out or putting in joints of the pole. Saves climbing and reaching with the smaller pruners. Price—Top and Handle sections making an 8-foot pruner, $4.50. Extra joints to make any desired length, 50c per four-foot length.
Moss Aztec Hanging Basket

This is one of the best values in a hanging basket to be found today. The basket is made of a good grade of clay and finished in the beautiful moss aztec which insures an ornamental appearance for many seasons. These baskets are far more decorative than the wire ones and will last much longer with reasonable care. We advise shipment by express and will guarantee safe delivery when so shipped. However, should you care to take the risk, we will pack the best possible and mail at your risk and expense when desired. The prices below do not include any delivery charges and postage must be sent extra when wanted by mail.

6\(\frac{1}{2}\) inches in diameter .................. $ .50 each
8\(\frac{1}{2}\) inches in diameter .................. $ .75 each
10\(\frac{1}{2}\) inches in diameter .................. $ 1.00 each

STANDARD RED POTS AND BULB PANS

These pots are all made of a good grade of red clay, and are suitable for all kinds of pot plants. They are not so ornamental, but can be covered when brought into the living room. All flower pots are breakable and cannot be sent by Parcel Post without great danger. We advise express shipment, and will assume responsibility for safe delivery when sent by express. Prices below do not include any delivery charges.

SAVO FLOWER BOXES

The Savo Self-Watering Steel Flower and Plant Box is scientifically constructed under the Sub-Irrigation plan, which is the most perfect plan ever devised for the growth of any kind of plant life.

The two perforated arches running the full length of the box not only hold and distribute the water which they contain evenly throughout the box but supply air to the roots constantly, causing the soil to be mealy and loose, making the life and growth of plant a certainty. Cannot overwater plants. Air goes direct to roots.

Directions for Using: First, place coarse gravel, pebbles, broken flower pots, charcoal or moss about two inches deep over the top of the double arched reservoir, coming up to the top of drainage hole on side of the box, then fill the box with good rich black dirt, fill the reservoir with water and sow the seed or install the plants and see them grow.

Stock sizes and price list, postage extra:

| 4002—Model A, 8 in. high, 9 1/2 in. wide, 23 in. long | $3.50
| 4003—Model B, 8 in. high, 9 1/2 in. wide, 29 in. long | 4.00
| 4004—Model C, 8 in. high, 9 1/2 in. wide, 36 in. long | 4.50
| 4005—Model D, 8 in. high, 9 1/2 in. wide, 41 in. long | 5.00
| 4006—Model E, 8 in. high, 12 in. wide, 12 in. long | 3.50
| 4007—Model F, 12 in. high, 12 in. wide, 12 in. long | 4.00
| 4008—Model G, 12 in. diameter, with stand 28 1/2 in. high | 6.00

These are outside measurements, including the 3/4-inch roll rim. Beautifully finished in Dark Green.

### Terms...Subject to being unsold, market changes, and our usual non-warranty, we offer the following seeds. Every lot of field seeds of ten pounds or more is tagged in accordance with the Agricultural Seed Laws of Virginia and North Carolina. Samples with Purity and Germination tests will be sent upon request. Prices on Field Seeds fluctuate. This list is issued every week during the season and we shall be glad to send a revised copy to anyone upon request.

**Shipping Charges.** When quotations have "Post paid" above them, it means that we will deliver goods at these prices by parcel post without any extra charge of any kind. Freight or Express above a quotation means that customer is to pay delivery charges but no charge for sacks. Those who wish may order by these prices and add the exact amount of postage necessary.

**Sacks Free.** We make no extra charge for sacks of any kind.

HELPFUL SUGGESTIONS ABOUT ORDERING

ORDER BY CATALOG NUMBERS—You may give the names, too, if you wish, but please be certain to give correct numbers of the items desired.

POSTPAID—When this follows a price it means that we will deliver the goods to your mail box without extra charge.

BY EXPRESS—When this follows a price it means that the goods are not quoted delivered to you, but that you are supposed to pay the carrying charges. If you wish items so quoted to be sent by Parcel Post we will gladly send them that way if you send money to cover the postage.

FARMGERM SEED INOCULATION

This recognized standard of seed inoculants insures the growing of bigger crops by making poor soil good soil. It is always fresh—the only culture sold in bottles with the patented stopper which enables the bacteria to breathe air, insuring long life without deterioration.

FARMGERM is a culture of only high-bred nitrogen-fixing bacteria. It replaces essential elements in the soil in an effective and economical manner.

FARMGERM, used on your seed, furnishes Nitrate to the plants. It increases their growth and enriches the soil. When the seeds sprout the bacteria enters the root and makes large supplies of Nitrate, which benefit greatly the growing crop and the crops that follow. Soils can be built up to a high standard of fertility at small cost and little labor. Assures substantial saving in your fertilizer bill.

### SMALL SEED LEGUMES
- **Alfalfa—Clovers—Sweet Clovers**
  - 1/4 bu. size: $0.35
  - 1/2 bu. size: $0.60

  - 1/2 bu. size: $0.60
  - 1 bu. size: $2.25

### LARGE SEED LEGUMES
- **Garden size for Garden peas, beans and sweet peas.**

Special composite culture, 25c

REMITTANCES—Should always be made by Postal or Express Money Orders or Checks. Your personal check is good, but if you wish to send a money order, we will pay for it. Just deduct the cost of the order from the amount of money you send. Please do not send cash or stamps if it be possible to do otherwise. We have had many orders either lost or stolen during the past year and when this happens we cannot trace an order if the remittance was made in cash or stamps.

TERMS AND CONDITIONS OF SALE—Our terms are strictly cash to everybody except persons having an account with us. If you wish to open an account send references. The Slate Seed Company gives no warranty, express or implied, as to the quality, description, purity, productiveness, or any other matter of any seeds, bulbs, roots, or plants they send out and they will not be in any way responsible for the crop therefrom. If the purchaser does not accept the goods on these terms, he must return them at once.

SHORTAGE—When receiving goods from freight or express office be certain that the package is in good condition. If it has been damaged make the agent note the damage on his bill and send this bill to us and we will enter the claim for damage and refund you the amount due you.

EVERY SHIPMENT IS GUARANTEED TO REACH YOU IN GOOD CONDITION.—This guarantee is good only when the loss is reported to us immediately upon receipt of the goods or in case they do not reach you within a reasonable length of time after you have mailed your order. When writing about such matters, always give the number of your order, a list of what was short, and your full name and address.

ORDERS WITH NO NAMES—We have a number of these on hand now. Any person giving us a list of the items, amount of remittance or such description, may obtain a refund of the amount sent in such orders.

WHEN YOU CHANGE YOUR ADDRESS—Notify us so that we may continue to send you our catalogs and be certain to give both the old and new address.
